Independent auditor's report

To the Shareholders and Supervisory Board of the JSC Liberty Bank

Report on the audit of the consolidated financial statements

Opinion

We have audited the consolidated financial statements of JSC Liberty Bank and its subsidiaries (hereinafter, the "Group"), which comprise the consolidated statement of financial position as at 31 December 2025, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2025 and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with IFRS Accounting Standards.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code), as applicable to audits of financial statements of public interest entities, together with the ethical requirements that are relevant to our audit of the consolidated financial statements of public interest entities in Georgia. We have also fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For the matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to this matter. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matter below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Key audit matter

Allowance for Expected Credit Loss and application of IFRS 9 'Financial Instruments

Given the significance of the loans to customers to the Group's financial position, and the complexity and judgments related to the estimation of expected credit losses under IFRS 9 Financial Instruments ("IFRS 9"), we consider this area as a key audit matter.

The impairment for loan losses is calculated using a combination of a collective provisioning model and individual loan provisions based on discounted cash flow analyses and regression-based forward-looking estimates.

Both collective and individual provisioning depend on several assumptions and judgments such as:

- ▶ Accounting interpretations and modelling assumptions used to build the models for calculating the expected credit loss (ECL);
- ▶ Allocation of loans to stage 1, 2 or 3 using criteria set in accordance with IFRS 9;
- ▶ Inputs and assumptions used to estimate the impact of multiple economic scenarios;
- ▶ Estimation of probability of default (PD), loss given default (LGD) and exposure at default (EAD); and
- ▶ Measurement of individually assessed provisions, including expected future cash flows and the valuation of collateral.

As a consequence of the judgment involved in establishing the allowance, the use of different modelling techniques, assumptions and forecasts could produce significantly different estimates of the allowance for expected credit losses.

How our audit addressed the key audit matter

We obtained an understanding of the ECL process and evaluated the methodology developed by the Group.

Where changes had been made in model parameters and assumptions, we understood the reasons why changes had taken place and involved internal credit risk experts for evaluation of the changes.

We focused on analysis of the following areas during our audit:

- ▶ Evaluating credit risk models and assumptions used to estimate key provisioning parameters, and determine expected credit losses on a portfolio basis;
- ▶ Assessing management's judgement in relation to the identification of significant increases in credit risk and event of default on an individual and collective basis based on quantitative and qualitative criteria; evaluating consistency of application of the criteria selected by the management as of the reporting date; testing allocation of loans to respective impairment stages based on the criteria predefined in the Group's ECL methodology.

For a sample of individually assessed loans, we evaluated the basis on which the allowance was determined and the evidence supporting the management analysis, challenged whether the key assumptions and inputs used were appropriate in the borrower's circumstances and recalculated the impairment allowance. For a sample of credit-impaired corporate exposures, we challenged assumptions on estimated future cash flows, including value of collaterals and probabilities of expected outcomes.

Key audit matter	How our audit addressed the key audit matter
<p>Allowance for Expected Credit Loss and application of IFRS 9 'Financial Instruments</p> <p>Information on the impairment of loans to customers is included in Note 4, Significant accounting judgments and estimates, note 8, Loans to Customers and Note 26, Risk Management, to the consolidated financial statements.</p>	<p>To test allowance calculated on a collective basis, we evaluated underlying statistical models, key inputs and assumptions used and assessed incorporation of forward-looking information in the calculation of expected credit loss.</p> <p>We assessed the disclosures in the consolidated financial statements on the impairment of loans to customers.</p>

Other information included in the Group's 2025 Management Report

Other information consists of the information included in Group's 2025 Management Report, other than the consolidated financial statements and our auditor's report thereon. Management is responsible for the other information.

Our opinion on the consolidated financial statements does not cover the Management Report and we do not express any form of assurance conclusion thereon in our report on the audit of the consolidated financial statements.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and the Audit Committee for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group] or to cease operations, or has no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control;
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
- ▶ Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern;
- ▶ Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation;
- ▶ Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming an opinion on the consolidated financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report in accordance with the requirements of Article 7, paragraph 10 of the Georgian Law on Accounting, Reporting and Auditing

In our opinion, based on the work undertaken in the course of the audit:

- ▶ The information given in the Management Report for the financial year for which the consolidated financial statements are prepared is consistent with the consolidated financial statements; and
- ▶ The Management Report includes the information required by Article 7 of the Georgian Law on Accounting, Reporting and Auditing and complies with respective regulatory normative acts.

The partner in charge of the audit resulting in this independent auditor's report is Ana Kusrashvili

Ana Kusrashvili (SARAS-A-169041)

JSC Heritage Securities (nominee holder)	0.42%	0.43%	0.55%	0.57%
Other shareholders (individually holding less than 5%)	3.59%	1.58%	3.46%	1.22%
Total	<u>100.00%</u>	<u>100.00%</u>	<u>100.00%</u>	<u>100.00%</u>

Bank's ordinary shares are traded on the Georgian Stock Exchange.

These consolidated financial statements are subject to approval by the General Meeting of shareholders of the Bank.

The consolidated financial statements as at 31 December 2025 and 31 December 2024 include the following subsidiaries. The Bank and its subsidiaries are collectively referred to as the "Group".

Name	Relationship Type	Country of incorporation	The Group ownership interest		Date of incorporation	Legal Address	Activities
			31 December 2025	31 December 2024			
Bus Stop LLC	Subsidiary	Georgia	100%	100%	27 August 2009	Georgia, Tbilisi, Vake district, Ilia Chavchavadze ave., №74	Outdoor Advertising
Public Fund	Subsidiary	Georgia	100%	100%	5 February 2007	Georgia, Tbilisi, Vake district, Ilia Chavchavadze ave., №74	Non-commercial entity

* The Bank's investment in the capital of Bus Stop LLC is € 3,518, which is fully impaired, while the Bank's investment in the capital of Public Fund is € 0.

(thousands of Georgian Lari)

2. Basis of preparation

General

These consolidated financial statements have been prepared in accordance with IFRS Accounting Standards.

The consolidated financial statements have been prepared under the historical cost convention except for the portion of the investment securities at FVOCI, derivative financial instruments, investment properties and buildings as disclosed in the accounting policies below.

These consolidated financial statements are presented in thousands of Georgian Lari ("ლ"), except per share amounts and unless otherwise indicated.

3. Summary of material accounting policies

Changes in accounting policies

The Group applied for the first-time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2025. The Group has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

The following amendment to standards was applied for the first time in 2025:

- ▶ *Lack of exchangeability* – Amendments to IAS 21.

This amendment will not have an impact on the Group's consolidated financial statements at 31 December 2025.

Standards issued but not yet effective

The new and amended standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Group's Consolidated Financial Statements are disclosed below. The Group intends to adopt these new and amended standards and interpretations, if applicable, when they become effective.

Amendments to the Classification and Measurement of Financial Instruments-Amendments to IFRS 9 and IFRS 7

On 30 May 2024, the IASB issued Amendments to IFRS 9 and IFRS 7, Amendments to the Classification and Measurement of Financial Instruments (the Amendments). The Amendments include:

- ▶ Clarifications of the requirements for recognition and derecognition of financial assets and liabilities;
- ▶ A clarification that a financial liability is derecognised on the 'settlement date' and introduce an accounting policy choice (if specific conditions are met) to derecognise financial liabilities settled using an electronic payment system before the settlement date;
- ▶ Additional guidance on how the contractual cash flows for financial assets with environmental, social and corporate governance (ESG) and similar features should be assessed;
- ▶ Clarifications on what constitute 'non-recourse features' and what are the characteristics of contractually linked instruments;
- ▶ The introduction of disclosures for financial instruments with contingent features and additional disclosure requirements for equity instruments classified at fair value through other comprehensive income (OCI).

The requirements will be effective for annual reporting periods beginning on or after 1 January 2026.

The Group is in the process of assessing the impact of the new amendments.

Contracts Referencing Nature-dependent Electricity – Amendments to IFRS 9 and IFRS 7

In December 2024, the IASB issued Amendments to IFRS 9 and IFRS 7 – *Contracts Referencing Nature-dependent Electricity*. The amendments apply only to contracts that reference nature-dependent electricity.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Changes in accounting policies (continued)

The amendments:

- ▶ Clarify the application of the 'own-use' requirements for in-scope contracts;
- ▶ Amend the designation requirements for a hedged item in a cash flow hedging relationship for in-scope contracts;
- ▶ Add new disclosure requirements to enable investors to understand the effect of these contracts on a company's financial performance and cash flows.

The amendments will take effect for annual reporting periods starting on or after 1 January 2026. Early adoption is allowed, but it must be disclosed. The amendments concerning the own-use exception are to be applied retrospectively, while the hedge accounting amendments should be applied prospectively to new hedging relationships designated from the initial application date. Additionally, the IFRS 7 disclosure amendments must be implemented alongside the IFRS 9 amendments. If an entity does not restate comparative information, it cannot present comparative disclosures.

The amendments are not expected to have a material impact on the Group's financial statements.

IFRS 18 Presentation and Disclosure in Financial Statements

In April 2024, the IASB issued IFRS 18, which replaces IAS 1 *Presentation of Financial Statements*. IFRS 18 introduces new requirements for presentation within the Income Statement, including specified totals and subtotals. Furthermore, entities are required to classify all income and expenses within the Income Statement into one of five categories: operating, investing, financing, income taxes and discontinued operations, whereof the first three are new.

The standard requires disclosure of newly defined management-defined performance measures, subtotals of income and expenses, and it also includes new requirements for aggregation and disaggregation of financial information based on the identified 'roles' of the primary financial statements and the notes. In addition, narrow-scope amendments have been made to IAS 7 *Statement of Cash Flows*, which include changing the starting point for determining cash flows from operations under the indirect method, from 'profit or loss' to 'operating profit or loss' and removing the optionality around classification of cash flows from dividends and interest. In addition, there are consequential amendments to several other standards.

IFRS 18 will take effect for annual reporting periods starting on or after 1 January 2027. Early adoption is allowed, but it must be disclosed.

The Group is currently working to identify all impacts the amendments will have on the primary financial statements and notes to the financial statements.

Basis of consolidation

Subsidiaries, the entities which are controlled by the Group, are consolidated. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Group controls an investee if, and only if, the Group has:

- ▶ Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee);
- ▶ Exposure, or rights, to variable returns from its involvement with the investee;
- ▶ The ability to use its power over the investee to affect its returns.

Generally, there is a presumption that a majority of voting rights results in control. To support this presumption and when the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- ▶ The contractual arrangement(s) with the other vote holders of the investee;
- ▶ Rights arising from other contractual arrangements;
- ▶ The Group's voting rights and potential voting rights.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Basis of consolidation (continued)

Subsidiaries are consolidated from the date on which control is transferred to the Group and are no longer consolidated from the date that control ceases. All intra-group transactions, balances and unrealised gains on transactions between group companies are eliminated in full; unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Where necessary, accounting policies for subsidiaries have been changed to ensure consistency with the policies adopted by the Group.

A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction. Losses are attributed to the non-controlling interests even if that results in a deficit balance.

If the Group loses control over a subsidiary, it derecognises the assets (including goodwill) and liabilities of the subsidiary, the carrying amount of any non-controlling interests, the cumulative translation differences, recorded in equity; recognises the fair value of the consideration received, the fair value of any investment retained and any surplus or deficit in profit or loss and reclassifies the parent's share of components previously recognised in other comprehensive income to profit or loss.

Fair value measurement

The Group measures financial instruments carried at FVOCI and non-financial assets such as investment property, at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- ▶ In the principal market for the asset or liability; or
- ▶ In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- ▶ Level 1 – quoted (unadjusted) market prices in active markets for identical assets or liabilities;
- ▶ Level 2 – valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;
- ▶ Level 3 – valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Financial assets and liabilities

Initial recognition

Date of recognition

All regular way purchases and sales of financial assets and liabilities are recognised on the trade date i.e. the date that the Group commits to purchase the asset or liabilities. Regular way purchases or sales are purchases or sales of financial assets and liabilities that require delivery of assets and liabilities within the period generally established by regulation or convention in the marketplace.

Performance guarantees

Performance guarantees are contracts that provide compensation if another party fails to perform a contractual obligation. Performance guarantees are in scope of IFRS 9 and effectively are a form of a contingent loan commitment. Provision for Performance guarantees are measured under IFRS 9.

Cash and cash equivalents

Cash and cash equivalents consist of cash on hand, amounts due from the NBG, excluding obligatory reserves, and amounts due from credit institutions that mature within ninety days of the date of origination and are free from contractual encumbrances.

Amounts due from credit institutions

In the normal course of business, the Group maintains advances or deposits for various periods of time with other banks. Amounts due from credit institutions are initially recognised at fair value and are subsequently measured at amortised cost using the effective interest method. Amounts due from credit institutions are carried net of any allowance for impairment losses.

Derivative financial instruments

In the normal course of business, the Group enters into various derivative financial instruments including forwards and swaps in the foreign exchange and capital markets. Such financial instruments are recorded at fair value. The fair values are estimated based on quoted market prices or pricing models that take into account the current market and contractual prices of the underlying instruments and other factors. Derivatives are carried as assets when their fair value is positive and as liabilities when it is negative. Gains and losses resulting from these instruments are included in the consolidated statement of profit or loss as net gains/(losses) from financial instruments at fair value through profit or loss or net gains/(losses) from foreign currencies dealing, depending on the nature of the instrument.

Borrowings

Issued financial instruments or their components are classified as liabilities, where the substance of the contractual arrangement results in the Group having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity instruments. Such instruments include amounts due to credit institutions, amounts due to customers and subordinated debt. After initial recognition, borrowings are subsequently measured at amortised cost using the effective interest method. Gains and losses are recognised in the consolidated statement of profit or loss when the borrowings are derecognised as well as through the amortisation process.

If the Group purchases its own debt, it is removed from the statement of financial position and the difference between the carrying amount of the liability and the consideration paid is recognised in the consolidated statement of profit or loss.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Write-offs

Financial assets are written off when the Bank has no reasonable expectation of recovering the asset in its entirety. If the amount to be written off is greater than the accumulated loss allowance, the difference will be an additional impairment loss. Any subsequent recoveries are credited to credit loss expense.

The following events represent examples of circumstances which could lead to write-off:

- ▶ For collectively assessed risk exposures (CARE) – certain time frames post-default of a financial asset (typically 36 months);
- ▶ For pensions loans - a pensioner's death, which at the same time means debt annulment (no further enforcement is pursued);
- ▶ For individually assessed risk exposures (ISRE) that are secured – decision is made individually. However main indicators include the receipt of the proceeds from the realisation of the collateral, when there is no expectation that any further amounts will be recovered by any other means, as well as expiration of certain time-frame;
- ▶ It is not legally enforceable to recover funds via sale of collateral, or from the borrower or from any third party;
- ▶ It is legally enforceable to recover funds from the borrower or any third party, but there is very low probability of happening so.

Renegotiated loans

Where possible, the Group seeks to restructure loans rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions.

The Group derecognises a financial asset, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognised as a derecognition gain or loss, to the extent that an impairment loss has not already been recorded. The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be POCI. When assessing whether or not to derecognise a loan to a customer, amongst others, the Group considers the following factors:

- ▶ Change in currency of the loan;
- ▶ Change in counterparty;
- ▶ If the modification is such that the instrument would no longer meet the SPPI criterion.

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, the Group records a modification gain or loss, presented within interest revenue calculated using EIR in the consolidated statement of profit or loss, to the extent that an impairment loss has not already been recorded.

According to the Group's policy, only a limited number of products are subject to restructuring. All restructured loans are classified as Stage 2 loans and Lifetime Probability of Default (PD) rates are applied for the purpose of ECL calculation. It is the Group's policy to consider a financial instrument as 'cured' and therefore re-classified out of Stage 2 when at least six consecutive payments are present.

Leases

i. Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Leases (continued)

Lease liabilities

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Significant judgement in determining the lease term of contracts with renewal options

The Group determines the lease term as the non-cancellable term of the lease, together with any periods covered by an option to extend the lease if it is reasonably certain to be exercised, or any periods covered by an option to terminate the lease, if it is reasonably certain not to be exercised.

The Group has the option, under some of its leases to lease the assets for additional terms of three to five years. The Group applies judgement in evaluating whether it is reasonably certain to exercise the option to renew. That is, it considers all relevant factors that create an economic incentive for it to exercise the renewal. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise (or not to exercise) the option to renew (e.g., a change in business strategy).

ii. Operating – Group as a lessor

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Taxation

The current income tax expense is calculated in accordance with the regulations of Georgia. It represents the sum of the current and deferred tax expenses.

Deferred tax assets and liabilities are calculated in respect of temporary differences using the liability method. Deferred income taxes are provided for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes, except where the deferred income tax arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.

A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the reporting date.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Taxation (continued)

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Georgia also has various operating taxes, which are assessed on the Group's activities. These taxes are included as a component of other operating expenses.

Property and equipment

Property and equipment, except for buildings, is carried at cost, excluding the costs of day-to-day servicing, less accumulated depreciation and any accumulated impairment. Such cost includes the cost of replacing part of equipment when that cost is incurred if the recognition criteria are met.

The carrying amounts of property and equipment are reviewed for impairment when events or changes in circumstances indicate that the carrying amount may not be recoverable.

Following initial recognition at cost, buildings are carried at a revalued amount, which is the fair value at the date of the revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Valuations are performed frequently enough to ensure that the fair value of a revalued asset does not differ materially from its carrying amount.

Accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Any revaluation surplus is credited to the revaluation reserve for property and equipment included in other comprehensive income, except to the extent that it reverses a revaluation decrease of the same asset previously recognised in profit or loss, in which case the increase is recognised in profit or loss. A revaluation deficit is recognised in profit or loss, except that a deficit directly offsetting a previous surplus on the same asset is directly offset against the surplus in the revaluation reserve for property and equipment.

An annual transfer from the revaluation reserve for property and equipment to retained earnings is made for the difference between depreciation based on the revalued carrying amount of the assets and depreciation based on the assets original cost. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

Depreciation of an asset begins when it is available for use. Depreciation is calculated on a straight-line basis at the following annual prescribed rates:

Land and buildings	2%–5%
Furniture and fixtures	10%–20%
Computer and office equipment	10%–25%
Motor vehicles	20%–25%
Leasehold improvements	10%–25%

The asset's residual values, useful lives and methods are reviewed, and adjusted as appropriate, at each financial year-end.

Costs related to repairs and renewals are charged when incurred and included in other operating expenses, unless they qualify for capitalisation.

Land is not amortised and carried at fair value. Leasehold improvements are amortised over the life of the related leased assets.

Assets under construction comprise costs directly related to construction of property and equipment including an appropriate allocation of directly attributable variable and fixed overheads that are incurred in construction. Depreciation of these assets, on the same basis as similar property assets, commences when the assets are put into operation.

Compensation from third parties for items of property and equipment that were impaired, lost or given up is included in other income when the compensation becomes receivable.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Intangible assets

Intangible assets include computer software and licenses.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. The useful lives of intangible assets are assessed to be finite. Intangible assets with finite lives are amortised over the useful economic lives of 1 to 10 years and assessed for impairment whenever there is an indication that the intangible asset may be impaired.

Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Research and development costs

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Group can demonstrate:

- ▶ The technical feasibility of completing the intangible asset so that the asset will be available for use or sale;
- ▶ Its intention to complete and its ability and intention to use or sell the asset;
- ▶ How the asset will generate future economic benefits;
- ▶ The availability of resources to complete the asset;
- ▶ The ability to measure reliably the expenditure during development.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete, and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation is recorded in general and administrative expenses.

Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of obligation can be made.

Share capital

Share capital and additional paid in capital

Ordinary and preferred shares are classified as equity. External costs directly attributable to the issue of new shares, other than on a business combination, are shown as a deduction from the proceeds in equity. Any excess of the fair value of consideration received over the par value of shares issued is recognised as additional paid-in capital.

Treasury shares

Where the Bank purchases the Bank's shares, the consideration paid, including any attributable transaction costs, net of income taxes, is deducted from total equity as treasury shares until they are cancelled or reissued. Where such shares are subsequently sold or reissued, any consideration received is included in equity. Treasury shares are stated at the weighted average cost.

Dividends

Dividends are recognised as a liability and deducted from equity at the reporting date only if they are declared before or on the reporting date. Dividends are disclosed when they are proposed before the reporting date or proposed or declared after the reporting date but before the financial statements are authorised for issue.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Contingencies

Contingent liabilities are not recognised in the consolidated statement of financial position but are disclosed unless the possibility of any outflow in settlement is remote. A contingent asset is not recognised in the consolidated statement of financial position but disclosed when an inflow of economic benefits is probable.

Recognition of income and expenses

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Group and the revenue can be reliably measured. The following specific recognition criteria must also be met before revenue is recognised:

Interest and similar revenue and expense

The Group calculates interest revenue on debt financial assets measured at amortized cost or at FVOCI by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets. EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation takes into account all contractual terms of the financial instrument (for example, prepayment options) and includes any fees or incremental costs that are directly attributable to the instrument and are an integral part of the effective interest rate, but not future credit losses. The carrying amount of the financial asset or financial liability is adjusted if the Group revises its estimates of payments or receipts. The adjusted carrying amount is calculated based on the original effective interest rate and the change in carrying amount is recorded as interest revenue or expense.

When a financial asset becomes credit-impaired, the Group calculates interest revenue by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets cures and is no longer credit-impaired, the Group reverts to calculating interest revenue on a gross basis.

Interest revenue on all financial assets at FVPL is recognised using the contractual interest rate in "Other interest revenue" in the consolidated statement of profit or loss.

Fee and commission income

The Group earns fee and commission income from a diverse range of services it provides to its customers. Fee income can be divided into the following categories:

Fee income earned from services that are provided over a certain period of time

Fees earned for the provision of services over a period of time are accrued over that period as respective performance obligations are satisfied. Loan commitment fees for loans that are likely to be drawn down and other credit related fees are deferred (together with any incremental costs) and recognised as an adjustment to the effective interest rate on the loan.

Fee income earned at a point in time

Fees arising from settlement, remittances, bill payments and cash operations are recognized upon completion of underlying transactions. Each operation is treated as a separate performance obligation.

Fee income from providing transaction services

Fees arising from negotiating or participating in the negotiation of a transaction for a third party – such as the where the Group's performance obligation is the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses – are recognised on completion of the underlying transaction. Fees or components of fees that are linked to certain performance obligations are recognised after fulfilling the corresponding criteria. When the contract provides for a variable consideration, fee and commission income is only recognized to the extent that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur until the uncertainty associated with the variable consideration is subsequently resolved.

(thousands of Georgian Lari)

3. Summary of material accounting policies (continued)

Foreign currency translation

The consolidated financial statements are presented in Georgian Lari, which is the Bank's and subsidiaries' functional and presentation currency. Transactions in foreign currencies are initially recorded in the functional currency, converted at the rate of exchange ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the reporting date. Gains and losses resulting from the translation of foreign currency operations are recognised in the consolidated statement of profit or loss as gains less losses from foreign currencies – translation differences. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Differences between the contractual exchange rate of a transaction in a foreign currency and the NBG exchange rate on the date of the transaction are included in gains less losses from dealing in foreign currencies.

The exchange rates used by the Group in the preparation of the consolidated financial statements as of 31 December 2025 and 31 December 2024 are as follows:

	<u>2025</u>	<u>2024</u>
₾ / 1 US Dollar	2.6951	2.8068
₾ / 1 Euro	3.1737	2.9306

4. Significant accounting judgments and estimates

The preparation of the Group's consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities at the balance sheet date and the reported amount of income and expenses during the year ended. Management evaluates its estimates and judgments on an ongoing basis. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. The following estimates and judgments are considered important to the Group's financial condition.

Impairment losses on financial assets

The measurement of impairment losses under IFRS 9 across all categories of financial assets requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances. The Group's Expected Credit Loss (ECL) calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgements and estimates include:

- ▶ The Group's internal credit grading model, which assigns PDs to the individual grades;
- ▶ The Group's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a Life-time Expected Credit Loss (LTECL) basis and the qualitative assessment;
- ▶ The segmentation of financial assets when their ECL is assessed on a collective basis;
- ▶ Development of ECL models, including the various formulae and the choice of inputs;
- ▶ Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs;
- ▶ Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

(thousands of Georgian Lari)

4. Significant accounting judgments and estimates (continued)

Impairment losses on financial assets (continued)

The Group regularly reviews its loan book portfolio to assess borrower's ability to pay, conducts tests for impairment and uses its experienced judgment to estimate the amount of any impairment loss in cases where a borrower is in financial difficulties and there are few available sources of historical data relating to similar borrowers. Similarly, the Group estimates changes in future cash flows based on the observable data indicating that there has been an adverse change in the payment status of borrowers. Management uses probability estimates based on historical borrower experience including default familiarities and loss given defaults. The Group uses its experienced judgment to adjust observable data for a group of homogenous loans to reflect current circumstances and forward-looking macroeconomic variables (details of ECL recognised on loans to customers as at 31 December 2025 are disclosed in *Note 8*).

Measurement of fair value of investment properties and buildings

Investment properties and buildings are stated at fair value. The fair value represents the amount at which the assets could be exchanged between a knowledgeable, willing buyer and a knowledgeable, willing seller in an arm's length transaction at the date of valuation, in accordance with International Valuation Standards Committee standards.

Buildings of the Group are subject to revaluation on a regular basis. The date of latest revaluation, performed by independent professionally qualified appraisers, was 31 December 2024 (*Note 10*). The management determined, exercising significant judgment, that no material change in market values of buildings occurred over 2025 and that as at 31 December 2025, carrying values of the buildings approximate their fair value.

As at 31 December 2025, fair value of investment properties were determined by independent professionally qualified appraisers (*Note 27*). Fair value was determined by applying market and income approaches for different properties, supported by external evidence such as current market prices and rents for similar properties in a comparable location and condition.

The estimates described above are subject to change as new transaction data and market evidence become available.

5. Segment information

For management purposes, the Group is organized into the following operating segments based on products and services:

Retail Banking (Retail) – provides consumer loans, mortgage loans, overdrafts, credit cards and other credit facilities, funds transfers and settlement services, and handling of customers' deposits for individual customers.

Micro, Small and Medium Banking (MSME) – provides loans and other credit facilities, funds transfers and settlement services, and handling of customers' deposits for micro, small and medium-sized enterprises.

Corporate Investment Banking (Corporate) – provides loans and other credit facilities, funds transfers and settlement services, trade finance services and handling of customers' deposits for corporate and institutional customers.

Management monitors the operating results of its segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is measured based on a separate statement of profit or loss prepared for management purposes. Transfer prices between operating segments are based on the Group's internal pricing framework.

(thousands of Georgian Lari)

5. Segment information (continued)

The Group's operations are concentrated in Georgia.

No revenue from transactions with a single external customer or counterparty amounted to 10% or more of the Bank's operating income during the reporting period.

The following table presents the income statement information regarding the Group's operating segments as at and for the year ended 31 December 2025:

	Retail Banking	MSME	Corporate Investment Banking	<i>Total</i>
Interest income	284,502	365,067	73,097	722,666
Interest expense	(186,185)	(102,674)	(55,829)	(344,688)
Inter-segment interest income/(expense)	66,248	(80,371)	14,123	–
Net interest income	164,565	182,022	31,391	377,978
Credit loss expense	(18,678)	(11,347)	(5,058)	(35,083)
Net interest income after loan impairment charges	145,887	170,675	26,333	342,895
Fee and commission income	49,432	6,914	7,129	63,475
Fee and commission expense	(29,051)	(2,488)	(2,786)	(34,325)
Net fee and commission income	20,381	4,426	4,343	29,150
Net gains/(losses) from foreign currencies	12,365	2,546	6,367	21,278
Other income	16,905	517	–	17,422
Non-interest income	49,651	7,489	10,710	67,850

Other non-interest expense	(138,683)	(78,982)	(8,333)	(225,998)
Non-interest expense	(167,590)	(87,275)	(9,090)	(263,955)
Profit/(loss) before income tax expense	27,948	90,889	27,953	146,790
Income tax expense	(3,554)	(11,597)	(3,573)	(18,724)
Profit/(loss) for the year	24,394	79,292	24,380	128,066

(thousands of Georgian Lari)

5. Segment information (continued)

The following table presents the income statement information regarding the Group's operating segments as at and for the year ended 31 December 2024:

	Retail Banking	MSME	Corporate Investment Banking	Total
Interest income	238,029	322,097	54,678	614,804
Interest expense	(159,779)	(78,475)	(42,978)	(281,232)
Inter-segment interest income/(expense)	68,771	(81,271)	12,500	–
Net interest income	147,021	162,351	24,200	333,572
Credit loss expense	(15,729)	(14,157)	(1,573)	(31,459)
Net interest income after loan impairment charges	131,292	148,194	22,627	302,113
Fee and commission income	43,399	6,129	4,924	54,452
Fee and commission expense	(24,318)	(2,779)	(2,403)	(29,500)
Net fee and commission income	19,081	3,350	2,521	24,952
Net gains/(losses) from foreign currencies:	12,871	3,230	6,358	22,459
Other income	16,464	–	–	16,464
Non-interest income	48,416	6,580	8,879	63,875
Depreciation and amortization	(28,411)	(8,185)	(727)	(37,323)
Other non-interest expense	(128,532)	(74,010)	(7,111)	(209,653)
Non-interest income	(156,943)	(82,195)	(7,838)	(246,976)
Profit/(loss) before income tax expense	22,765	72,579	23,668	119,012
Income tax expense	(3,112)	(9,461)	(3,082)	(15,655)
Profit/(loss) for the year	19,653	63,118	20,586	103,357

6. Cash and cash equivalents

Cash and cash equivalents comprise:

	2025	2024
Cash on hand	383,984	316,373
Current accounts with the NBG	16,376	5,932
Current accounts with other credit institutions	14,826	69,213
Time deposits with credit institutions up to 90 days	90,120	49,815
	505,306	441,333
Less – allowance for impairment	(200)	(4)
Cash and cash equivalents	505,106	441,329

As of 31 December 2025, ₾ 4,463 (31 December 2024: ₾ 4,566) was placed on current accounts with internationally recognised OECD banks that are the counterparties of the Group in performing international settlements.

(thousands of Georgian Lari)

6. Cash and cash equivalents (continued)

Credit rating of current accounts with other credit institutions is as follows:

	<i>2025</i>	<i>2024</i>
AA-	492	–
A+	826	2,379
A	3,624	1,426
BB	7,695	61,705
BB-	26	440
B+	1,271	–
B	27	2,072
B-	–	2
Not rated	865	1,189
Total	<u>14,826</u>	<u>69,213</u>

Credit rating of time deposits with credit institutions up to 90 days is as follows:

	<i>2025</i>	<i>2024</i>
AA-	24,480	–
A	65,640	–
BB-	–	49,815
Total	<u>90,120</u>	<u>49,815</u>

The tables contain ratings of Fitch Ratings and S&P Global international agencies. All balances of cash equivalents are allocated to Stage 1.

7. Amounts due from credit institutions

Amounts due from credit institutions comprise:

	<i>2025</i>	<i>2024</i>
Obligatory reserve with the NBG	116,522	105,124
Time deposits for more than 90 days	802	805
	<u>117,324</u>	<u>105,929</u>
Less – allowance for impairment	(35)	(210)
Amounts due from credit institutions	<u>117,289</u>	<u>105,719</u>

Credit institutions are required to maintain an interest-earning cash deposit (obligatory reserve) with the NBG, the amount of which depends on the level of funds attracted by the credit institution. The Group's ability to withdraw these deposits is restricted by the NBG regulations. The Group is required to maintain a mandatory interest earning deposit with the NBG at the level of 5% to 25% (2024: 5% to 25%) of the average of funds attracted from customers and non-resident credit institutions for the appropriate two-week period in ₾ and foreign currencies.

An analysis of changes in the gross carrying value and corresponding ECL in relation to amount due from credit institutions during the year ended 31 December 2025 and 31 December 2024 is as follows:

	<i>Gross carrying value</i>	<i>ECL</i>
As at 1 January 2025	105,929	(210)
New assets originated	32,393	(9)
Assets repaid	(19,979)	40
Foreign exchange and other movements	(1,019)	144
At 31 December 2025	<u>117,324</u>	<u>(35)</u>

(thousands of Georgian Lari)

7. Amounts due from credit institutions (continued)

	<i>Gross carrying value</i>	<i>ECL</i>
As at 1 January 2024	99,917	(194)
New assets originated	42,088	(2)
Assets repaid	(38,805)	75
Foreign exchange and other movements	2,729	(89)
At 31 December 2024	<u>105,929</u>	<u>(210)</u>

All balances of amounts due from credit institutions are allocated to Stage 1.

8. Loans to customers

Loans to customers comprise:

	<i>2025</i>	<i>2024</i>
Commercial loans	1,561,071	1,481,064
Consumer loans	1,332,441	1,112,420
Micro loans	711,360	618,226
Residential mortgage loans	570,547	341,063
Gold pawn loans	158,531	135,134
Gross loans to customers at amortised cost	<u>4,333,950</u>	<u>3,687,907</u>
Less – allowance for impairment	(141,265)	(140,127)
Loans to customers at amortised cost	<u>4,192,685</u>	<u>3,547,780</u>

As of 31 December 2025, ₾ 689,522 (₾ 534,387 as of 31 December 2024) worth of customer loans were pledged as a collateral for the loan from the National Bank of Georgia (Note 16).

Expected credit loss of loans to customers at amortised cost

Movements of the gross loans and respective allowance for expected credit loss/impairment of loans to customers by class are provided in the tables below, within which the new financial asset originated or purchased and the assets repaid during the year include the effects from revolving loans and increase of exposure to clients, where existing loans have been repaid with new contracts issued during the year. All new financial assets are originated either in Stage 1 or POCI category.

An analysis of changes in the gross carrying value and corresponding ECL in relation to commercial loans during the year ended 31 December 2025 and 31 December 2024 is as follows:

<i>Commercial loans</i>	<i>Stage 1</i>	<i>Stage 2</i>	<i>Stage 3</i>	<i>POCI</i>	<i>Total</i>
Gross carrying value as at 1 January 2025	1,309,858	138,890	29,513	2,803	1,481,064

Collateral

In absence of collateral or other credit enhancements, ECL in respect of individually assessed non-performing loans to customers as of 31 December 2025 would have been higher by ₾ 9,136 (as of 31 December 2024: ₾ 1,102). In case of collectively assessed financial instruments value of collateral (if any) does not affect ECL estimation.

Written-off portfolio

The contractual amount outstanding on financial assets that were written off during the reporting period and are still subject to enforcement activity is ₾ 26,980 (2024: ₾ 21,032).

Concentration of loans to customers

As of 31 December 2025, the concentration of loans granted by the Group to ten largest third party borrowers comprised ₾ 257,317 accounting 5.94% of the gross loan portfolio of the Group (2024: ₾ 297,031 and 8.05% respectively).

An allowance of ₾ 4,233 (2024: ₾ 1,539) was established against these loans.

Loans have been extended to the following types of customers:

	<i>2025</i>	<i>2024</i>
Individuals	3,215,878	2,542,829
Private companies	1,118,072	1,145,078
Loans to customers, gross	4,333,950	3,687,907
Less – allowance for loan impairment	(141,265)	(140,127)
Loans to customers, net	<u>4,192,685</u>	<u>3,547,780</u>

(thousands of Georgian Lari)

8. Loans to customers (continued)

Concentration of loans to customers (continued)

Loans are made principally within Georgia in the following industry sectors:

	<i>2025</i>	<i>2024</i>
Individuals	3,215,878	2,542,829
Trade and service	658,483	674,423

The Group owns property in Zugdidi, part of which was previously classified as investment property. By the end of 2025, the Group began using a portion of this investment property for its own purposes. Accordingly, as at 31 December 2025, the property was revalued and portion of it was reclassified as property and equipment.

Buildings and land of the Group are subject to revaluation on a regular basis. The date of the latest revaluation performed by independent professionally qualified appraisers, was 31 December 2024. As a result of revaluation of land and buildings, the carrying value increased by ₾ 11,451. Net revaluation gain of ₾ 9,886 (revaluation gain of ₾ 12,358 less income tax expense of ₾ 2,472) was recognised in other comprehensive income and revaluation loss of ₾ 907, for previously impaired buildings, was recognized in the statement of profit or loss for 2024 within other operating expenses (*Note 25*).

The Group's buildings are classified to Level 3 of the fair value hierarchy. There were no transfers among the levels of the fair value hierarchy in 2025 and 2024.

If the land and buildings were measured using the cost model, the carrying amounts would be as follows:

	<i>2025</i>	<i>2024</i>
Cost	80,682	76,279
Accumulated depreciation and impairment	<u>(19,989)</u>	<u>(18,375)</u>
Net carrying amount	<u>60,693</u>	<u>57,904</u>

(thousands of Georgian Lari)

11. Intangible assets

The movements in intangible assets, which comprised computer software and licenses, were as follows:

	<i>Internally developed software</i>	<i>Computer software and licenses</i>	<i>Total</i>
Cost			
31 December 2023	41,046	101,329	142,375
Additions	17,980	5,047	23,027
31 December 2024	59,026	106,376	165,402
Additions	24,652	2,723	27,375
31 December 2025	83,678	109,099	192,777
Accumulated amortisation			
31 December 2023	6,897	74,072	80,969
Amortisation charge	4,164	8,317	12,481
31 December 2024	11,061	82,389	93,450
Amortisation charge	5,952	5,948	11,900
31 December 2025	17,013	88,337	105,350
Net book value			
31 December 2023	34,149	27,257	61,406
31 December 2024	47,965	23,987	71,952
31 December 2025	66,665	20,762	87,427

12. Leases

	<i>2025</i>	<i>2024</i>
Right-of-use-assets – building	40,451	38,255
Lease liabilities	41,428	39,886

Administrative expenses include occupancy and rent expenses on lease contracts where the recognition exemptions have been applied:

	<i>2025</i>	<i>2024</i>
Short-term leases	(2,414)	(1,646)

During the period the movements of the Group's right-of-use assets and lease liabilities are set out below:

	<i>Right-of-use assets –buildings</i>	<i>Lease liabilities</i>
As at 1 January 2025	38,255	39,886
Additions	12,563	12,563
Depreciation expense	(8,498)	–
Interest expense	–	1,693
Payments	–	(9,459)
Disposal	(6,401)	(1,949)
Depreciation of disposal	4,532	–
Foreign exchange	–	(1,306)
As at 31 December 2025	40,451	41,428

(thousands of Georgian Lari)

12. Leases (continued)

	<i>Right-of-use assets – buildings</i>	<i>Lease liabilities</i>
As at 1 January 2024	30,724	30,114
Additions	19,328	19,326
Depreciation expense	(7,985)	–
Interest expense	–	1,432
Payments	–	(8,620)
Disposal	(7,654)	(3,748)
Depreciation of disposal	3,842	–
Foreign exchange	–	1,382
As at 31 December 2024	<u>38,255</u>	<u>39,886</u>

13. Taxation

The corporate income tax expense comprised:

	<i>2025</i>	<i>2024</i>
Current year tax charge	18,451	17,857
Adjustment in respect of current income tax of prior years	(36)	–
Deferred tax charge – origination and reversal of temporary differences	309	(2,202)
Income tax expense	<u>18,724</u>	<u>15,655</u>
Deferred tax charge effect on OCI	–	2,472
Income tax charge on total comprehensive income	<u>18,724</u>	<u>18,127</u>

A reconciliation of the income tax expense based on statutory rates with actual is as follows:

	<i>2025</i>	<i>2024</i>
Profit before income tax expense	146,790	119,012
Statutory tax rate	20%	20%
Theoretical income tax expense at the statutory rate	<u>29,358</u>	<u>23,802</u>
Non-taxable income	(11,111)	(9,099)
Effect from changes in future tax rates and other movements	(7)	(108)
Non-tax deductible expenses	484	1,060
Income tax expense	<u>18,724</u>	<u>15,655</u>

(thousands of Georgian Lari)

13. Taxation (continued)

Deferred tax assets and liabilities as of 31 December and their movements for the respective years comprise:

	<i>2023</i>	<i>In the statement of profit or loss</i>	<i>In the statement of other comprehen- sive income</i>	<i>2024</i>	<i>In the statement of profit or loss</i>	<i>2025</i>
Tax effect of deductible temporary differences						
Other assets	1,795	532	–	2,327	(53)	2,274
Lease liabilities	6,023	1,954	–	7,977	309	8,286
Other liabilities	2,490	1,215	–	3,705	129	3,834
Deferred tax asset	<u>10,308</u>	<u>3,701</u>	<u>–</u>	<u>14,009</u>	<u>385</u>	<u>14,394</u>
Tax effect of taxable temporary differences						
Loans to customers	(8)	95	–	87	(87)	-
Right of use assets	(6,145)	(1,506)	–	(7,651)	(439)	(8,090)
Property and equipment, and intangible assets	(21,375)	(88)	(2,472)	(23,935)	(168)	(24,103)
Deferred tax liabilities	<u>(27,528)</u>	<u>(1,499)</u>	<u>(2,472)</u>	<u>(31,499)</u>	<u>(694)</u>	<u>(32,193)</u>
Net deferred tax assets/ (liabilities)	<u>(17,220)</u>	<u>2,202</u>	<u>(2,472)</u>	<u>(17,490)</u>	<u>(309)</u>	<u>(17,799)</u>

14. Other assets, prepayments and other liabilities

Other assets comprise

	<i>2025</i>	<i>2024</i>
Funds in settlement	27,285	15,824
Repossessed property	8,540	4,662
Inventories	4,989	5,461
Prepaid taxes other than income tax	3,118	3,012
Receivables from Revenue Services for tax free services to non-resident customers	2,313	2,206
Investment properties	1,100	2,446
Receivables from remittances systems operators	1,023	1,768
Receivable from insurance claims	162	71
Other	2,460	2,740
Total	<u>50,990</u>	<u>38,190</u>
Less – allowance for impairment of other assets	<u>(6,690)</u>	<u>(7,598)</u>
Other assets	<u>44,300</u>	<u>30,592</u>

Investment properties

Investment properties are stated at fair value. The fair value represents the price that would have been received if an asset was sold in an orderly transaction between market participants at the measurement date. The latest revaluation date was 31 December 2025. The valuation was performed by an accredited independent valuator with a recognised and relevant professional qualification and with recent experience in the locations and categories of the investment properties being valued. The valuation models in accordance with those recommended by the International Valuation Standards Committee have been applied and are consistent with the principles in IFRS 13. Refer to *Note 27* for details.

Part of investment property was reclassified as property and equipment (*Note 10*) at 31 December 2025.

The Group's investment properties items are classified to Level 3 of the fair value hierarchy. There were no transfers among the levels of the fair value hierarchy in 2025 and 2024.

(thousands of Georgian Lari)

14. Other assets, prepayments and other liabilities (continued)

Other assets comprise (continued)

Derivative financial instruments

The table below shows the fair values of derivative financial instruments, recorded as assets or liabilities, together with their notional amounts. The notional amount, recorded gross, is the amount of a derivative's underlying asset, reference rate or index and is the basis upon which changes in the value of derivatives are measured. The notional amounts indicate the volume of transactions outstanding at the year end and are not indicative of the credit risk.

	2025				2024			
	Notional amount		Fair Value		Notional amount		Fair Value	
	Asset	Liability	Asset	Liability	Asset	Liability	Asset	Liability
Foreign exchange contracts								
Forwards and swaps – domestic	144,434	(144,568)	16	(271)	77,066	(76,741)	102	(443)
Forwards and swaps – foreign	5,871	(6,895)	–	(16)	2,051	(2,136)	–	(6)
Total derivative assets/liabilities	<u>150,305</u>	<u>(151,463)</u>	<u>16</u>	<u>(287)</u>	<u>79,117</u>	<u>(78,877)</u>	<u>102</u>	<u>(449)</u>

As of 31 December 2025, the Group has positions in the derivative financial instrument currency swaps. Swap contracts are derivative agreements under which two parties exchange cash flows or financial instruments over a specified period, typically involving the exchange of principal and/or interest payments in different currencies. Swaps are customized contracts transacted in the over-the-counter market.

The Group's swaps are classified to Level 2 of the fair value hierarchy. There were no transfers among the levels of the fair value hierarchy in 2025 and 2024.

Prepayments comprise

	2025	2024
Prepayments for property and equipment and intangible assets	6,872	6,929
Prepayments for software support, advertising and other services	1,222	652
Prepaid insurance	1,173	782
Prepayments for professional services	280	561
Prepaid rent	113	66
Other	703	682
Total prepayments	<u>10,363</u>	<u>9,672</u>

Other liabilities comprise

	2025	2024
Bonus accrual	15,623	15,327
Payables for creditors	14,675	13,198
Provisions for issued guarantees and letters of credit (Note 20)	2,203	390
Taxes payable other than income tax	1,995	1,697
Funds pending settlements	1,542	829
Sundry creditors	1,538	1,418
Provisions for loan commitments (Note 20)	1,245	1,331
Derivative liability (see above)	287	449
Other	409	1,743
Other liabilities	<u>39,517</u>	<u>36,382</u>

(thousands of Georgian Lari)

15. Credit loss expense and other impairment and provisions

The table below shows the ECL charges on financial instruments recorded in the consolidated statement of profit or loss for the year ended 31 December 2025:

<i>31 December 2025</i>	<i>Note</i>	<i>Stage 1</i>	<i>Stage 2</i>	<i>Stage 3</i>	<i>POCI</i>	<i>Total</i>
Cash and cash equivalents	6	196	–	–	–	196

The movements in other impairment allowances and provisions were as follows:

	<i>Other assets</i>	<i>Total</i>
31 December 2024	7,597	7,597
Charge	1,243	1,243
Reversal	(70)	(70)
Amount written off	(1,403)	(1,403)
Recovery of written off debt	45	45
Repayment of written off debt	(45)	(45)
31 December 2025	<u>7,367</u>	<u>7,367</u>
	<i>Other assets</i>	<i>Total</i>
31 December 2023	5,645	5,645
Charge	3,565	3,565
Reversal	(70)	(70)
Amount written off	(1,543)	(1,543)
Recovery of written off debt	19	19
Repayment of written off debt	(19)	(19)
31 December 2024	<u>7,597</u>	<u>7,597</u>

The Group is exposed to the risk of loss from its operations associated with misappropriation of assets. Management has a system of controls and monitoring to detect such activities, to reduce the risk of loss. Despite such controls, losses may still occur due to circumvention of controls by means of collusion and/or other planned actions by perpetrators. For such cases, the Group holds active insurance policies. As at 31 December 2025 the Group holds insurance policies with a risk coverage of ₾ 5 million for losses from operating risks (31 December 2024: ₾ 5 million).

(thousands of Georgian Lari)

16. Amounts due to credit institutions

Amounts due to credit institutions comprise:

	<u>2025</u>	<u>2024</u>
Borrowings from the NBG	880,860	751,308
Loans from local commercial banks	–	45,707
Time deposits of local commercial banks	38,079	7,761
Borrowings from international financial institutions	27,824	44,400
Current accounts	13,251	6,803
Amounts due to credit institutions	<u>960,014</u>	<u>855,979</u>

On 31 December 2025 the Group obtained a loan from the NBG in amount of ₾ 580,000 maturing on 08 January 2026; and on 18 December 2025 the Group obtained a loan from the NBG in amount of ₾ 300,000 maturing on 15 January 2026. The loans are issued under a collateral of investment securities (₾ 348,693 ref. to *Note 9*) and customer loans (₾ 689,522 ref. to *Note 8*).

Included in time deposits from local commercial banks as at 31 December 2025 are new term deposits of GEL 31,300 opened in 2025, bearing 8% annual interest rate, that matured in January 2026.

17. Amounts due to customers

Amounts due to customers comprise:

	<u>2025</u>	<u>2024</u>
Current accounts	1,660,203	1,390,875
Time deposits (including certificates of deposits)	2,433,737	1,836,571
Amounts due to customers	<u>4,093,940</u>	<u>3,227,446</u>
Held as security against guarantees issued (<i>Note 20</i>)	8,449	10,528

At 31 December 2025, amounts due to customers of ₾ 1,078,199 (26.3%) were due to the ten largest customers (31 December 2024: ₾ 644,408 (20.0%)).

Amounts due to customers by economic sector are as follows:

	<u>2025</u>	<u>2024</u>
Individuals	2,092,812	1,865,808
State and public sector	1,315,334	776,869
Non-banking financial organisations	340,112	182,500

Mining	967	1,318
Other	88,703	116,415
Amounts due to customers	<u>4,093,940</u>	<u>3,227,446</u>

(thousands of Georgian Lari)

18. Subordinated debt

Subordinated debt comprises:

	<i>2025</i>	<i>2024</i>
Subordinated loans	136,920	123,292
Subordinated, perpetual, additional tier 1 capital bonds	10,871	983
Subordinated bonds	10,007	5,628
Subordinated debt	<u>157,798</u>	<u>129,903</u>

Subordinated loans

The Group issues unsecured Subordinated Loan Contracts (the "SLCs") to high-net-worth individuals and corporate clients. The Group does not have subordinated liabilities to entities, that exceed 10% of total subordinated debt. The primary reason for the issuance of the SLCs is to attract Tier 2 qualified capital to support the Group's capitalization.

As of 31 December 2025, the Group had ₾ 136,920 (31 December 2024: ₾ 123,292) of subordinated loans outstanding, of which the amortised value qualified for the inclusion in the Tier 2 capital under the NBG Basel III requirements, was ₾ 119,238 (31 December 2024: ₾ 97,922).

Subordinated bonds

Bonds are direct, unsecured, subordinated obligation of the Group with pari passu ranking, without having any seniority among each other. Bond interest rate is determined based on its Nominal Value and amounts to annual 11.0%. Bonds will be redeemed, including the principal and accrued but unpaid interest (if any) on 9 September 2031. These bonds are denominated in USD.

Subordinated, perpetual, additional tier 1 capital bonds

Bonds are direct, unsecured, subordinated, perpetual additional tier 1 capital obligation of the Group with pari passu ranking, without having any seniority among each other. Interest rate on bonds is determined based on the nominal value of bonds and shall amount to annual 13.50% for the first 5 years. Interest rate will be reset on 60 months anniversary of the bond issuance date and on every fifth-year anniversary thereof. Bonds are perpetual debt securities and do not have a predetermined repayment date. The bonds can be redeemed by the Bank after 5 years, from issuance date. These bonds are denominated in USD.

	<i>Subordinated loan</i>	<i>Subordinated bonds</i>	<i>Subordinated, perpetual, Additional tier 1 capital bonds</i>

(thousands of Georgian Lari)

19. Equity

Share capital

As of 31 December 2025, share capital of the Bank comprised of 4,489,682,955 ordinary shares (2024: 4,489,682,955). The Bank had issued 4,489,682,955 ordinary shares (2024: 4,489,682,955) out of which 4,449,046,175 were fully paid (2024: 4,449,046,175), 40,636,780 shares are intended only for preferred shares conversion purposes (in case of such a need) and thus their transfer to a third party in any form is not allowed. Each share has nominal value of GEL 0.01.

According to the legislation concerning the transfer of public securities from the independent Registrar to the Central Depository of Securities of Georgia, and considering that securities in the Central Depository can only be held through an account keeper, the shares of minority shareholders without account keepers were placed into the general technical account of the Central Depository, thereby restricting their ownership rights (including voting rights and dividend rights). Accordingly, as the shares in the technical account are not counted in the voting rights calculation, the voting influence of other shareholders has been proportionally increased.

The share capital of the Bank was contributed by the shareholders in ₾ and they are entitled to dividends and any capital distribution in ₾.

As of 31 December 2025, and 2024, the book value per ordinary share comprised ₾ 0.1551 and ₾ 0.1263, respectively.

Convertible preferred shares

The convertible preferred shares are perpetual and can be converted, at the holder's discretion, into ordinary shares of the Bank at the conversion price based on 1.05 times the equity book value of the Bank per ordinary share outstanding (net of any treasury shares) as of the end of the preceding calendar year.

The dividend rate on the convertible preferred shares is 17% per annum, payable annually, subject to the AGM approval in each given year. The dividends are non-cumulative.

The ability to pay dividends is subject to the Bank's financial condition and results of operations and compliance with the prudential capital adequacy requirements and may be restricted by the NBG.

Basic/diluted earnings per share

The Group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Bank by the weighted average number of ordinary shares outstanding during the period (net of any treasury shares). Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding of the effect of all dilutive potential ordinary shares (but ignoring any treasury shares), which comprise convertible preferred shares.

In 2025, net income attributable to ordinary shareholders of the Bank comprised ₾ 127,292 (2024: ₾ 102,583) and the weighted average number of ordinary shares outstanding during the year was 4,449,046,175 (2024: 4,449,046,175), resulting in earnings per share of ₾ 0.029 for 2025 (2024: ₾ 0.023).

At 31 December 2025, the convertible preferred shares did not have a dilutive effect as the conversion price of ₾ 0.15 exceeded the quoted weighted average market price for the period of ₾ 0.06. At 31 December 2024, the convertible preferred shares did not have a dilutive effect as the conversion price of ₾ 0.13 exceeded the quoted weighted average market price for the period ₾ 0.025. Thus, the potential dilution did not include the potential effect from the conversion of 4,565,384 convertible preferred shares into ordinary shares as of 31 December 2025.

Dividends

The Bank did not pay dividends on its ordinary shares in 2025 or 2024. The Bank paid dividends on the convertible preferred shares in the amount of ₾ 774 in 2025 (2024: ₾774), ₾ 0.17 per share.

(thousands of Georgian Lari)

19. Equity (continued)

Nature and purpose of other reserves

Fair value reserve for investment securities at FVOCI

This reserve records fair value and ECL changes on investment securities.

Revaluation reserve for property and equipment

The revaluation reserve for property and equipment is used to record increases in the fair value of the buildings and decreases to the extent that such decrease relates to an increase on the same asset previously recognised in equity. There was ₾ 848 net decrease in revaluation reserve in 2025, related to sale of buildings and transfer of depreciation portion to retained earnings.

20. Commitments and contingencies

Operating environment

As an emerging market, Georgia does not possess a well-developed business and regulatory infrastructure that would generally exist in a more mature market economy. Operations in Georgia may involve risks that are not typically associated with those in developed markets (including the risk that the Georgian Lari is not freely convertible outside the country, and undeveloped debt and equity markets). However, over the last few years the Georgian government has made a number of developments that positively affect the overall investment climate of the country, specifically implementing the reforms necessary to create banking, judicial, taxation and regulatory systems. This includes the adoption of a new body of legislation (including new Tax Code and procedural laws). In the view of the Supervisory Board, these steps contribute to mitigate the risks of doing business in Georgia.

The existing tendency aimed at the overall improvement of the business environment is expected to persist. The future stability of the Georgian economy is largely dependent upon these reforms and developments and the effectiveness of economic, financial and monetary measures undertaken by the Government. However, the Georgian economy is vulnerable to market downturns and economic slowdowns elsewhere in the world.

Legal

In the ordinary course of business, the Group is subject to legal actions and complaints. Management believes that the ultimate liability, if any, arising from such actions or complaints will not have a material adverse effect on the financial condition or the results of future operations of the Group.

Financial commitments and contingencies

The Group's commitments and contingencies comprised the following:

	<u>2025</u>	<u>2024</u>
Credit related commitments		
Guarantees	144,668	86,097
Undrawn loan commitments	318,275	326,961
Letters of credit	892	-
	<u>463,835</u>	<u>413,058</u>
Capital expenditure commitments	523	2,728
Commitments and contingencies	<u>464,358</u>	<u>415,786</u>
Provisions for ECL for credit related commitments <i>(Note 14)</i>	1,245	1,331
Provisions for ECL for guarantees and letters of credit <i>(Note 14)</i>	2,203	390
Cash held as security against guarantees issued <i>(Note 17)</i>	8,449	10,528

As at 31 December 2025, and 2024, the Bank had Bankers Blanket Bond insurance, Directors and Officers liability insurance, and Property and Vehicle insurance coverage for the operating losses with the insurance limit of ₾ 5 million.

(thousands of Georgian Lari)

21. Net fee and commission income

Net fee and commission income comprise:

	<u>2025</u>	<u>2024</u>
Plastic card operations	39,942	33,866
Settlements operations	12,954	11,200
Cash operations	2,839	2,988
Guarantees and letters of credit	2,807	1,581
Fee income received from bill payments	2,450	2,445
Remittances	2,003	2,047
Other	480	325
Fee and commission income	<u>63,475</u>	<u>54,452</u>
Plastic card operations	(30,552)	(25,047)
Settlements operations	(1,703)	(1,878)
Cash operations	(1,181)	(1,692)
Fee expense paid for bill payments	(751)	(746)
Guarantees and letters of credit	(138)	(137)
Fee and commission expense	<u>(34,325)</u>	<u>(29,500)</u>
Net fee and commission income	<u><u>29,150</u></u>	<u><u>24,952</u></u>

Revenue from contracts with customers

The Group's revenue from contracts with customers is mostly represented by fee and commission income, including income from guarantees. Revenue from contracts with customers recognized in the consolidated statement of comprehensive income for the year ended 31 December 2025 amounted to ₾ 78,475 (2024: ₾ 69,452) of which ₾ 15,000 is income from social services disclosed in other income (*Note 23*).

The Group applies the practical expedient in paragraph 121 of IFRS 15 and does not disclose information about remaining performance obligations that have original expected durations of one year or less.

22. Net gains/(losses) from foreign currencies

	<u>2025</u>	<u>2024</u>
Dealing	19,597	21,051
Net result from foreign currency derivatives	(5,095)	1,614
Translation differences	6,776	(206)
	<u>21,278</u>	<u>22,459</u>

23. Other income

Other income comprises:

	<u>2025</u>	<u>2024</u>
Income for providing social services (a)	15,000	15,000
Gain from sale of assets	951	408
Income from insurance claims	522	143
Income from rent	446	459
Effect from termination of lease contracts	73	7
Gain from revaluation of investment properties	21	401
Other	409	46
Total other income	<u>17,422</u>	<u>16,464</u>

(a) The Group receives income from Social Service Agency for providing banking services to the pension beneficiaries, the income is recognised over time on straight-line bases at amount of ₾ 1,250, respective considerations are received monthly. Payments are made within 15 days, according to the contract.

Plastic card production expense	2,214	1,759
Social responsibility expenses	148	457
Loss from revaluation of property and equipment	–	907
Other	5,300	3,943
Other operating expenses	<u>12,552</u>	<u>11,995</u>

26. Risk management

Introduction

Risk is inherent in the Group's activities but it is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Group's continuing profitability and each individual within the Group is accountable for the risk exposures relating to his or her responsibilities. The Group is exposed to credit risk, liquidity risk, market risk, operational risk and other non-financial risks. The risk management framework adopted by the Group sets the boundaries of risk bearing capacity for each risk and business line and ensures its compliance.

The responsibility of the individuals responsible for risk management is to ensure the compliance of the Group to the Risk Appetite Statement ("RAS") set by the Supervisory Board of the Bank. The compliance is ensured by continuous monitoring of the RAS parameters and proposing any changes to these parameters when circumstances change. The Enterprise Risk Management ("ERM") Division has the overall responsibility for monitoring of the RAS set by the Supervisory Board. RAS establishes escalation routes for trigger events and limits breaches in order to timely and effectively initiate and implement pre-defined mitigation actions. For the purposes of effective inclusion into daily activities of the Group, RAS parameters are detailed into more granular business unit and transactional levels. With the active involvement of Management Board risk management functions ensure proper communication and clarity at all levels regarding risk objectives, constant monitoring of risk profile against risk appetite, timely escalation of risk-related alerts and design of mitigating actions.

Risk management framework and structure

The Supervisory Board of the Bank has overall responsibility for the establishment and oversight of the Group's risk management framework. The Supervisory Board has established committees, which are responsible for developing and monitoring Group risk management policies in relevant specified areas, which are communicated through RAS.

The Group's risk management policies are established to identify and analyse the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. The Group, through its management standards, procedures and trainings aims, has a disciplined and constructive control environment, in which all employees understand their roles and obligations.

Audit Committee

The Audit Committee is responsible for monitoring compliance with the Group's risk management policies and procedures, and for reviewing the adequacy of the risk management framework in relation to the risks faced by the Group. It is responsible for the fundamental risk issues and manages and monitors relevant risk decisions. The Audit Committee is assisted in these functions by Internal Audit.

Internal Audit

Risk management processes throughout the Group are audited by the internal audit function, which examines, by undertaking regular and ad-hoc reviews, both the adequacy of the procedures and the Group's compliance with the procedures. Internal Audit discusses the results of all assessments with the Management Board and reports its findings and recommendations to the Audit Committee.

(thousands of Georgian Lari)

26. Risk management (continued)

Risk management framework and structure (continued)

Other structural units

The Supervisory Board is ultimately responsible for identifying and controlling risks; however, there are separate independent bodies responsible for managing and monitoring risks. Risk Appetite metrics are set by the Supervisory Board and monitored by the following committees and units with the active involvement of Management Board:

- ▶ Credit risk is managed by the Credit Risk Committees;
- ▶ Liquidity risk is managed by Asset–Liability Committee (“ALCO”);
- ▶ Market risk is managed by ALCO;
- ▶ Operational risk is managed by the Operational Risk Management Department with close cooperation of Management Board;
- ▶ Information security and technology risks are managed by Information Security Department.

All committees have representatives of all relevant business units and report regularly to the Management Board.

Business lines represent the primary owners of risks affecting daily activities and operations within the Group. Business processes incorporate controlling activities performed by the relevant risk unit representatives. Units with risk management functions represent the second line of defense. The following departments are responsible for day–to–management of credit, liquidity, market, operational and other financial risks:

- ▶ Enterprise Risk Management;
- ▶ Credit Underwriting;
- ▶ Credit Administration;
- ▶ Credit Controlling;
- ▶ Collections;
- ▶ Operational Risk Management;
- ▶ Information Security.

Anti–Money Laundering (“AML”) is managed by AML Department and Compliance Risks are managed by Compliance Department. Collections function is divided into two broad sub–functions, each responsible for leading and monitoring collection process per types of outstanding receivables.

Business lines represent the primary owners of risks affecting daily activities and operations within the Group. Business processes incorporate day–to–day involvement of risk management representatives, with focus on risk identification, analysis, evaluation and treatment.

Risk measurement and reporting systems

The Group's risks are measured using a method which reflects both the expected loss likely to arise in normal circumstances and unexpected losses, which are an estimate of the ultimate actual loss based on statistical models. The models make use of probabilities derived from historical experience.

Monitoring and controlling risks is primarily performed based on limits established by the RAS. These limits reflect the business strategy and market environment of the Group as well as the level of risk that the Group is willing to accept.

Information compiled from all the businesses is examined and processed in order to analyse, control and identify early risks. This information is presented and explained to the Management Board, and the head of each business division. Senior management assesses the appropriateness of the allowance for expected credit losses on a monthly basis.

For all levels throughout the Group, specifically tailored risk reports are prepared and distributed in order to ensure that all business divisions have access to extensive, necessary and up–to–date information.

(thousands of Georgian Lari)

26. Risk management (continued)

Risk measurement and reporting systems (continued)

Risk mitigation

The Group uses collaterals (precious metals, real estate, deposits, securities, movable property, receivables and company shares) and diversification to mitigate its credit risks.

Excessive risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Group's performance to developments affecting a particular industry or geographical location. The Group risk management functions ensure that potential negative impact from concentration is identified in a timely manner, respective risks properly measured and evaluated, and, ultimately, responsive actions planned and realised. RAS sets overall limits on excessive credit risk, liquidity and market risk concentrations.

Credit risk

Credit risk refers to the Group's potential financial losses that can arise from a borrower or counterparty failing to fulfill their repayment obligations according to the agreed terms. These obligations are typically part of the traditional non-trading lending activities, such as loans, credit lines, guarantees, letters of credit etc. The Group is exposed to different categories of credit risks, such as:

- ▶ Default Risk – the risk that counterparty will be unable to make the required payment on debt obligations;
- ▶ Country Risk – the risk stemming from the unexpected deterioration of the creditworthiness or default of the country due to social unrest, political instability, war, or other unfavourable developments; and
- ▶ Concentration Risk – the risk of loss arising from a large position in a single asset, or group of assets. This risk arises when portfolio has less diversification in terms of sector and group of borrowers.

The Group manages credit risk through a variety of strategies and mechanisms designed to minimize the likelihood of loss.

Credit Risk Management Mechanisms

Credit Assessment and Underwriting

Credit assessment and underwriting involve a thorough assessment of the borrower's creditworthiness before granting a loan. This process includes analysing financial statements, credit scores, collateral, business models, historical trends and the overall economic environment. The Group utilizes this information to assess the repayment capacity of a borrower and to establish terms that align with the perceived risk.

Risk-based Pricing

The Group employs a risk-based pricing approach, where the interest rates and loan terms are adjusted according to the borrower's assessed risk level. Higher-risk borrowers typically face higher interest rates to compensate for the increased likelihood of default.

Portfolio Monitoring

The Group continuously monitors the financial health of borrowers at both individual and portfolio levels. Monitoring process may include regular reviews of financial statements, analysing portfolio key risk indicators and staying informed about any changes that could affect the borrower's repayment ability. The Group sets out desired target levels of credit risk indicators, as well as trigger and limit values that are monitored on a regular basis and mitigative measures are implemented in the event of undesirable trends among these indicators.

(thousands of Georgian Lari)

26. Risk management (continued)

Credit Risk Management Mechanisms (continued)

Portfolio Limitations and Diversification

The Group manages risk by diversifying its loan portfolios across different sectors, geographic regions within Georgia, and borrower types. This strategy helps distribute risk so that the failure of a single borrower or downturn in a specific sector does not have a disproportionate impact on the Group's financial health. Limitations are imposed on each loan category. Business lending exposures exceeding ₾ 1,000,000 represent individually significant financial instruments for the Group. In accordance with the lending policy, financial ratios thresholds are imposed as a guideline to assess creditworthiness of a company. All these ratios are viewed as quality control recommendations, though they may be re-evaluated or adjusted in certain cases due to company-specific factors. The applicable ratios vary depending on the economic sector, loan outstanding amount, and the expected probability of default for individual companies. For consumer lending and mortgages the Group imposes the PTI (Payment to Income) and LTV (Loan to Value) limits in compliance with the responsible lending standards of National Bank of Georgia (NBG), as outlined in the respective decree.

Collateralization

Collaterals and Guarantees are important measures of credit risk mitigation. The Group often requires collateral, which can be seized if the borrower defaults on the loan. Guarantees from third parties can also provide an additional layer of security. The Group has implemented internal collateral assessment methodology that is compliant with International Valuation Standards (IVS) as well as with the local regulatory guidelines. For various segments of business lending exposures, the Group has adopted recommended ratios of collateralization, while for consumer lending and mortgages regulatory limitations on Loan to Value ("LTV") ratios are in place.

Assessment of Credit Risk

Homogeneous Groups

All financial instruments in the Group's credit portfolio are subject to assignment to one of the predetermined Homogeneous Groups of risk exposures. There are two general sub-categories of Homogeneous Groups, credit risk parameters of which are assessed either on individual or collective basis:

- ▶ Individually Significant Risk Exposures (ISRE) – group of all financial instruments of business lending portfolio where total outstanding amount of loans, for a group of connected borrowers, exceeds ₾ 1,000,000. Additionally, individual assessment is conducted for Wholesale Gold Pawn portfolio exposures and any other asset that may be considered individually significant for the Group;
- ▶ Collectively Assessed Risk Exposures (CARE) or all other financial instruments, that do not fall into ISRE category. There are several CARE Homogeneous Groups formed that include Small and Micro business loans and all retail products. CARE groups are formed by considering similar inherent risk characteristics of respective credit products and availability of historical data in order to perform collective assessment employing statistical methods.

Outcome of risk assessment of a financial instruments, whether individual or collective, is a combination of risk parameter values for every financial instrument, that eventually are used for quantitative evaluation of credit risk as described below.

Expected Credit Losses and Allowance for ECL

Assessment of expected credit losses (ECL) is one of the fundamental processes of Group's credit risk management framework, reflecting a Group's proactive approach to managing potential losses in its loan portfolio and ensuring its long-term viability and compliance with regulatory requirements. In accordance with the IFRS 9, the Group uses a forward-looking approach for loan loss provisioning that requires to account for expected credit losses over the life of a loan, rather than the previous "incurred loss" method. The key risk parameters of ECL estimation are Probability of Default (PD), Loss Given Default (LGD) and Exposure at Default (EAD).

(thousands of Georgian Lari)

26. Risk management (continued)

Assessment of Credit Risk (continued)

Probability of Default (PD)

PD is a financial metric used to estimate the likelihood that a borrower will fail to repay a loan or credit obligation within a specified time frame, typically expressed as a percentage. The Group assesses PD for every financial instrument in its portfolio based on Homogeneous Groups of exposures. PD estimation for ISRE exposures is performed via application of S&P methodology and involves determination of borrower's Rating and its respective mapping to PD. The S&P models incorporate both qualitative and quantitative information and, in addition to information specific to the borrower, utilize supplemental external information that could affect the borrower's behaviour. Individual assessment of borrowers is carried out by specialized credit risk employees of the Group as part of the underwriting process. Assessment results are used for the risk-based pricing purposes as well as for the IFRS provisioning. Default probability for CARE assets is estimated by means of sophisticated methodology based on "Months on Book – MOB" approach, developed internally. Calculated historical PD rates are adjusted by means of forward-looking macroeconomic scenarios described below.

Loss Given Default (LGD)

LGD is a risk metric used in financial analysis to estimate the percentage of a loan or credit exposure that is lost when a borrower defaults, after accounting for the recoveries and other mitigating factors. LGD for CARE assets is defined statistically according to cash recovery approach after default, while in case of ISRE assets LGD rates are defined individually by means of S&P methodology.

Exposure at Default

EAD represents the total value that a lender is exposed to in the moment of a defaults on a loan obligation. The Group has developed EAD cashflow projection model for cashflow products using amortization schedule and historical average prepayment rates to generate EAD term structure. In case of loan commitments and off-balance exposures the Group uses its own credit conversion factor (CCF) approach.

Staging of Financial Instruments

For the purpose of Expected Credit Loss (ECL) assessment, financial instruments are classified into categories referred to as impairment stages, based on their credit risk profile. This classification framework is established by IFRS 9 standard and the staging assessment is critical for measuring the appropriate loss allowance:

- ▶ *Stage 1* – Financial instruments that have not experienced a significant increase in credit risk (SICR) since initial recognition, or that are considered to have low credit risk at the reporting date, are classified in Stage 1. For these assets, the Group recognizes a loss allowance equal to 12-month expected credit losses (12mECL), representing the expected losses resulting from default events possible within the next 12 months;
- ▶ *Stage 2* – When a financial instrument has experienced a significant increase in credit risk since initial recognition, but is not credit-impaired, it is classified in Stage 2. For Stage 2 assets, the loss allowance is measured at lifetime expected credit losses (LECL), reflecting expected losses over the remaining life of the instrument;
- ▶ *Stage 3* – Financial assets are classified in Stage 3 when they are considered credit-impaired, meaning there is objective evidence of impairment (e.g., default, significant financial difficulty of the borrower, or other observable events). For these assets, the loss allowance is measured at lifetime expected credit losses. Interest revenue is recognized on the net carrying amount (i.e., after deduction of the loss allowance);
- ▶ *POCI* – In addition to the three impairment stages, the Group identifies certain financial assets as Purchased or Originated Credit-Impaired (POCI). These are assets that are credit-impaired at the time of initial recognition. POCI assets are subject to a specific accounting treatment under IFRS 9, whereby lifetime expected credit losses are incorporated into the credit-adjusted effective interest rate at initial recognition.

(thousands of Georgian Lari)

26. Risk management (continued)

Assessment of Credit Risk (continued)

Definition of Significant Increase in Credit Risk

A significant increase in credit risk (SICR) refers to a notable escalation in the likelihood that a borrower will default on loan obligations, as compared to the risk of default at the time of loan origination or the last reporting date. The Group recognizes several quantitative and qualitative factors indicating SICR:

- ▶ Breach of contractual payment date by more than 30 days;
- ▶ Restructuring / renegotiation of contractual terms due to financial difficulties of a borrower;
- ▶ Breach of PTI / DSCR / LTV requirements for respective Homogeneous Group exposures;
- ▶ Individual decision by the credit risk management.

After recognizing SICR event, respective exposure is moved from Stage 1 to Stage 2 along with the other exposures of the same borrower / group of connected borrowers (contamination principle). Reclassification of the exposure to Stage 1 is possible after sufficient number of successful consecutive payments are conducted and no SICR indicators are active during this rehabilitation period. If updated financial analysis of a borrower is available, showing no SICR sign since the origination, at least 3 successful consecutive payments must be conducted in order to reclassify exposure to Stage 1; If updated analysis is not available, at least 6 successful consecutive payments are required. In case of exposures with seasonal repayment schedules, successful repayment of all seasonal instalments is required for stage improvement.

Definition of Default and cure

In general, default occurs when a borrower fails to meet the legal obligations of a debt agreement. This typically means that the borrower has not made the scheduled payments of interest or principal on a loan or bond within the specified time frame or has violated the terms of the loan agreement or bond indenture. The Group considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the borrower becomes 90 days past due on its contractual payments.

(thousands of Georgian Lari)

26. Risk management (continued)

Assessment of Credit Risk (continued)

As a part of a qualitative assessment of whether a customer is in default, the Group also considers a variety of events that may indicate unlikelihood to pay. When such events occur, the Group carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate. Such events include:

- ▶ Internal rating of the borrower indicating default or near–default for individually significant exposures;
- ▶ The borrower requesting emergency funding from the Group;
- ▶ The death of the borrower;
- ▶ A material decrease in the underlying collateral value where the recovery of the loan is expected from the sale of the collateral;
- ▶ A material decrease in the borrower's turnover or the loss of a major customer;
- ▶ A covenant breach not waived by the Group;
- ▶ The debtor (or any legal entity within the debtor's group) filing for bankruptcy;
- ▶ Deterioration of the regulatory, political, and technological outlook that is relevant to a particular borrower or to a group of borrowers;
- ▶ Adverse changes in the sector or industry conditions in which the borrower operates;
- ▶ Significant change in internal price indicators of similar products of the FI, such as increase of interest rate, increase of minimum collateral requirements etc.;
- ▶ Exposure(s) of other borrower(s) within group becoming or remaining credit–impaired;
- ▶ A default, initiation of bankruptcy proceedings or breach of a contract (including breach of covenants);
- ▶ Call of off–balance sheet liabilities (any type) which was not expected ahead and was not predetermined by credit project;
- ▶ Initiation of legal proceedings that may result in significant cash outflow;
- ▶ Emergence of new competitors on monopolistic and oligopolistic markets, that may result in decrease of market share or prices;
- ▶ Fraud in the borrower's business;
- ▶ Significant delay in provision of financial information by the borrower;
- ▶ Recent frequent changes in senior management of the borrower;
- ▶ Deterioration of borrowers' financial performance (taking into consideration seasonality of a business), indicated by:
 - ▶ Deterioration of interest coverage ratio (EBIT/ Interest Expenses);
 - ▶ Deterioration of Debt / EBITDA ratio;
 - ▶ Deterioration of Equity / Assets ratio;
 - ▶ Significant decrease in sales;
 - ▶ Preservation of negative operating cash flow;
 - ▶ Loss of a major customer;
 - ▶ Termination of an agreement with major supplier;
 - ▶ Deterioration of liquidity and profitability of a particular borrower or a group of borrowers.

(thousands of Georgian Lari)

26. Risk management (continued)

Assessment of Credit Risk (continued)

After recognizing event of Default, respective exposure is moved to Stage 3 along with the other exposures of the same borrower / group of connected borrowers (contamination principle). It is the Group's policy to consider a financial instrument as 'cured' and therefore re-classified to Stage 2 when none of the default criteria have been present during conducting sufficient number (defined by methodology) of successful consecutive payments. If updated financial analysis of a borrower is available, showing no sign of credit impairment, after at least 6 consecutive payments are performed, defaulted exposure can be reclassified to Stage 1; If updated analysis is not available, after at least 6 consecutive payments defaulted exposure can be reclassified to Stage 2 and after at least 12 consecutive payments – to Stage 1. In case of exposures with seasonal repayment schedules, defaulted exposure can be reclassified to Stage 2 after repayment of all seasonal instalments. Under consecutive payment, repayment of scheduled instalment without any overdue is presumed.

Forward-looking information and multiple economic scenarios

In its ECL models, the Group relies on a broad range of forward-looking information as economic inputs, such as:

- ▶ GDP growth;
- ▶ Unemployment rates;
- ▶ Monetary policy rate;
- ▶ Foreign exchange rates;
- ▶ CPI Inflation rate;
- ▶ Nominal Effective Exchange Rate NEER;
- ▶ Fed Funds Rates;
- ▶ Change in Real Estate Prices;
- ▶ Death Rates.

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material.

(thousands of Georgian Lari)

26. Risk management (continued)

Assessment of Credit Risk (continued)

The Group obtains the forward-looking information published by the National Bank of Georgia. Experts of the Group's Credit Risk Department determine the weights attributable to the multiple scenarios. The tables show the values of the key forward-looking economic variables/assumptions used in each of the economic scenarios for the ECL calculations.

<i>Key drivers</i>	<i>ECL scenario</i>	<i>Assigned weight, %</i>	<i>2026</i>	<i>2027</i>	<i>2028</i>

The credit risk assessment policy for financial assets has been determined by the Group for balance sheet exposures as follows:

- ▶ A financial asset that is not past due at the reporting date is assessed as a financial asset with high grade;
- ▶ A financial asset that is less than 30 days past due at the reporting date is assessed as a financial asset with standard grade;
- ▶ A financial asset that is past due more than 30 days and less than 90 days past the reporting date is assessed as a financial asset with sub–standard grade;
- ▶ Grading for Undrawn loan commitments for clients, who have loans or any other balance sheet exposures are in line with balance sheet grade. For other undrawn loan commitments, conditional undrawn loan commitments are considered to be High grade. Unconditional undrawn loan commitments are graded in line with clients' credibility monitored by the Group's experts;
- ▶ Financial guarantees are considered High grade if the client performs under contractual conditions. If the client mostly performs well under the contract, it is classified as standard grade, while poor performance is considered sub–standard and breach of contract impaired.

Prepayment risk

Prepayment risk is the risk that the Group will incur a financial loss because its customers and counterparties repay or request repayment earlier or later than expected, such as fixed rate mortgages when interest rates fall.

The Group monitors actual and expected loan prepayments or potential late repayment requests and takes necessary actions to prevent or minimize potential loss by taking best possible actions. The group proactively conducts negotiations to new potential borrowers to compensate the interest income shortage due to early repayment. Any extra liquidity is invested in interest earning assets based on the internal liquidity management practices.

The effect on profit before tax for one year and on equity, assuming 10% of repayable financial instruments were to prepay at the beginning of the year, with all other variables held constant, is as follows:

	<i>Effect on net interest income</i>	<i>Effect on equity</i>
2025	(37,800)	(34,292)
2024	(33,357)	(30,211)

(thousands of Georgian Lari)

26. Risk management (continued)

Liquidity risk and funding management

Liquidity risk management and supervision

Liquidity risk is the risk that the Group will encounter difficulty in meeting obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. Other objectives include securing a balanced financing mix for the Group's activities, compliance with standards set by the NBG, managing crisis situations and controlling the cost of funding.

The main liquidity risk mitigation techniques are building liquidity reserves, diversifying funding sources and extending financing maturities. However, significant liquidity in excess of statutory requirements due to unexpected net cash inflows should be avoided and the Management Board should examine options to reduce liquidity to an appropriate level.

The Treasury Department, ERM division and ALM and budgeting division are responsible for the management of the liquidity and funding risk within targets, boundaries and limits being set out in the RAS. The Treasury Department, ERM division and ALM and budgeting division manage the liquidity risk on a centralised level and reports to CFO at least weekly. Key decisions on liquidity risk management and monitoring are taken by the units mentioned above. ERM and ALM and budgeting divisions are responsible for long-term outlook on liquidity position of the Bank and report the results to CFO and treasury department.

The Bank maintains a Recovery Plan which includes pressure on liquidity triggers and recovery plan strategy. Since the precise nature of any stress event cannot be known in advance, the plans are designed to be flexible to the nature and severity of the stress event and provide a menu of options that could be used as appropriate at the time. The liquidity triggers are monitored by Treasury Department, ERM division and ALM and budgeting division on a daily basis. Any potential trigger event is escalated to the Management Board level. Recovery Plan contains step-by-step actions, to generate additional liquidity in order to facilitate recovery in a severe stress and is executed by the Head of Treasury Department and business owners under the supervision of the Management Board.

The Group uses stress testing and scenario analysis to evaluate the impact of a sudden and severe stress events on its liquidity position. The scenarios cover the Group-specific and market related risk events.

Statutory requirement

The liquidity coverage ratio (LCR) is calculated following Basel III framework. The NBG requires all banks to maintain the LCR of 75.0% in ₾, and LCR of 100.0% in foreign currency and total LCR of 100% on a daily basis.

The Bank's total LCR calculated in accordance with NBG Basel III requirements were as follows:

	<i>2025</i>	<i>2024</i>
LCR in local currency	112.0%	92.6%
LCR in foreign currency	171.8%	115.8%
Total LCR	134.3%	105.0%

The Bank holds a comfortable buffer on top of Net Stable Funding Ratio (NSFR) requirement of 100%. A solid buffer over NSFR provides stable funding sources over a longer time span. This approach is designed to ensure that the funding framework is sufficiently flexible to secure liquidity under a wide range of market conditions.

The Bank's NSFR was as follows:

	<i>2025</i>	<i>2024</i>
NSFR	131.6%	126.5%

Liquidity risk and funding management (continued)

Analysis by remaining contractual maturities

The tables below summarise the maturity profile of the Group's financial liabilities as of 31 December 2025 and as of 31 December 2024 based on contractual undiscounted repayment obligations. Repayments which are subject to notice are treated as if notice were to be given immediately. However, the Group expects that many customers will not request repayment on the earliest date the Group could be required to pay and the table does not reflect the expected cash flows indicated by the Group's deposit retention history.

<i>As of 31 December 2025</i>	<i>Less than 3 months</i>	<i>3 to 12 months</i>	<i>1 to 5 years</i>	<i>Over 5 years</i>	<i>Total</i>

26. Risk management (continued)

Liquidity risk and funding management (continued)

The table below shows the contractual expiry by maturity of the Group's financial commitments and contingencies. Each undrawn loan commitment is included in the time band containing the earliest date it can be drawn down. For issued financial guarantee contracts and letters of credit, the maximum amount of the guarantee is allocated to the earliest period in which the guarantee could be called.

	<i>Less than 3 months</i>	<i>3 to 12 months</i>	<i>1 to 5 years</i>	<i>Over 5 years</i>	<i>Total</i>
2025	464,643	1,463	639	27	466,772
2024	413,685	3,153	558	36	417,432

The Group expects that not all of the contingent liabilities or commitments will be drawn before expiry of the commitments.

The maturity analysis does not reflect the historical stability of current accounts. Their liquidation has historically taken place over a longer period than indicated in the tables above. These balances are included in amounts due in less than three months in the tables above.

Maturity analysis of assets and liabilities

Treasury Department manages the maturity analysis of assets and liabilities. Modelling of assets and liabilities is necessary where contractual maturity does not adequately reflect the liquidity risk position. The most significant example in this context for the Group would be current and savings accounts from retail, corporate and municipal and other state entities. Although, contractually, current accounts are repayable on demand and savings accounts at short notice, the Bank's broad base of customers – numerically and by depositor type – helps protect against unexpected fluctuations in balances. Such accounts form a stable funding base for the Group's operations and liquidity needs. Table below shows the maturity analysis of the Group's financial assets and liabilities according to when they are expected to be recovered or settled.

	<i>2025</i>			<i>2024</i>		
	<i>Within one year</i>	<i>More than one year</i>	<i>Total</i>	<i>Within one year</i>	<i>More than one year</i>	<i>Total</i>
Cash and cash equivalents	505,106	–	505,106	441,329	–	441,329
Amounts due from credit institutions	117,289	–	117,289	105,719	–	105,719
Loans to customers	1,481,404	2,711,281	4,192,685	1,407,831	2,139,949	3,547,780
Investment securities	645,535	230,111	875,646	312,561	189,754	502,315
Total	<u>2,749,334</u>	<u>2,941,392</u>	<u>5,690,726</u>	<u>2,267,440</u>	<u>2,329,703</u>	<u>4,597,143</u>
Amounts due to credit institutions	945,922	14,092	960,014	829,463	26,516	855,979
Amounts due to customers, of which:						
Current accounts	2,292,116	1,801,824	4,093,940	1,840,857	1,386,589	3,227,446
Time deposits (including certificates of deposit)	333,385	1,326,818	1,660,203	250,155	1,140,720	1,390,875
Lease liability	1,958,731	475,006	2,433,737	1,590,702	245,869	1,836,571
Subordinated debt	360	41,068	41,428	1,163	38,723	39,886
Total	<u>1,055</u>	<u>156,743</u>	<u>157,798</u>	<u>759</u>	<u>129,144</u>	<u>129,903</u>
Net	<u>3,239,453</u>	<u>2,013,727</u>	<u>5,253,180</u>	<u>2,672,242</u>	<u>1,580,972</u>	<u>4,253,214</u>
	<u>(490,119)</u>	<u>927,665</u>	<u>437,546</u>	<u>(404,802)</u>	<u>748,731</u>	<u>343,929</u>

The maturity of the assets is based on their carrying amounts and upon earliest legally exercisable maturity as of 31 December of the year concerned. The maturity of liabilities is based on the earliest contractual maturity or first call, except for the current accounts. The portion of current accounts is presented in more than one-year maturity range due to their stability. Time deposits (including certificates of deposit) diversification by number and type of depositors and the past experience of the Group indicate that such accounts and deposits provide a long term and stable source of funding, and as a result they are allocated per expected time of the funds outflow in the gap analysis table on the basis of the statistical data accumulated by the Group during the previous periods and assumptions made regarding the "permanent" part of current account balances.

(thousands of Georgian Lari)

26. Risk management (continued)

Liquidity risk and funding management (continued)

As at 31 December 2025, total amounts due to customers amounted to ₾ 4,093,940 (as at 31 December 2024: ₾ 3,227,446), of which current accounts comprised ₾ 1,660,203 (as at 31 December 2024: ₾ 1,390,875). The Bank conducts the analysis of the stability of the current account balances for the period of the preceding two years on a daily basis. These balances have not fallen below ₾ 1,326,818 (2024: ₾ 1,140,720) for the respective periods of the preceding 24 months. As such, it is reasonable to present these funds in amounts due to customers in more than one-year maturity range in the above schedule. If the contractual maturities of amounts due to customers were considered, the cumulative liquidity gap within one year as of 31 December 2025 would have been negative ₾ 1,816,937 (31 December 2024: negative ₾ 1,545,522).

As at 31 December 2025 the Group had borrowings from the NBG at amount of ₾ 880,860 (2024: ₾ 751,308), which was due for settlement within one year, however if there is necessity for liquidity purposes, the Group will be able to extend the loan. Besides the Group had liquid collateral to additionally draw down ₾ 239,546 (2024: ₾ 22,478) from the NBG at immediate notice.

Market risk

Market risk is the risk that affect the overall performance of the financial market. The main types of market risks include interest rates risk, currency risk and their levels of volatility. Market risk arises mainly from trading activities. The Group is not exposed to market risk related to trading activities, since the Bank, in line with its risk appetite, is not engaged in trading activities. The market risk related to the banking activities encompasses the risk of loss on equity holdings, and the interest rate and foreign exchange risk stemming from banking intermediation activities. The Bank is exposed to interest rate and foreign exchange risks in its banking books.

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments.

The sensitivity of the consolidated statement of profit or loss is the effect of the assumed changes in interest rates on the net interest income for one year, based on the floating rate of non-trading financial assets held at 31 December 2025.

<i>Currency</i>	<i>2025</i>

GEL	100	(3,885)	3,384
USD	100	(1,936)	–
EUR	100	(550)	–

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The NBG requires the Bank to monitor both balance–sheet and total aggregate (including off–balance sheet) open currency positions and to maintain the later one within 20.0% of the Bank's total regulatory capital. As at 31 December 2025, the Bank maintained an aggregate open currency position of 0.8% of regulatory capital (31 December 2024: 0.9%).

The Bank has approved Foreign Currency Risk Management Policy, which is intended to establish parameters for the Bank for the management of foreign currency exposures.

The process of foreign currency risk management includes, but is not limited to:

- ▶ Selection of adequate methodology for foreign currency risk identification and quantitative measurement;
- ▶ Daily monitoring of the open foreign currency position;
- ▶ Minimising currency risk through compliance with established limits;
- ▶ Revealing existing and anticipated negative tendencies of increased currency risk followed by the analysis of its causes and implications;
- ▶ Making recommendations on the currency risk management strategy;
- ▶ Determining the types and limits on instruments used in the foreign currency risk operations.

RAS sets limits on the level of exposure by currency as well as on aggregate exposure positions which are more conservative than those set by the NBG. The Bank's compliance with such limits is monitored daily by Treasury and ERM Division.

The tables below indicate the currencies to which the Group had significant exposure at 31 December on its non–trading monetary assets and liabilities. The analysis calculates the effect of a reasonably possible movement of the currency rate against the ₾, with all other variables held constant on the consolidated statement of profit or loss (due to the fair value of currency sensitive non–trading monetary assets and liabilities). The effect on equity does not differ from the effect on the consolidated statement of profit or loss. A negative amount in the table reflects a potential net reduction in consolidated statement of profit or loss or equity, while a positive amount reflects a net potential increase.

Operational risk

Operational risk is defined as the risk of a financial loss resulting from the inadequacy or failure of internal processes, systems or people, or from external events, whether deliberate, accidental or natural occurrences. External events include, but are not limited to fraud, floods, fire, earthquakes and terrorist or hacker attacks. Credit or market events such as default or fluctuations in value do not fall in the scope of operational risk. Compliance risk is included under operational risk. Compliance risk is the potential that the Bank may incur regulatory sanctions, financial loss and/or reputational damage arising from its failure to comply with applicable laws, rules and regulations. The operational risk does not cover the reputational and strategic risk.

The overall objective of the operational risk management is to identify risks arising from inadequate or failed internal processes, people and systems or from external events and mitigate them where feasible and to the extent economically reasonable.

The Bank has established the Operational Risk Management (ORM) framework and takes all possible steps to understand exposure of the business to the variety of operational risks arising from inadequate or failed internal processes, people and systems or from external events. The aim of the ORM framework is to enable the Bank to collect, assess, manage, and report operational risk efficiently and effectively.

The responsibilities of the Operational Risk Management Department, Department of Physical Security, Soft Collection Department, Legal Department, Internal Audit and Business Owners within ORM framework are defined in the Operational Risk Management Policy.

In general, the Bank has no appetite towards the operational risks and aims to reduce the losses resulting from risk events to the point where the Bank is not materially impacted by them. The Bank has low appetite towards operational risks related to fraud, information security (including IT) and compliance breaches, therefore the Bank makes all efforts to eliminate these types of risks, majority of cases are directed to law enforcement bodies.

The Risk Event Database (RED) is developed and maintained to ensure that all incidents, losses and near misses are evidenced and treated appropriately. It provides the Bank with a technical tool to systematically collect realised. This information is used to refine the identification of risks and the appropriate approaches to managing them. The collection of the data and a corresponding analysis is carried out by the Operational Risk Management Department in a centralized manner. Operational risk events from the RED database with material impacts, direct and indirect losses are reported to the Management Board.

Compliance with Group standards is supported by a program of periodic reviews undertaken by Internal Audit. The results of Internal Audit reviews are discussed with the management of respective business lines, with summaries submitted to the Audit Committee and Supervisory Board.

The key mitigation controls the Bank deploys stem from its Operational Risk Profile (ORP) and the RAS of the Supervisory Board. The Bank actively uses corporate insurance to mitigate its operational risks.

(thousands of Georgian Lari)

27. Fair value disclosures

Fair value measurement procedures

External Appraisers are involved for valuation of significant assets, such as properties. Involvement of external Appraisers is decided upon annually by the management after discussion with and approval by the Bank's audit committee. The selection criteria include market knowledge, reputation, independence and whether professional standards are maintained. Valuers are normally rotated every three years. The management decides, after discussions with the Group's external Appraisers, which valuation techniques and inputs to use for each case.

At each reporting date, the management analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. For this analysis, the management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents. The management, in conjunction with the Group's external Valuers, also compares each the changes in the fair value of each asset and liability with relevant external sources to determine whether the change is reasonable. On an interim basis, the management and the Group's external Valuers present the valuation results to the audit committee and the Group's independent auditors. This includes a discussion of the major assumptions used in the valuations.

Fair value hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- ▶ Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- ▶ Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- ▶ Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

For the purpose of fair value disclosures, the Group's has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Valuation techniques and assumptions

The following describes the methodologies and assumptions used to determine fair values for assets and liabilities recorded at fair value in the consolidated financial statements and those items that are not measured at fair value in the consolidated statement of financial position but whose fair value are disclosed.

Assets and liabilities for which fair value approximates carrying value

For financial assets and financial liabilities that are liquid or have a short-term maturity (less than three months), as well as for floating rate instruments, the carrying amounts are assumed to approximate their fair value.

Derivatives

Derivatives valued using a valuation technique with market observable inputs are mainly interest rate swaps, currency swaps and forward foreign exchange contracts. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates and interest rate curves.

Investment Securities

Investment securities valued using a valuation technique with market observable inputs consist of unquoted debt securities. The applied valuation technique includes present value calculations using Government Securities Interdealer Index (GSI Index) as an input.

Financial assets and financial liabilities carried at amortised cost

Fair value of the quoted notes and bonds is based on price quotations at the reporting date, as such they fall under Level 2 fair value hierarchy. The fair value of unquoted instruments, loans to customers, customer deposits, amounts due from credit institutions and amounts due to the NBG and credit institutions and other financial assets and liabilities, is estimated by discounting future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities.

Movements in Level 3 assets and liabilities at fair value

The following tables show a reconciliation of the opening and closing amount of investment properties in Level 3 assets and liabilities which are recorded at fair value. For the reconciliation of property and equipment – buildings refer to *Note 10*:

Buildings	5,134	Market approach	Price volatility adjustment: 10% increase/decrease of market prices	(10.93%) up to 10.99%
Buildings	41,681	Income Approach	10% increase/decrease of rent price 10% increase/decrease of discount rate	(11.02%) up to 8.10% (9.72%) up to 9.68%
Investment properties – office building	2,358	Income Approach	10% increase/decrease of rent price 10% increase/decrease of discount rate	(10.00%) up to 10.00% (8.21%) up to 9.76%
Investment properties – residential house	88	Market approach	Price volatility adjustment: 10% increase/decrease of market prices	(9.36%) up to 9.36%

28. Related party disclosures

In accordance with IAS 24 *Related Party Disclosures*, parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

In considering each possible related party relationship, attention is directed to the substance of the relationship, not merely the legal form.

Related parties may enter into transactions which unrelated parties might not, and transactions between related parties may not be affected on the same terms, conditions and amounts as transactions between unrelated parties.

(thousands of Georgian Lari)

** Net gains/(losses) from foreign currencies.

Entities under common control comprises of organisations in which shareholders of the Group exercise control which represent related parties to the Group.

As at 31 December 2025, interest rates on loans issued to key management personnel comprised 7.38% and 39.65% (31 December 2024: 7.98% and 39.65%) for loans denominated in local and FC currency, respectively. As at 31 December 2025, interest rates on deposits placed by key management personnel comprised 0.2% and 9.5% (as at 31 December 2024: 0.2% and 9.5%) for deposits denominated in local and FC currency, respectively.

The number of key management personnel during the year ended 31 December 2025 were 7 (2024: 6) and their compensation comprised the following:

	2025	2024
Salaries, bonuses and other short-term benefits	4,930	2,419
Total key personnel compensation	4,930	2,419

(thousands of Georgian Lari)

29. Capital management

The Bank's capital management objectives consist of ensuring its solvency at all times, complying with the supervisory and internal capital requirements, and maintaining a prudent capital cushion in order to protect the Bank from known (and, to some extent, the unknown) risks.

The Bank's management of its total capital is based on the Internal Capital Adequacy Assessment Process (ICAAP), which represents its main capital management tool. Besides, as an additional capital management tool, the Bank maintains Recovery Plan which includes regulatory capital alert thresholds and recovery strategies.

The Bank maintains an actively managed capital base to cover risks inherent in the business. The adequacy of the Group's capital is monitored using, among other measures, the ratios established by the NBG.

NBG Basel III Capital adequacy ratio

Starting from 30 June 2014, the Bank has to comply with minimum capital adequacy ratios stipulated by "Regulation on Capital Adequacy Requirements for Commercial Banks" approved under Decree # 100/04 (the "Pillar 1 Regulation") of the President of the NBG dated 23 October 2013.

On 18 December 2017, the NBG published and approved amendments in capital adequacy regulation (Decree N100/04), according to which the minimum capital requirement ratios have been revised, incorporating Pillar I model and setting Capital Conservation, Systemic Risk and Countercyclical buffers (Pillar I Buffers).

As of 31 December 2025, Pillar 1 minimum capital requirements on Common Equity Tier 1 Capital (CET I), Tier I Capital (Tier I) and Total Capital ratios were set at 4.50%, 6.00% and 8.00% respectively, in addition to which the Bank had to maintain Combined buffers and Pillar II requirements.

As of 31 December 2025, Systemic Risk buffer was 0.5%. Besides, Capital Conservation buffer for 31 December 2024 was 2.5%. Countercyclical buffer is set at 0.5% and will increase annually by 0.25% and will amount 1% for March 2027. Any adjustment of Pillar I and Combined buffers is at the NBG's discretion.

On 18 December 2017, the NBG also published and approved Pillar II Requirements in addition to Pillar I Buffers. Pillar II Requirements include the following capital buffers: Unhedged Currency Induced Credit Risk (CICR), Net GRAPE, Credit Portfolio Concentration Risk, Net Stress-Test and CRA buffer.

According to the "Additional Capital Buffer Requirements for Commercial Banks" within Pillar II (Decree N176/04) rule, Georgian banking sector is transmitted to the International Financial Reporting Standards (IFRS) from 1 January 2023. According to the stated principle of the NBG, while transitioning to IFRS, other things being equal, a neutral approach to the cost of regulatory capital must be maintained on constant level and the capital adequacy framework is amended for this purpose. Credit Risk Adjustment (CRA) buffer is added to the Regulation on Determining Capital Buffers for Commercial Banks within Pillar II. The purpose of establishing CRA buffer is to reduce the credit risk caused by insufficient expected credit losses set up for assets and to determine an adequate capital buffer.

As at 31 December 2025, based on Basel III requirements, the Bank was required to maintain a minimum Total Capital adequacy ratio of 16.81% of the risk-weighted exposures (RWE), minimum Tier 1 Capital adequacy ratio of 13.81% of the RWE and Common Equity Tier 1 Capital adequacy ratio of 11.56% of the RWE computed based on the Bank's stand-alone financial statements prepared in accordance with the NBG requirements. While, as at 31 December 2025, actual Total Capital adequacy ratio, Tier 1 Capital adequacy ratio and Common Equity Tier 1 Capital adequacy ratios were 17.38%, 14.59% and 14.23%, respectively.

(thousands of Georgian Lari)

29. Capital management (continued)

NBG Basel III Capital adequacy ratio (continued)

The Bank's capital adequacy ratios calculated in accordance with NBG Basel II/III requirements were as follows:

	<i>2025</i>	<i>2024</i>
Common Equity Tier 1 capital	607,994	494,873
Additional Tier 1 capital	15,383	4,565

Tier 2 capital	<u>119,238</u>	<u>97,922</u>
Total regulatory capital *	<u><u>742,615</u></u>	<u><u>597,360</u></u>
Risk-weighted exposures *	4,273,149	3,575,078
Common Equity Tier 1 capital ratio*	14.23%	13.84%
Tier 1 capital ratio*	14.59%	13.97%
Total regulatory capital ratio*	17.38%	16.71%

**Capital Ratios and Risk weighted assets are not audited figures*

30. Events after the reporting period

Change in controlling shareholder

On 31 January 2026, the Bank's controlling shareholder, Georgian Financial Group B.V., entered into a Share Purchase Agreement with JSC Basisbank for the transfer of its controlling interest in the Bank. The transfer of ownership was completed on 14 April 2026, on which date JSC Basisbank became the Bank's controlling shareholder. The change in ownership received the consent of the NBG. Following the change in ownership, the Bank's new controlling shareholder intends to merge the Bank into JSC Basisbank in accordance with applicable regulatory requirements.

The change in controlling shareholder does not affect the recognition or measurement of the Bank's assets, liabilities, or equity in these financial statements.

Regulatory waivers granted by the NBG

In connection with the change in ownership and the planned merger, the NBG granted the Bank a set of temporary regulatory concessions.

Fire at the Bank's head office

Subsequent to the reporting date, a fire occurred at the Bank's head office building located at 74 I. Chavchavadze Avenue, Tbilisi. All personnel were confirmed safe. The damage was limited to a specific area of the building, the Bank's operations have not been interrupted, and the incident did not give rise to any risk to the Bank's sustainability or ability to continue as a going concern. The investigation into the cause of the fire and the assessment of material damage, including a valuation of the building by an independent professional valuer, are ongoing as at the date of issuance of these financial statements. The Bank's property is insured; no insurance proceeds had been received as at the date of issuance of these financial statements. Any recovery will be recognized in the period in which receipt becomes virtually certain.

1 Introduction

1.1 Objective of Governance Report

The purpose of this document is to introduce and provide stakeholders with information regarding the activities, development and condition of JSC Liberty Bank ("Bank"), as required by the Law of Georgia "On Accounting, Reporting and Auditing". The governance reporting includes a review of the activities of the bank, a corporate governance reporting, and non-financial statements. The governance report can be found on the website of the Service of Accounting, Reporting and Audit Supervision: saras.gov.ge.

1.2 Verification

The information presented in the governance reporting was reviewed and approved by the Management Board and Supervisory Board of JSC Liberty Bank. The auditor's opinion on the compliance of the management reporting with regulatory acts and its consistency with the financial statements for the same reporting period is provided in individual financial statements.

1.3 Basis for preparation

The report has been prepared according to the Article 7 of the Law of Georgia on Accounting, Reporting and Auditing. All quantitative indicators presented in this document have been recorded following the International Financial Accounting Standards ("IFRS") at a consolidated level, unless otherwise stated.

2 Activity overview

2.1 Overview of the Key Performance Indicators of the Bank

As of December 31, 2025, the profit of the bank amounted to 128.07 million GEL. The volume of net loans issued to customers increased by 18.18%, to 4,192.69 million GEL. Total assets increased by 22.97%, and total capital - by 20.72%.

Key financial information

Million GEL, unless otherwise specified	31 December 2025	31 December 2024
Net interest income	377.98	333.57
Gross operating income ⁽¹⁾	445.83	397.45
Annual profit	128.07	103.36
Return on average total equity	19.04%	18.71%
Return on average total equity (adjusted) ⁽²⁾	19.96%	19.65%
Return on average total assets	2.34%	2.29%
	31 December 2025	31 December 2024
Total assets	6,046.73	4,917.06
Loans issued to customers	4,192.69	3,547.78
Total liabilities	5,311.12	4,307.72
Total capital	735.61	609.33

(1) Gross operating income does not include loan impairment provision expense;

(2) Liberty Bank accounts for PPE under IAS 16 revaluation cost model, which results in recognition of revaluation reserve in equity and revaluation gains in other comprehensive income, such effect amounted to 30.5 million GEL as of 31 DEC 2025, since Georgian banks hold PPE under IAS 16 cost model, ratio to be comparable with competitors, adjusted figure is presented.

As of December 2025, Common Equity Tier 1 (CET1) capital amounted to GEL 607.99 million, representing an increase of GEL 113.12 million (+22.86%) over the last year, driven by profit accumulation. Additional Tier 1 capital, as of December 2025, amounted to GEL 15.38 million, while Tier 2 capital stood at GEL 119.24 million, increasing by GEL 10.82 million and GEL 21.32 million, respectively, over the last year.

2.1 Overview of the Key Performance Indicators of the Bank (continued)

Risk Weighted Exposure (RWE) as of December 2025 totaled GEL 4,273.15 million, reflecting an increase of GEL 698.07 million (+19.53%) over the last year. The main driver of this growth was credit risk-weighted exposures, which increased by GEL 608.26 million (+20.84%) over the same period, while the remaining increase was attributable to operational risk-weighted exposures, which grew by GEL 91.85 million (+14.17%)

Regulatory Capital Ratios

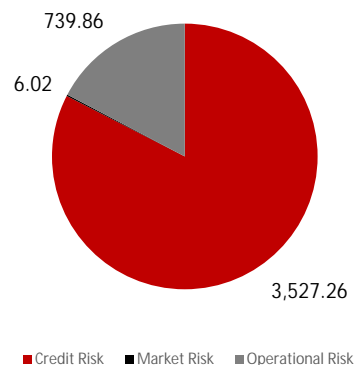

Regulatory Capital In Million Gel

RWE In Million Gel

RWE By Risk Category In Million Gel

Note: The data provided above is recorded following IFRS accounting standards.

2.1 Overview of the Key Performance Indicators of the Bank (continued)

In December 2021, in order to encourage the issuance of loans in GEL, the National Bank of Georgia decided to change the method of calculating the currency induced credit risk (CICR) and make it dependent on the level of dollarization of the credit portfolio of a commercial bank. The CICR will be determined based on the dollarization of loans instead of the existing 75% risk weight requirement. This change came into effect in January 2023. Starting from 2023, by order of the National Bank, the countercyclical buffer will be set at 1%, which must be met in stages: by March 15, 2024, at 0.25%, by March 15, 2025 – at 0.5%, by March 15, 2026 – at 0.75%, by March 15, 2027 – at 1%. Accordingly, Liberty Bank's countercyclical buffer as of December 2025 is 0.5%, while the systemic and conservation buffers are 0.5% and 2.5%.

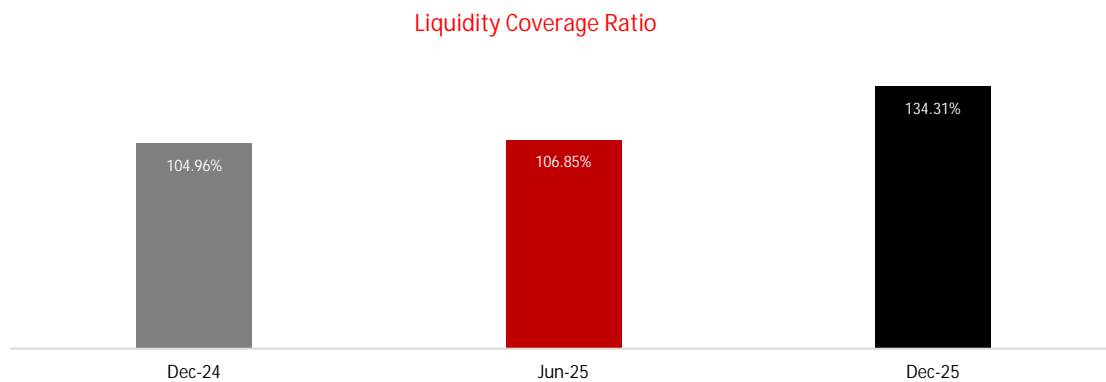

Ratings of JSC Liberty Bank

Fitch Ratings		Rating	Perspective	Date
Issuer default rating	Long-term	B+	Stable	10-Apr-25
	Short-term	B	-	
Support rating		WD	-	
Support rating level		WD	-	
Moody's		Rating	Perspective	Date
Bank rating (foreign)	Long-term	Ba3	Stable	26-March-25
Counterparty risk rating (foreign)	Long-term	Ba2	-	

Fitch's stable outlook on Liberty Bank through December 2025 reflects is driven by its consistent independent profile. The stable outlook reflects that FITCH does not expect to downgrade Liberty Bank's rating given the bank's low credit rating.

In 2022, Moody's during the last revision the outlook changed from stable to negative for Liberty Bank. The change reflects the negative outlook on Georgian government, which was resulted by geopolitical events and Russian invasion of Ukraine. As of 31 December 2025, no further changes have been made and the outlook remains negative.

In 2025, the Bank continues to effectively utilize liquid assets and finance loans with liquid funds. The liquidity position is in line with the supervisory requirements of the National Bank of Georgia. As of December 2025, the liquidity coverage ratio was 134.31%.

Note: The data provided above is recorded following IFRS accounting standards.

2.1 Overview of the Key Performance Indicators of the Bank (continued)

The market share of total assets of the bank was 5.63% as of December 2025. The market share of total loans of the bank has increased by 0.03% since December last year, while the market share of net loans has increased by 0.02%. The market share of deposits placed by customers has increased from 5.34%.to 6.02%.

2.1.2 Group structure

The Bank is the parent company of the entities specified in the table below, which are consolidated in the financial statements inspected by an audit (per IFRS). For regulatory and other significant purposes, the aforementioned entities are not consolidated and the Bank is required to comply with all regulatory requirements independently. As of December 31 2025 Bank ownership share looks like following:

Ownership share of the bank

Name	Registration country	31-Dec-25	31-Dec-24	Registration date	Activity
Bus Stop LLC ⁽¹⁾	Georgia	100.00%	100.00%	27-August-09	Outdoor advertising
Public Foundation ⁽¹⁾	Georgia	100.00%	100.00%	5-February-07	Non-profit

2.2 Development plans and business model

2021-2022 were the years of execution and implementation of the updated strategy for Liberty Bank. The direct plan is to strengthen the Management Board, reinforce the universal banking business model and move closer to the digitalization of the products and processes, all resulting into improving the access to finance in the regions of Georgia across all customer segments.

The Bank has the broadest physical distribution network in Georgia, which includes full-service branches, service centres, smaller-scale sales objects, as well as the outlets located at various third-party businesses.

From 2022, the Bank was devoted to a new vision and mission:

- ▶ **Vision:** Our vision is to improve the life of every individual, family and business in Georgia.
- ▶ **Mission:** We care with big heart about individuals, their families and businesses. We will be accessible everywhere, where our customers are and will provide customized and quick service.

2026 and future plans:

- ▶ To advance in the MSME sector and strengthen market share positions;
- ▶ To Strengthen positions in the direction of retail banking products;
- ▶ Phased development of the corporate segment- growth strategy based on the bank's risk appetite and market opportunities
- ▶ Maintaining market position and maintaining a high level of larization:
 - Maintaining the position of the third largest bank in Georgia by asset volume
 - Maintaining a high level of larization in both assets and liabilities

Universal Banking

Liberty Bank will maintain its universal banking model with strong emphasis on Retail and MSME banking. The Corporate and Private banking businesses will remain a strong support in terms of building the universal bank.

While focusing on delivering strong performance as a universal bank, Liberty Bank will also concentrate on developing innovative products, simplifying the processes and increasing its digitization level, as well as acquiring new customers, including those that are largely unbanked.

Digital Banking

The Bank intends to continue improving its digital banking capabilities and create excellent digital user experience through its mobile and internet banking platforms.

The Bank also aims to simplify and accelerate its on-boarding process for new customers.

The innovative products will also be elaborated for the elderly and socially vulnerable segment, along with offering broader financial education opportunities.

2.2 Development plans and business model (continued)

Funding

Liberty Bank intends to further optimize its funding structure and take the opportunities to reduce its cost of funds. In this regard, the Bank intends to continue cooperation and dialogue with International Development Financial Institutions.

Corporate & Social Responsibility

The bank is actively promoting environmentally beneficial, as well as educational and health care CSR projects addressing the needs of the elderly and the most vulnerable part of society, as well as employee health care.

- ▶ “Green boxes” at the head office - where used paper is collected for recycling;
- ▶ Free computer and financial education for people aged 60+;
- ▶ An internal fund for employees “With a Heart for Each Other”, which was created during the pandemic and helps their family members in case of health deterioration.

Table 2.2.1 Key strategic indicators of the bank

Profitability	31 December 2025	31 December 2024
Return on assets, (annualized), %	2.34%	2.29%
Return on capital, (annualized), %	19.04%	18.71%
Return on average total equity (adjusted)	19.96%	19.65%
Thousand GEL	31 December 2025	31 December 2024
Total loans	4,192.69	3,547.78

2.3. Information about the activities of the branches

The bank represents one of the largest branchholder networks in Georgia. The bank is represented throughout Georgia by 455 branches, which serve more than 1.6 million customers monthly. As of December 31, 2025, the branches and service centers of the bank are distributed as follows:

- ▶ Branches and service centers – 148;
- ▶ Studio-2;
- ▶ Specialized Outlets – 156;
- ▶ LX Mobile Branches – 100;
- ▶ Express Branches-49.

Branches and service centers are located in every city, town, and district center of Georgia. Specialized service centers serve the population of Georgia at strategic locations such as: border checkpoints, MIA service agencies, justice houses, revenue services, state service development agencies, and other strategic locations.

The bank is represented by sales points in all settlements and villages, where the population has the opportunity to receive full banking services. A mobile branch is a mobile bank (a car equipped with relevant equipment), through which the bank provides full banking services to the population of Georgia in any place, including the mountainous regions.

2.4 Research overview

As of December 31, 2025, the Bank has conducted the following studies:

- ▶ NPS, SCAT, CES - Customer Satisfaction and Loyalty Survey. The main goal of the survey was to assess the satisfaction, loyalty of Liberty customers and assessment of simplicity of service provided. The survey is conducted monthly.
- ▶ Employer Net Promoter Score (ENPS) is conducted, the main goal of which is to identify the level of employee loyalty and existing problems and strengths. The survey is conducted by the bank together with the HR department.

2.5 Overview of credit, market, liquidity and other risks

Risk is inherent in banking activities, however, risk management is carried out through a continuous process of identification, assessment and monitoring, using risk limits and other control mechanisms. The risk management process is critical to the continued profitability of the bank, and each individual in the bank is accountable for the responsibilities they have undertaken towards risk positions. The Bank is exposed to credit risk, liquidity risk, market risk, operational risk and other non-financial risks. The risk management framework adopted by the Bank sets the limits of acceptable risk exposures for each risk and business line and ensures compliance with them.

2.5.1 Risk management mechanisms

The Supervisory Board of the Bank has overall responsibility for establishing and overseeing the risk management framework of the Bank.

The risk management policy of the Bank provides for the identification and analysis of the Bank's risks, the definition of appropriate risk limits and control mechanisms, and the monitoring of risks and compliance with limits. The risk management policy and systems are regularly reviewed to reflect changes in market conditions, products and services offered. The bank, through management standards, procedures and training, has a disciplined and constructive control mechanisms in place where all employees are aware of their roles and responsibilities.

The responsibility of those responsible for risk management includes ensuring the compliance of the Bank with the RAS determined by the Supervisory Board of the Bank. Compliance is ensured through continuous monitoring of RAS parameters. With the active involvement of the Board of Directors, the risk management functions ensure appropriate communication and transparency at all levels, regarding risk targets, continuous monitoring of the risk profile against the risk tolerance, timely escalation of risk alerts and planning of mitigation measures.

2.5.1 Risk management mechanisms (continued)

The risk management framework of the bank includes the following four components:

1. **Risk management principles** provide for the quantitative basis of the risk management structure, namely:
 - ▶ Promoting an effective risk management culture;
 - ▶ Risk accountability across business lines;
 - ▶ Independent central oversight of risks;
 - ▶ Avoiding and/or mitigating excessive concentrations;
 - ▶ Ensuring that risks are clearly identified, assessed and managed.
2. **The strategic principles** provide qualitative indicators that will guide the bank in achieving its regulatory financial objectives and measure the degree of alignment between new initiatives and the risk tolerance of the bank. The strategic principles include the following:
 - ▶ Focus on the diversity, quality and stability of income;
 - ▶ Focus on core business by effectively leveraging the competitive advantages of the bank;
 - ▶ Make disciplined and selective strategic investments.
3. The supervisory financial objectives are focused on the long-term sustainability of shareholder value and the franchising of the operations of the Bank. These objectives are focused on the internal generation of capital based on sustainable profit growth, which facilitates the access of the Bank to capital on appropriate commercial terms, and on maintaining adequate capital in relation to the risk profile of the bank.
4. Risk appetite assessments consider objective indicators that measure risk and formulate the acceptable level of risk. Such indicators provide a link between actual risk-taking operations and risk management principles, strategic principles and supervisory financial requirements. These indicators include capital and income ratios, market and liquidity risk limits, and credit and operational risk objectives and limits.

The Supervisory Board is solely responsible for identifying and controlling risks; however, there are separate independent bodies responsible for risk management and monitoring. The main risks of the Bank are managed by the following committees and units, with the active involvement of the Board of Directors:

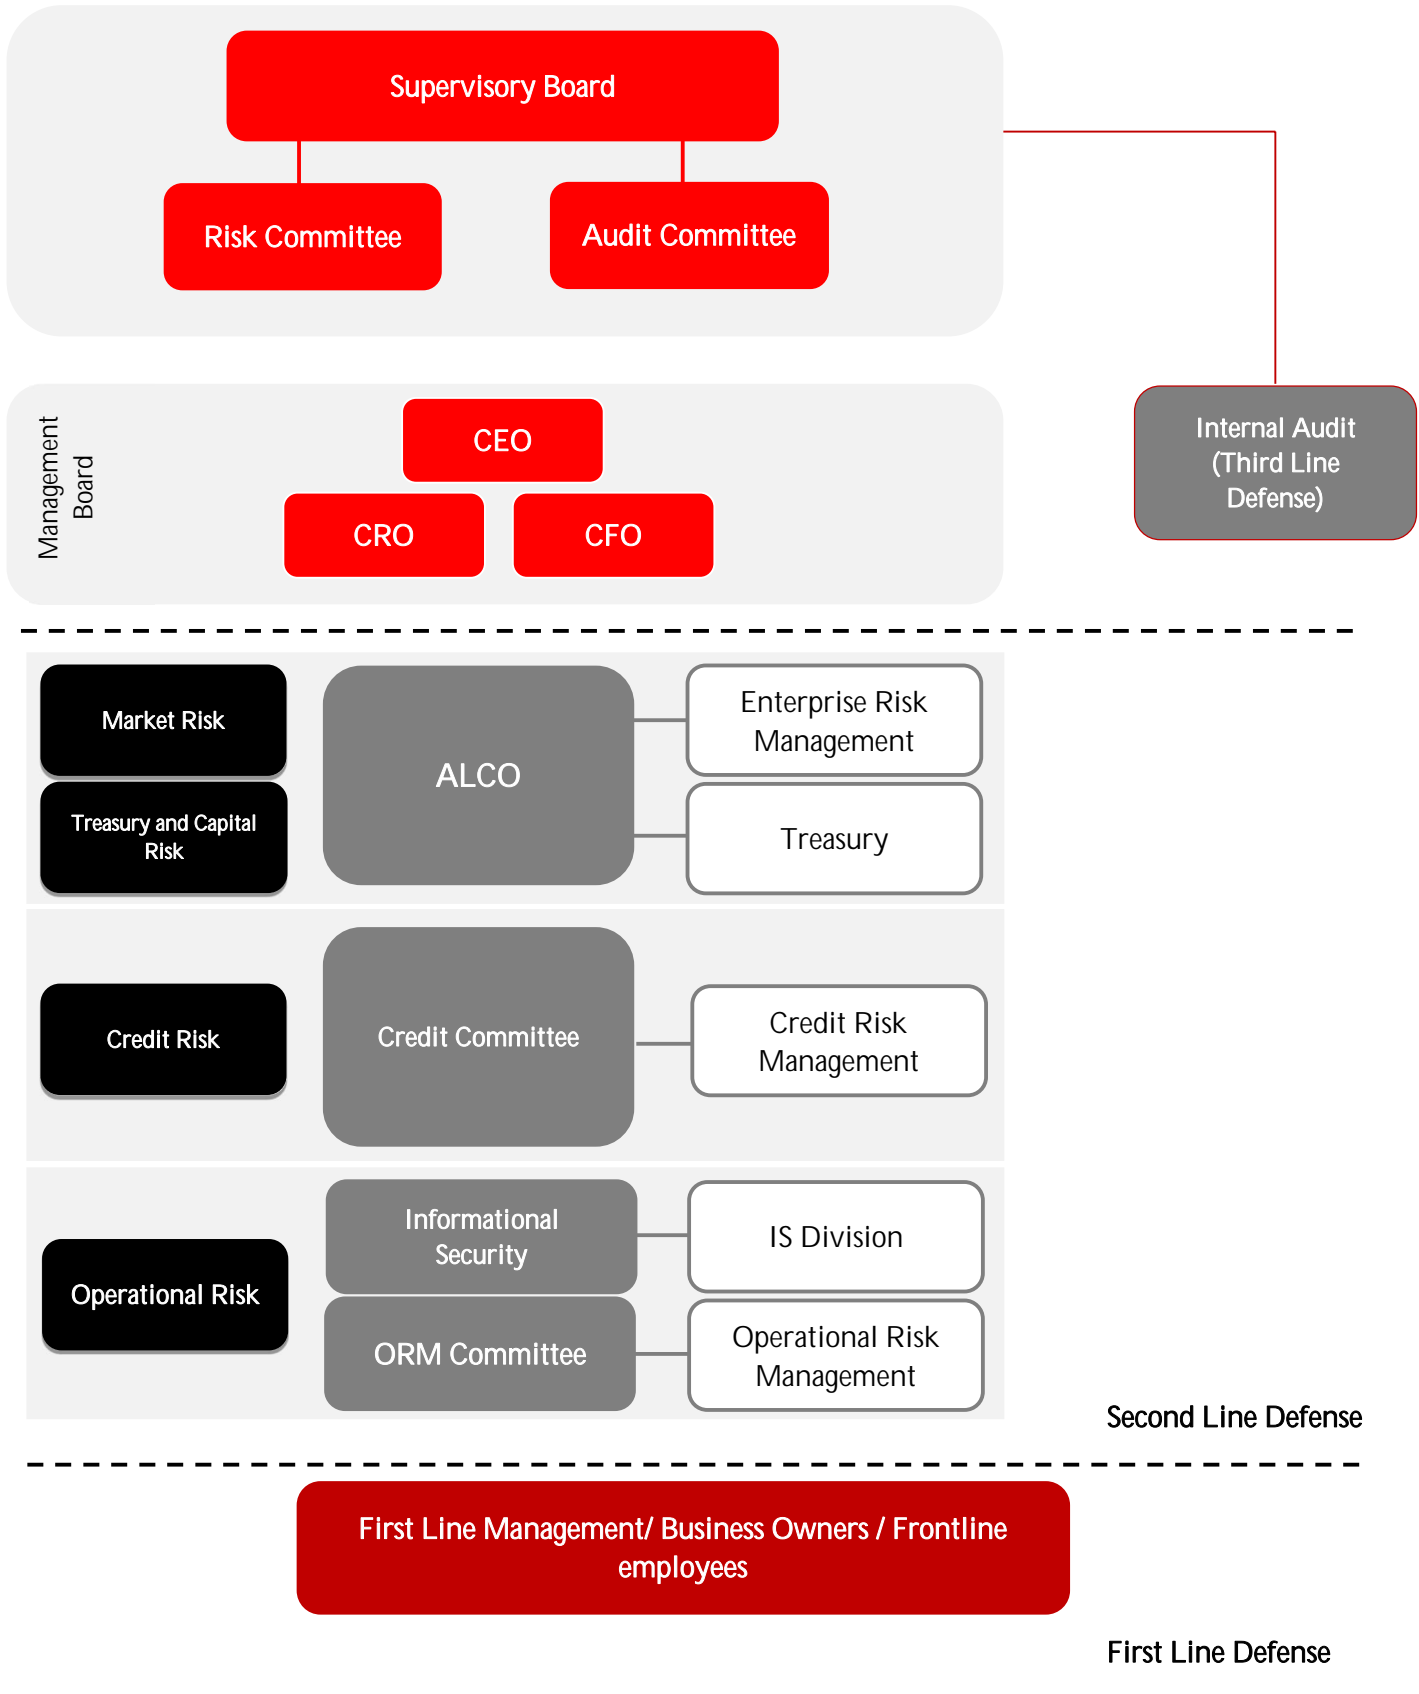

- ▶ Credit risk is managed by the Credit Risk Committee;
- ▶ Liquidity risk is managed by the Assets and Liabilities Committee (“ALCO”);
- ▶ Market risk is managed by the Assets and Liabilities Committee;
- ▶ Operational risk is managed by the Operational Risk Management Committee;
- ▶ Information security and technology risks are managed by the Information Security Committee.

Business lines are primary units responsible for the risks that affect daily activities and operations. Business processes include the control of activities performed by representatives of the relevant risk unit. Units with risk management functions, which are independent of the main activities, are involved in risk management and internal control. They represent the second line of control and protection, the first line of protection being provided by the units with business functions. The following departments/units are responsible for the day-to-day management of credit, liquidity, market, operational and other financial and non-financial risks:

- ▶ Organizational risk management (ERM);
- ▶ Treasury;
- ▶ Credit risk management;
- ▶ Credit administration;
- ▶ Operational risk management (ORM);
- ▶ Information security;
- ▶ Security;
- ▶ Combating money laundering;
- ▶ Compliance with legislation.

2.5.1 Risk management mechanisms (continued)

The table below presents the three defense lines of risk management:

2.5.1.1 Credit Risk Committee

The Credit Risk Committee has overall responsibility for managing credit risks across all business activities at the organization level. The Committee plays a key role in identifying potentially significant credit risks in the portfolio of the Bank and has the final decision-making authority to approve or reject proposed credit risk-related transactions. The Credit Risk Committee has developed credit risk assessment policies and procedures that are consistent with the current risk profile and future growth plans of the Bank. Credit risk departments and units provide information to the Credit Risk Committee. In order to ensure a substantial credit risk environment, comprehensive control and monitoring systems have been implemented, where the functions and responsibilities of staff involved in credit risk management are clearly defined.

The main responsibilities of the Credit Risk Committee are:

- ▶ Review and approve the risk management structure and policy;
- ▶ Approve credit risks within established limits;
- ▶ Manage and supervise on- and off-balance sheet credit and concentration risks;
- ▶ Set credit limits by client category and type of transaction;
- ▶ Predict potential losses related to credit risk;
- ▶ Maintain proper credit administration, assessment and monitoring processes across all business lines.

2.5.1.2 Assets and Liabilities Management Committee

The main functions of the Assets and Liabilities Management Committee are to manage capital, liquidity, interest rate and funding risks. The Committee is chaired by the General Director. The Organizational Risk Management and Budgeting Department provides relevant analytical data for effective decision-making. The Assets and Liabilities Management Committee meets monthly or at any time deemed necessary.

The main objectives of the Assets and Liabilities Management Committee are:

Capital risk	<ul style="list-style-type: none"> • Capital adequacy management and capital forecast analysis according to the NBG; • Economic capital management and analysis of main changes; • Monitoring of early warning indicators and quarterly capital stress testing;
Liquidity risk	<ul style="list-style-type: none"> • Developing a funding plan to avoid excess liquidity, considering the investment capabilities of the Bank; • Monitoring an early warning indicators in conjunction with monthly liquidity stress tests and taking appropriate action based on the results; • Managing liquidity risk mitigation tools and the maturity profile of assets and liabilities;
Market risk	<ul style="list-style-type: none"> • Managing the interest rate and interest rate maturity position • Managing FX position
Pricing	<ul style="list-style-type: none"> • Setting a minimum interest rate for loans and guarantees; • Controlling the effective interest rate on loans issued in relation to pricing;

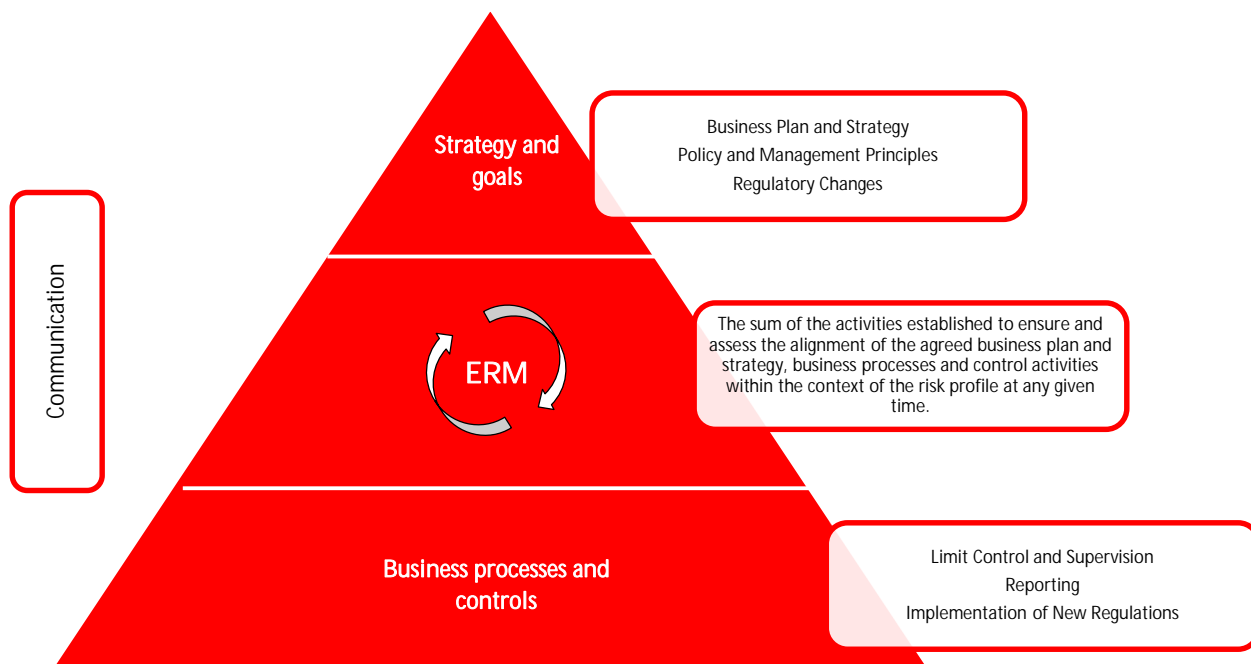

Additionally, the Committee sets limits for interbank counterparty risk. In fulfilling its main responsibilities, the Committee ensures the development and implementation of appropriate asset and liability management policies. This policy is the main guideline for the full monitoring and performance of in-depth analysis of the balance sheet of the Bank and its indicators.

2.5.1.3 Organizational Risk Management

The objective of the Organizational Risk Management and Budgeting department is to maintain an acceptable level of risk for the best balance of threats and opportunities – according to the risk tolerance and the business strategy of the Board and Executive Directors. The Organizational Risk Management and Budgeting Department, along with the development of the organization, is interested in

ensuring the achievement of set goals and the appropriate management of the assets of the organization, including the prevention of losses due to adverse events. This includes issues at all levels of the organization. The role of the Organizational Risk Management and Budgeting Department in governance is illustrated in the table below:

Link between the Governance and Organizational Risk Management and Budgeting Unit

The Organizational Risk Management and Budgeting Department supports the management of risk-related activities, such as risk collection and analysis, risk reporting, and covers issues not covered by a specific risk type. The main functions of the department include:

- ▶ Responsibility for the capital adequacy internal assessment process and recovery plan documentation;
- ▶ Assist the Board of Directors and the Supervisory Board in coordinating the RAS review process and monitoring, controlling and reporting on RAS compliance;
- ▶ Conducting various types of stress tests at the organizational level;
- ▶ Daily communication with the Treasury Department and provision of additional information to ALCO;
- ▶ Supervisory risk management and reporting.

2.5.2 Document on the acceptable level of risk

2.5.2.1 Tolerable risk level

The Supervisory Board of the Bank is responsible for establishing the risk management structure and determining the risk appetite of the Bank. The risk appetite of the Bank is defined in the Risk Appetite Statement (“RAS”). The risk appetite is defined as the types and levels of risk that the Bank is prepared to accept on behalf of its shareholders and depositors in its strategic, tactical and transactional business operations. The risk tolerance is expressed as a set of specific, quantitative limits on various risky activities that a bank should not cross. The RAS also defines various limits to prevent concentration risks on counterparties.

2.5.2.1 Tolerable risk level (continued)

Risk appetite represents the overall ability of the Bank to accept potential losses. A risk profile is a brief reflection of a risk portfolio of the bank at a specific time (past, present or future).

Tolerable risk level is not the ability of the bank to accept risk (and should be less than it), it may also differ from the risk profile of the bank. The risk profile should generally be lower than the risk tolerance. The risk profile may be higher than the risk tolerance in exceptional circumstances (for example, due to a significant change in the risk tolerance and external stimuli of the bank) for limited and short periods of time. In 2017, the new government decided to approve the document on the acceptable level of risk as a separate document.

The tolerable risk level document describes the approaches of the bank to the following risks:

- ▶ Credit risk
- ▶ Treasury and equity risk
- ▶ Market risk
- ▶ Operational risk
- ▶ Other significant risks

The risk tolerance measures of the bank are defined to provide guidelines and safeguards for achieving and improving the strategic objectives of the Bank:

- ▶ Ensuring capital adequacy at all times;
- ▶ Ensuring appropriate liquidity and funding risk management, which includes: maintaining LCR and liquidity ratios above the regulatory minimum requirements; limits on single client exposures; concentration limits; passing stress tests (baseline, soft and severe cases) and achieving and maintaining an appropriately diversified funding structure;
- ▶ Preliminary assessment of the specified risk tolerance level should be submitted to the Supervisory Board for significant new projects/investments, new products, and entry into new market segments or business lines;
- ▶ Maintaining the consistency of sustainable economic benefits with the commitments undertaken.

The Board of Directors reviews and approves the risk tolerance of the Bank annually, or more frequently in the event of unexpected changes, to ensure that it is consistent with the strategy of the Bank, business and regulatory environment, and stakeholder requirements.

Documents related to the risk tolerance level of the bank are regularly presented to the Board of Directors and the Risks Committee of the Supervisory Board.

In the event that the risk profile of the bank exceeds the risk tolerance level set by the Supervisory Board, there should be a specific package of measures, along with the instructions of the Board of Directors, which includes the implementation of these measures in order to bring the risk profile of the bank in line with the risk tolerance level within a specified period of time.

The Board of Directors and heads of all departments are responsible for implementing and adhering to the document on risk tolerance level.

2.5.2.2 Monitoring, reporting and review

The Supervisory Board has ultimate responsibility for managing the overall risk profile of the bank. The Credit Risk Committee, ALCO, Information Security and Operational Risk Management departments and the Organizational Risk and Budgeting Department are responsible for monitoring risks and ensuring compliance with the risk tolerance level. The Organizational Risk and Budgeting Department has overall responsibility for continuously monitoring RAS parameters and limits and reporting on RAS performance to the Supervisory Board on a quarterly basis.

The RAS is reviewed at least annually, or when there are significant changes in the operating environment of the bank, in the case of which the review process is carried out by the Supervisory Board. The Board of Directors may indicate to the Supervisory Board that the RAS requires review, but the Supervisory Board decides when to initiate this process.

The review is coordinated by the Organizational Risk Management and Budgeting Department. Proposed changes to the RAS are confirmed by the Board of Directors and approved by the Supervisory Board.

2.5.3 Risk types

Bank is exposed to various risks in the course of its activities, the most significant of which are set out below. Regulations cover credit risk, market risk, operational risk, and treasury and capital risk. Following the internal capital adequacy assessment process, the Bank calculates the economic capital required to cover all material risks, except liquidity risk.

2.5.3.1 Credit Risk

Credit risk is the risk caused by a counterparty failing to meet its obligations under the terms agreed upon. Typically, these obligations are part of a traditional non-trading credit activities of the bank, specifically loans.

The bank has different categories of credit risk:

- ▶ Default risk - is the risk that a counterparty will be unable to repay a loan liability;
- ▶ Country risk - the risk of creditworthiness of a country, deteriorating unexpectedly or defaulting, caused by social unrest, political instability, war, or other adverse events in the country;
- ▶ Concentration risk - the risk of losing a large position in a single asset or group of assets. This risk arises when the portfolio is poorly diversified in terms of sector and borrower group.

An important part of credit risk management is the approach to estimating and recognizing expected credit losses in the Bank. This approach is based on the requirements of the International Financial Accounting Standard - IFRS 9 and the regulatory document of the National Bank of Georgia "Rules for Determining Risk Categories and Expected Credit Losses for Financial Instruments". Liberty Bank estimates expected credit losses in two directions: in terms of individually significant risk positions and collectively assessed (homogeneous groups) risk positions, for which the Bank has developed two methodologies for the impairment of relevant risk positions.

Individually significant risk exposure (ISRE) and collectively assessed risk exposure (CARE) issued by the Liberty Bank, impairment methodologies based on IFRS-9 are used for both the internal and regulatory reporting purposes of the Bank. This approach fully replaced the previously applicable "Rules for the Classification of Assets and the Creation and Use of Provisions for Possible Losses by Commercial Banks" in the second half of 2023.

The formation of loan impairment provisions under IFRS 9 is based on the ECL (Expected Credit Losses) accounting model, rather than the incurred loss accounting model. The revised IFRS 9 provisioning framework includes the following key principles:

- ▶ Categorizing the financial instruments of the bank by credit risk according to stages of impairment, including:
 - Stage 1 credit risk category includes standard credit instruments that are not impaired or for which the credit risk has not increased significantly since initial recognition.
 - Stage 2 credit risk category includes credit instruments for which the credit risk has increased significantly since initial recognition.
 - Stage 3 credit risk category includes fully impaired (defaulted) credit instruments.
- ▶ For collectively assessed risk positions, DSCR & PTI & LTV ratios are used as triggers for significant increase in credit risk and/or default in the context of homogeneous groups. This is a fundamental change and even without the new requirements of the NBG, it was necessary to implement it. Since the existing qualitative parameters of migrations between impairment stages needed to be updated and improved in response to the risks corresponding to the new business model/products of the bank;
- ▶ The contamination principle applies in the context of clients, per which a significant increase/impairment of the credit risk of one of the borrower's financial instruments leads to a significant increase/impairment of the credit risk of other financial instruments of the same borrower, regardless of whether these instruments are in the same homogeneous group or in different ones;
- ▶ Reclassification of risk exposure categories (improvement of categories) is based on the financial analysis of borrowers as well as 3, 6, 12 consecutive demonstration payment histories;
- ▶ Special reclassification and provisioning approaches are in place for modified financial instruments (MFIs), repeated restructurings, and refinanced loans;
- ▶ To assess the expected credit losses of collectively assessed risk positions, the CCF (Credit Conversion Factor) concept is applied to the off-balance sheet liabilities of the bank, which is based on the practice adopted by the Basel Committee on Banking Supervision. Accordingly, the bank will use credit conversion factors for short-term and long-term risk positions in the context of Stage 1, Stage 2, Stage 3 categories;
- ▶ The Bank uses an individual assessment approach for business loans of \geq GEL 500,000 and for all gold wholesale pawnshop (GWP) exposures, where unified approaches to ECL assessment have been implemented, which considers the assessment of companies using S&P GMI's PD&LGD scores and the assessment of expected credit losses.

2.5.3.1 Credit Risk (continued)

The key risk parameters required to estimate expected credit losses are determined within the context of homogeneous groups using specially developed methodologies, including:

- ▶ The probability of default (PD) is determined using the so-called Months on Book approach for collectively assessed risk exposures (CARE). For individually significant risk exposures (ISRE), the S&P Generic Corporate Scorecard is used for this purpose.
- ▶ To determine the loss given default (LGD), in the case of CARE, Recovery Rate approach based on the periods in default is used (AGE), while in the case of ISRE - the S&P Corporate & Leverage Finance LGD Scorecard is used.
- ▶ To estimate the exposure at default (EAD), the bank has implemented a sophisticated model that consists of three main determinants:
 - TTD (Time to default) - The determinant determines the risk position in a specific homogeneous group, on average, during the next 12 months after the reporting month, risk position defaults in which months. This indicator is recalculated once a year, at the beginning of the year, namely in January. TTD - is a time indicator and is measured in months.
 - FPAG (Future Payments According to the Graphics) - The amount of payments provided for in the loan schedule.
 - Prepayment Rate – The prepayment rate is a percentage of the risk exposure that shows the real potential for additional debt reduction by a borrower in a specific homogeneous group, in addition to the payments provided for in the risk exposure schedule. The prepayment rate shows what amount the client was supposed to pay according to the schedule and what he actually paid to the bank. If the amount actually paid exceeds the amount provided for in the schedule, then the difference between them is considered prepayment, otherwise prepayment = 0. This rate is a percentage.

The process of calculating credit risk parameters and estimating expected credit losses is carried out automatically at the technical level, with minimal manual intervention, which significantly reduces the inferred risk of the operational risks of the bank and is one of its powerful mitigants. The automated process includes the calculation of MOB, AGE, PD, LGD, EAD, STAGE parameters in the context of various methodologies. The automated calculation process allows the bank to technically simplify the process of disbanding homogeneous groups and forming new groups, which creates opportunities for the formation of homogeneous groups corresponding to new challenges arising from the new business model of the bank.

2.5.3.2 Market Risk

Market risk is the risk that affects the performance of financial markets. The main types of market risk include interest rate and exchange rate risk and their level of volatility. Market risk arises primarily from trading activities. It includes the risk of loss associated with the revaluation of shares, as well as losses caused by changes in interest rates and exchange rates, which are affected by market volatility.

2.5.3.3 Operational risk

Operational risk is the risk of incurring losses that may arise from failed internal processes, human actions, system failures or deficiencies and/or external factors (including, but not limited to, internal and external fraud, flood, fire, earthquake, terrorist or cyber-attacks). Operational risk includes legal risks, but excludes strategic and reputational risks.

Classification of operational risks:

- ▶ Business process-related risk - refers to the risk of process failure caused by its improper definition and/or connection to other processes, or by inadequate documentation and/or control of the process;
- ▶ Information technology-related risk - includes both the disruption and their overall failure of individual systems during the implementation of banking activities.
- ▶ Persons-related risk - refers to the risk of management error, organizational structure failure, or human resource failure, e.g. violation of established policies and procedures. These risks may be increased or exacerbated by ineffective training, inadequate control mechanisms, staff shortages, or other factors;
- ▶ Fraud-related risk - any unlawful action committed against the bank by bank employees, clients or third parties, with the aim of causing damage to the bank and/or obtaining financial benefits (internal and external fraudulent actions);
- ▶ External risks - include events that are not related to the core business of the bank, but can affect its operations (floods, fires, earthquakes, terrorist attacks, states of emergency/war, etc.).
- ▶ Artificial intelligence-related risk - risk related to computer programs and artificial intelligence modules (including, but not limited to, machine learning, computer biometrics, predictive modules).

2.5.3.4 Treasury and capital risks

Treasury and capital risk includes liquidity and capital risk. Liquidity risk is the financial risk that arises from the potential inability of the Bank to pay its obligations on time, or from incurring excessive costs in meeting these obligations. The Bank divides liquidity risk into two types:

Market Liquidity - Market liquidity risk is the risk that a bank will not be able to buy or sell an asset without materially changing prices and incurring large transaction costs.

Funding Liquidity - Funding liquidity risk arises when a bank is unable to pay its obligations when they fall due, or when a bank is unable to satisfy customers who wish to withdraw their deposits.

Capital risk arises from the inadequacy of capital to support risk positions resulting from normal business activities, unmet dividend demands, increased funding costs due to investors' risk tolerance or credit rating deterioration, and failure to meet regulatory capital requirements in a normal operating environment.

2.5.3.5 Macroeconomic risk

The macroeconomic situation affects profitability, portfolio quality, and growth rate of the bank. The main factors that directly affect the Georgian banking sector are:

- ▶ GDP growth rate;
- ▶ Unemployment rate;
- ▶ Exchange rate;
- ▶ Inflation;
- ▶ Real interest rate;
- ▶ Business and consumer expectations;
- ▶ Fiscal and current account imbalances;
- ▶ Political cycle.

At the same time, Georgian economy is dependent on the economic and political situation of neighboring countries. These factors can affect exports, tourism, remittances, and foreign direct investments.

2.5.4 Recovery plan

The bank establishes a Recovery Plan, which provides for possible recovery paths in the event that the bank finds itself in a problematic situation. The Recovery Plan is an additional risk management tool and its purpose is to shorten the recovery period and minimize losses in the event of a crisis. Based on the overall risk profile of the bank and the risks specific to the bank, the plan provides for specific triggering factors, under which the Board of Directors should activate the Recovery Plan.

The recovery plan describes and identifies events that could trigger the recovery plan. In order to consider the critical volumes that trigger the recovery plan, a baseline forecast (as provided in the budget) scenario analysis was conducted. Since the exact nature of the event that will cause stress on the bank is not known in advance, the plan should be flexible in response to the severity of stress events and include a list of possible solutions that can be used as needed. The plan describes the relevant mitigating factors/actions and the effects of their use on existing stresses.

The recovery plan indicators are monitored monthly by the Organizational Risk Management and Budgeting Department. Any potential triggering events are reported to the Board of Directors and discussed at a meeting. If activated, the recovery plan strategy will be implemented under the supervision of the Board of Directors.

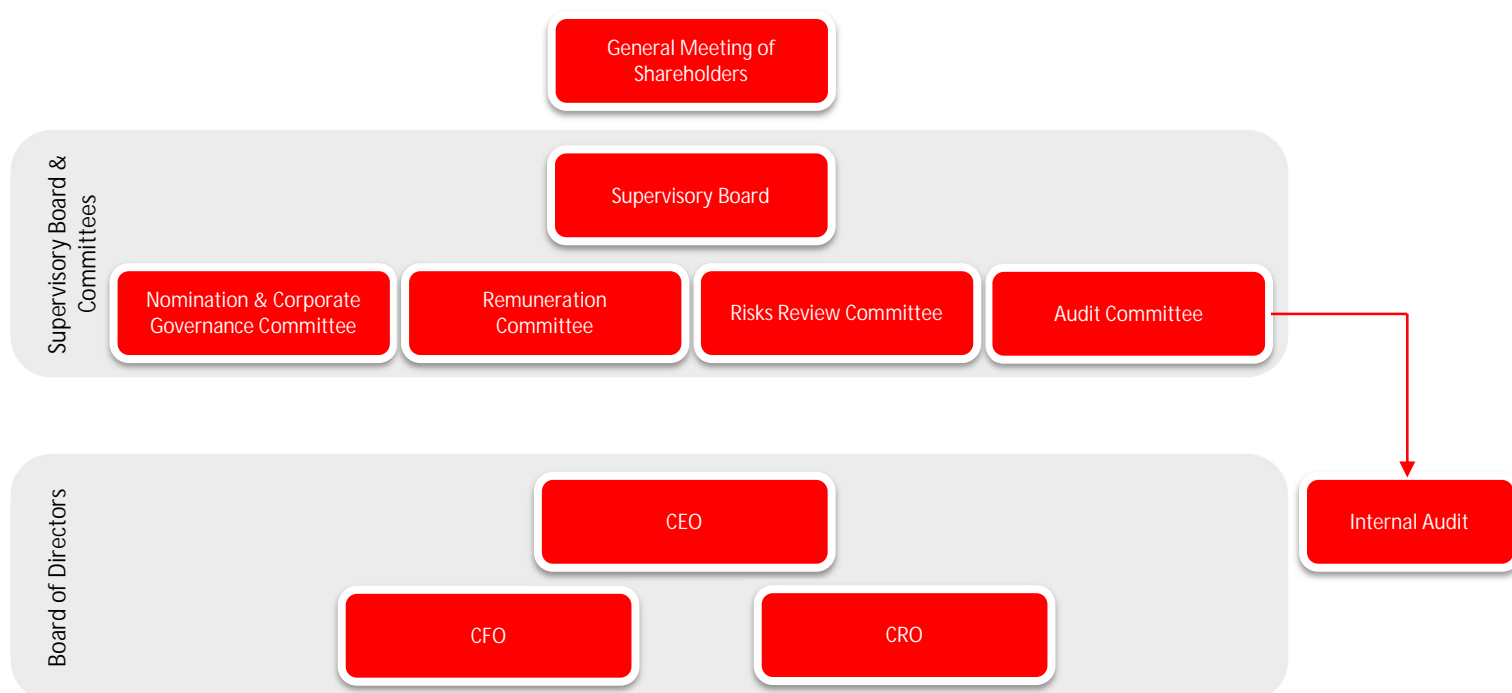

3 Corporate Governance Reporting

The Corporate Governance Framework outlines the corporate governance structure, principles, policies and practices of the Liberty Bank that enable the bank to meet the expectations of the National Bank of Georgia and the Georgian Stock Exchange.

To protect the interests of shareholders and other stakeholders, corporate governance system of the Liberty Bank is subject to ongoing review, evaluation and improvement. The Supervisory Board actively implements governance policies and practices designed to align the interests of the Supervisory Board and the Board of Directors with the interests of shareholders and other stakeholders and to promote the highest standards of ethical conduct and risk management at all levels of the organization.

Common shares of Liberty Bank are listed on the Georgian Stock Exchange.

The corporate governance framework of the bank is fully compliant with local and international standards. The established policies and procedures applied by the Supervisory Board and Board of Directors are described in other sections of the Pillar 3 Report. The fundamental relations between the Supervisory Board, its committees, management, shareholders and other stakeholders are based on the governance structure of the bank, which is presented below. They establish the ethical values of the Bank's governance, strategic and corporate objectives and define the plans for achieving and monitoring these objectives. The diagram below shows the overall organizational structure of the Bank as of December 31, 2025:

3.1 Annual General Meeting of Shareholders

Annual General Meeting - "AGM" is a mandatory annual meeting of the shareholders of the bank. At the Annual General Meeting of Shareholders, the Supervisory Board/Directorate presents an annual report, which includes information to shareholders about the performance and strategy of the company. Shareholders with voting rights make decisions on issues such as the election of members of the Supervisory Board, determination of their remuneration, payment of dividends, selection of an external auditor, change of the Bank's authorized and/or subscribed capital and other issues specified by applicable law and/or the Charter of the Bank.

3.1.1 Invitation to the Annual General Meeting

According to the Charter of the Bank, the Annual General Meeting shall be convened by the Supervisory Board within two months of the completion of the external audit of the accounts of the Bank and in any case within six months of the end of the previous financial year. Matters not discussed by the Annual General Meeting and falling within the scope of the Annual General Meeting's responsibilities shall be considered and resolved at Extraordinary General Meetings (EGMs). The number of Extraordinary General Meetings during the year is not limited and may vary from year to year. An EGM may be convened at the written request of the Supervisory Board, the Board of Directors or a shareholder holding at least 5% of the shares. Shareholders who are not present at the Annual General Meeting may grant a proxy to a third party who may vote on their behalf.

3.1.1 Invitation to the Annual General Meeting (continued)

The General Meeting of Shareholders is chaired by the Chairman of the Supervisory Board or, in his/her absence, any member of the Supervisory Board. In the absence of the members of the Supervisory Board, the meeting is chaired by the General Director.

All shareholders registered on the record date of the AGM and/or EGM are entitled to attend the meeting and vote (if applicable). Shareholders who are not present at the Annual General Meeting are entitled to vote by proxy.

3.1.2 Functions of the Annual General Meeting

According to the legislation of Georgia and the Charter of the Bank, at the annual general meeting, shareholders can make decisions on the following issues:

Corporate Management

- Adoption, approval and amendment of the Charter.
- Consolidation, merger, dissolution, liquidation, reorganization and/or transformation of the Bank.
- Election and dismissal of members of the Supervisory Board.
- Increase or decrease of the authorized and paid-up capital of the Bank.
- Issuance of new shares within the authorized capital.
- Redemption of own shares by the Bank

Rights of Approval

- Approval or rejection of the reports of the Supervisory Board and the Board of Directors.
- Approval of the annual report and statements.
- Selection, appointment and dismissal of the independent auditor.
- Approval of the proposal of the Supervisory Board and/or the Board of Directors on the distribution of profits or adoption of a decision on the distribution of profits in the event that the aforementioned bodies do not submit a joint proposal.

Rights of control

- Decisionmaking by the bank regarding the acquisition, alienation, transfer, exchange (or related transactions) or encumbrance of property, rights, assets, the value of which exceeds 20% of the bank's equity.

3.1.3 Shareholders' Meetings and Decisions Held in the first half of 2025

The Annual General Meeting of Shareholders was convened on the basis of the minutes of the meeting of the Board of Directors dated on 5 June 2025. The decision to convene the general meeting and the agenda of the general meeting following the procedure provided for by the Law of Georgia on Entrepreneurs was published on the electronic portal of the registration authority, on the Bank's authorised web-page. The decision was made on the issues falling within the competence of the General Meeting, including:

- ▶ Approval of the 2024 audited consolidated financial statements of the Bank;
- ▶ Issuance of dividends on preferred and common shares issued by the Bank;
- ▶ Extension of the maturity term of member of the Supervisory Board of the Bank;

3.1.4 Communication and media announcements

The time, place and agenda of holding both the Annual General Meeting and the Extraordinary General Meeting shall be published on the website of the authorised user of the Unified Electronic Portal Bank of the National Agency of Public Registry, at least 21 days before the date of the meeting. According to the requirements of the legislation, the results of voting on the issues discussed at the general meeting shall also be published on the Bank's website.

3.2 Supervisory Board

The responsibilities of the Supervisory Board are:

- ▶ Promoting the highest standards of corporate governance in the bank;
- ▶ Following the interests of shareholders, to support the development of the bank and to create and ensure sustainable values;
- ▶ Supporting the long-term growth of the bank by the management bodies and maintaining an effective internal control system;
- ▶ Approval of the Bank's annual budget and development strategy.

3.2.1 Composition of the Supervisory Board

According to the Charter, the Supervisory Board shall consist of at least three members. According to the regulation adopted by the NBG, which came into force from June 1, 2018, a member of the Supervisory Board shall not be part of the Directorate and shall not carry out executive functions.

From its own composition, the Supervisory Board shall elect a chairperson who shall convene meetings of the Supervisory Board, determine the agenda and sign the minutes of the relevant meeting, together with the secretary of the meeting. A meeting of the supervisory board may be held by telephone or video conference.

31-December-2025	Supervisory board members
Chairman (Independent Member)	Murtaz Kikoria
Board Member	Irakli Otar Rukhadze
Independent Board Member	Magda Magradze
Deputy Chairperson, Senior Independent Member of the Council	Mamuka Tsereteli
Independent Board Member	Bruno Juan Balvanera

3.2.2 Education and experience of the Supervisory Board

The members of the Supervisory Board have a wide range of knowledge and experience in financial analysis, capital markets, financial reporting, information technology, strategic planning, risk management, returns, supervisory requirements, corporate governance and management and, at the same time, have the skills necessary to promote diversity of views. They have relevant knowledge of local, regional, global, economic and market trends and legal and supervisory environments. The diversity of their experience and skills plays an important role in reducing risks in favor of the interests of the bank and its shareholders.

Irakli Otar Rukhadze

Skills and experience:

Irakli Otar Rukhadze was elected as the Chairman of the Supervisory Board of JSC Liberty Bank in October 2017 and held this position until 2021. Since 2011 he has been a partner at Hunnewell Partners (UK) LLP in London. Irakli was the CEO and partner of Salford Capital Partners LP Salford Georgia in Tbilisi. As CEO, Irakli Rukhadze led Salford's Georgian operations and at the same time was responsible for specific directions (telecommunication, real estate) outside the country. He has successfully implemented many well-known business transactions in Georgia. Under his supervision and leadership, Georgia's economy attracted about \$150 million. In 2001-2003 he was the founder and partner of Argo Ventures LLC in Boston, Massachusetts. The company is focused on consulting with private companies – including consultations on unsecured capital issues. Among the clients was Global Realty Outsourcing - a successful company in the field of US real estate analysis, whose investor list is currently enrolled by Citigroup and First Union Securities. In addition to this, Irakli was the founder and CEO of Caucasus Advisors LLC in Boston,

Massachusetts, and his responsibilities included the management of a multi-million-dollar investment fund to invest in companies in the Caucasus region. He also held the position of Engagement Manager at McKinsey & Company Inc. in Boston, Massachusetts and Düsseldorf, Germany, where he led consultations and was involved in problem solving for the improvement of the activities of the client's company. From December 30, 2021, following the best principles of corporate governance, Irakli Rukhadze resigned from the position of Chairman of the Supervisory Board and continues his work with the mandate of a member of the Supervisory Board, and an independent member, Murtaz Kikoria, was elected as the head of the Board.

Education:

Irakli Otar Rukhadze graduated with a Master's Degree in Business Administration from Tuck School of Business at Dartmouth College; He is also a graduate of Tbilisi State University with a Master's degree in Mathematics and Economics.

3.2.2 Education and experience of the Supervisory Board (continued)

Murtaz Kikoria

Skills and experience:

Murtaz Kikoria was elected as an independent member of the Supervisory Board of JSC Liberty Bank in June 2019. In July 2019, he was elected Chairman of the Risk Committee of the Supervisory Board, and since 2021 he successfully holds the position of Chairman of the Supervisory Board. Murtaz has extensive experience with the banking and financial sector. He held the positions of Director General in the leading companies/groups of the sector, in particular, in 2015-2016 at JSC Bank of Georgia and in 2012-2014 - "Georgian Healthcare Group". He also has many years of experience as Chief Financial Officer at JSC Bank of Georgia and a Senior Banker at the European Bank for Reconstruction and Development (EBRD). Consequently, his knowledge and experience in finance, capital markets and the market in general is very important and valuable for the bank. Murtazi's outstanding experience in the banking and financial field is further deepened by his management, control and supervision skills that he acquired in the early 2000s while working as Head of the Banking Supervision and Regulation Division at the National Bank of Georgia. After

that, he successfully continued working as the Vice President of the National Bank of Georgia in 2016-2018. From December 30, 2021, Murtaz Kikoria has taken the position of Chairman of the Supervisory Board.

Education:

Murtaz graduated from the Faculty of Economics (Finance and Credits) of Tbilisi State University. His academic knowledge is also rich in many important local and international conferences, trainings and seminars on banking operations, financial markets, funding, negotiations and leadership, anti-money laundering and other relevant issues related to the banking sector.

Magda Maghradze

Skills and experience:

Magda Magradze joined Liberty Bank JSC in August 2019. In October 2019, she was elected chairman of the Remuneration Committee and in September 2022 as chairman of the Audit Committee. Magda is the only female member of the Supervisory Board. She has special experience in project management, strategic planning, finance, monitoring, control and reporting. She currently serves as the CEO of the Millennium Challenge Fund - Georgia. Under her leadership and supervision, the company has successfully implemented several projects. Currently, this organization is implementing a long-term project that will cost tens of millions of dollars. The main goal of the project is to develop general, vocational and higher education in Georgia, as well as to rehabilitate, equip and manage professional development of public schools. In 2008-2013, Magda worked as an Academic Support Program Manager at the Open Society Georgia Higher Education Foundation. The program was mainly focused on the development of education in the South Caucasus by creating a local, regional and global academic network. As a result of her work and tireless efforts, many exchange

education programs were implemented in Georgia. Thanks to her outstanding skills and experience, Magda gives the Supervisory Board a high level of diversity, independence, professionalism and control. The Supervisory Board and the Bank in general are balanced in terms of performing business operations and managing risks.

Education:

Magda graduated from the Faculty of Law of Tbilisi State University and was awarded the title of Lawyer. She is also an alumni of in economic relations of Tbilisi State University with the degree of economist.

3.2.2 Education and experience of the Supervisory Board (continued)

Mamuka Tsereteli

Skills and experience:

Dr. Mamuka Tsereteli was elected as an independent member of the Supervisory Board of Liberty Bank in December 2018. In January 2019, he was appointed Chairman of the Audit Committee and Deputy Chairman of the Supervisory Board, a senior independent member of the Board, and in September 2022 as Chairman of the Nomination and Corporate Governance Committee. Dr. Tsereteli is the President of the America-Georgia Business Council, Founder and Director of the Georgian House of Greater Washington, LLC, and Senior Researcher at the Central Asia-Caucasus Institute at the American Foreign Policy Council. He is also a faculty member at the School of International Service of American University (Washington, DC & John Hopkins SAIS).

Until May 11, 2013, Mamuka served as the Director of the Center for Black Sea-Caspian Studies at the American University School of International Service (SIS). Prior to that, he worked as an assistant professor (2007-2011) and was an adjunct faculty member of the American University (2002-2007). From 2006 to 2007, Mamuka was a member of the Faculty of the Elliott School of International Affairs, where he taught energy and public safety.

For 12 years, Mamuka worked as the Executive Director of the America-Georgia Business Council (AGBC). He is currently the president of the organization. The Council is a key tool for promoting U.S. business interests in Georgia and U.S.-Georgia trade and economic cooperation. Mamuka's name is associated with more than 20 annual AGBC conferences, which has become a series of the most popular forums for public and private dialogue between the Georgian-American economic partnership. In addition to the annual conferences, Mamuka led and organized many strategic planning sessions focused on political and economic development in Georgia. These sessions were attended at various times by representatives of international financial institutions (IMF, World Bank, IFC, EBRD), US exporting agencies (Ex-Im Bank, OPIC, TDA), donor agencies (USAID, MCC), representatives of the U.S. and Georgian government, private companies and experts in the region. In 2007-2008, Mamuka Tsereteli led the U.S.-Georgia Business Council for Georgia Tourism Strategy and Investment Plan Project, funded by the U.S. Trade and Development Agency.

Education:

Dr. Tsereteli graduated from Tbilisi State University and holds a Master's degree in Economic Geography. He also holds a master's degree in science from the University of Maryland College and a PhD from the Russian Institute of Economics and Forecasting.

Bruno Juan Balvanera

Skills and Experience:

Bruno Juan Balvanera joined Liberty Bank JSC in August 2022 as an independent member of the Supervisory Board, and from September 2022 he successfully holds the position of Chairman of the Risk Committee. Bruno Balvanera has more than 35 years of experience in the banking/investment field, including 23 years in various positions in the EBRD, both at the headquarters (London, UK) and in regional offices (St. Petersburg, Moscow, Tbilisi and Nursultan). From 2013 to 2018, Bruno Balvanera was Regional Director for the Caucasus, Moldova and Belarus, managed from Tbilisi and then the Managing Director of the Central Asia region until 2020, where he oversaw investment activities in 6 countries.

Bruno Balvanera's experience includes private sector investment in sustainable development and successful expert knowledge in investment, risks, compliance, legal, social and environmental standards, inclusiveness and renewable energy.

Bruno Balvanera held the position of a member of the Board of Trustees of several companies, including being elected as a non-executive director at Asaka Bank (Uzbekistan) in late 2020, and in August 2022 he was elected as an independent member of the Supervisory Board of Qishloq Qurilish Bank (QQB) (Uzbekistan) and chairman of the Nomination and Remuneration Committee. He is also a private investor in fintech, is involved in international business and academic studies, and is also a strategy consultant.

Education:

Bruno Balvanera holds a master's degree in strategy and business administration from the University of Chicago Booth (USA). He also graduated from the University of Mexico ITAM in Finance and Universidad Iberoamericana in Political Science.

3.2.3 Diversity and independence of the Supervisory Board

The Supervisory Board believes that the diversity of skills, professional careers, knowledge and experience is important for conducting business effectively. The Supervisory Board works with its nomination and corporate governance committee to ensure that skills, experience, independence and banking knowledge are properly balanced to fulfill their responsibilities.

The Supervisory Board complies with the Corporate Governance Code of commercial banks with the number of independent members of the Board. In addition, in order to ensure a high degree of independence and impartiality, the committees of the supervisory board are staffed only by independent members. Each member of the Supervisory Board is and/or has previously held a high position in various related fields, as a result of which they bring valuable concepts with their experience and vision to the activities of the Supervisory Board and make a significant contribution to the decision-making process. No natural person or group of natural persons has the opportunity to control the decision-making process.

Before the appointment of a member of the Supervisory Board, the appropriateness and independence of a member of the Supervisory Board is assessed following the requirements of the Corporate Governance Code of Commercial Banks and the Regulation on the Criteria for Compliance of Administrators of Commercial Banks. In addition, the Bank approved an updated policy of appointment, suitability and diversity of administrators, where a list of administrative positions was determined following the requirements established by the legislation, the principles, criteria and requirements for their selection were determined in detail regarding the education, experience, personal / professional qualities and skills of the person and other important issues.

3.2.4 Functions of the Supervisory Board

To ensure that the supervisory board is involved in the process of effective control, specific decisions require approval by the supervisory board. Below are the issues that are under the competence of the Supervisory Board:

3.2.4 Functions of the Supervisory Board(continued)

Strategy and Management	<ul style="list-style-type: none"> • Overseeing the overall management of the bank; • Approving the commercial and investment strategies of the bank, annual budgets and making decisions on significant changes; • Controlling the activities of the bank;
Financial Reporting and Control	<ul style="list-style-type: none"> • Ensuring maximum efficiency of the operations of the bank; • Exercise of voting rights in any major subsidiary of the bank; • Review of financial and accounting documentation and assets;
Risk management framework and risk appetite	<ul style="list-style-type: none"> • Identify and control all significant risks of the bank; • Define and approve the risk management strategy and risk appetite; • Define specific measures in the event that the risk profile of the bank exceeds the acceptable risk level;
Internal Control Mechanisms	<ul style="list-style-type: none"> • Adoption, termination or amendment of the regulations or similar rules of the Supervisory Board regarding the internal organization of the Supervisory Board; • Establishment of Supervisory Board Committee(s); • Taking specific measures based on the recommendations of the committees; • Approval of action policies regulating particularly important issues.
Contracts	<ul style="list-style-type: none"> • Approval of significant loans if the total risk position exceeds 5% of the own capital of the bank; • Transactions with related parties, following the Conflict of Interest Management Regulation; • Acquisition/disposal of any asset, or conclusion of any other type of agreement, the value of which exceeds 1,000,000 USD; • Conclusion or termination of long-term cooperation with a legal entity or company, if it gives rise to an obligation of 1,000,000 USD per year or the right to receive the same amount;
Appointments and remuneration	<ul style="list-style-type: none"> • Changes in the structure, size and composition of the Management Board; • Appointment and removal of the Management Board members, Audit Committee members and other members of the Supervisory Board of the bank; • Determining the remuneration policy for the Management Board; • Selection, retaining and dismissal of independent share registrar of the Bank;
Corporate Management	<ul style="list-style-type: none"> • Supervising the activities of the Board of Directors; • Providing instructions to the Board of Directors on the general directions of the various policies of the Bank; • Approving and supervising transactions with related parties; • Analyzing the general corporate governance system of the Bank, reviewing the annual report and the Board of Directors' proposals on profit distribution; • Issuance of securities; • Establishing a new subsidiary;
Other	<ul style="list-style-type: none"> • Initiating, conducting or resolving any dispute where the amount in dispute exceeds \$500,000, or involves a criminal case or a person in a management position at the bank; • Establishing a partnership or joint venture with any person; • Making any political contribution or political donation;;

The Supervisory Board represents also a decision-making body regarding all matters that are important to the bank from a strategic, financial or reputational point of view.

3.2.5 Activities and meetings of the Supervisory Board

Meetings of the Supervisory Board (the "Meeting") are held at least once a quarter at the legal address of the bank or at the request of any member of the Supervisory Board, in any other place. In agreement with all other members, the Chairperson (at the request of himself or any member) may convene a meeting in oral form or otherwise in a short period of time. Members of the Supervisory Board may be represented by other members of the Supervisory Board. Each member shall have the right to represent only one other member of the Supervisory Board. Issues that require decision-making outside the planned meeting will be discussed at special extraordinary meetings and telephone conferences. Overall, in 2025, the Supervisory Board was officially assembled 20 (twenty) times and decisions were made both in the format of regular meeting held via direct meeting and through a telephone conference. During the meetings, the Supervisory Board receives updated data on the main business directions, financial condition, control from internal operating functions and risk management, compliance, important transactions that fall under the competences of the Internal Audit and Supervisory Board. In addition, there is an annual schedule of agenda to ensure that all issues are given due attention and discussed in the relevant section in the financial and normative cycle. This includes annual budget, strategic development plan, and remuneration of the Management Board and material risk takers (MRT). In addition to the meetings directly, the chairperson and members of the Supervisory Board shall have frequent professional and constructive relationship with each other, as well as with the Director General, the managers of controlling functions and other important business units. Among the issues discussed and approved in 2025, it is especially important to approve revised versions of risk management framework and business continuity policy, amendments to recovery plan of the Bank and also approved revised version of Risk Appetite Statement.

3.2.6 Assessment of the activities of the Supervisory Board

The Supervisory Board constantly cares about improving its efficiency and recognizes that its evaluation process is an important tool for achieving this goal. The Supervisory Board is an effective body that creates a proper balance of competence and experience and combines a wide variety of opinions and perspectives. According to the requirements of the Corporate Governance Code of commercial banks, Liberty Bank has approved the assessment policy of the Supervisory Board, based on which the Supervisory Board of the Bank annually evaluates its activities, as well as the efficiency of the committees and individual members of the Board, in order to determine the proper engagement, qualification, suitability and effectiveness of the Unified Collegiate Body, as well as independent members and the Chairman. According to the evaluation policy, every three years an evaluation also will be carried out by an independent evaluator to determine suitability and effectiveness.

In accordance with the mentioned request, for 2025, PricewaterhouseCoopers ("PwC") of the Big Four assessed the efficiency of the work of the committees of the Board and the Board itself. The assessment was conducted using a 5-level rating system (basic, developing, defined, managed, and optimized) across five key areas: the effectiveness of the Supervisory Board's self-assessment policy, the roles and responsibilities of the Supervisory Board, the committees established under the Supervisory Board, the organizational and corporate structure, and coordination with other functions of the Bank. Overall, across all five areas, the aggregate assessment results are rated as "managed" (Level IV), which indicates the effective functioning of the Supervisory Board and its committees. Furthermore, the Bank ensures the consideration and implementation of PwC's recommendations within the assessment process, including the enhancement of the Supervisory Board's self-assessment questionnaire, the periodic review of approved policies and the approval of updated versions as necessary, as well as the submission of reports prepared by the Compliance Department to the Risk Committee, in addition to those prepared by the Chief Risk Officer for committee members; this will improve the management's reporting process to the Supervisory Board.

In the meantime, as part of the annual self-assessment, the Supervisory Board members evaluated their own performance for the year 2025. The results were generally positive. Specifically, the assessment highlighted that the Supervisory Board effectively oversees management, internal control, and risk management. The Board's regular meetings, comprehensive reporting, and open communication style ensure that each member remains fully informed and actively engaged in the decision-making process. The Chairman's involvement and efforts to encourage accessible communication across the Board were highly commended. At the same time, the self-assessment identified specific areas to further enhance the Board's productivity. Members recommended allocating additional time for the in-depth review of submitted documents to further elevate the quality of deliberations. Additionally, the Board recognized the need for more frequent communication with the National Bank regarding regulatory updates and the provision of periodic training in information security to ensure their competencies align with contemporary technological challenges. Furthermore, the members believe that rotating committee memberships at this stage is advisable to facilitate the sharing of fresh perspectives during the working process. Overall, the Board's activities were assessed as effective, progress-oriented, and focused on continuous improvement.

The Bank remains dedicated to the ongoing refinement of the Supervisory Board's evaluation and self-assessment processes. To this end, the self-assessment questionnaire is periodically updated and made more comprehensive to cover all aspects of governance and ensure a deep analysis of the Board's operational efficiency. This approach enables the evaluation process to remain highly objective and ensures that the Bank consistently adheres to best corporate governance practices.

3.3 Supervisory Board Committees

According to the requirements of the Corporate Governance Code of Commercial Banks, there must be the following committees with the Supervisory Board in system commercial banks:

1. Audit Committee
2. Risk Committee
3. Nomination and Corporate Governance Committee
4. Reimbursement Committee

In terms of the number of committees, their arrangement and composition, the Bank is in full compliance with the Corporate Governance Code of commercial banks.

3.3.1 Audit Committee

The audit committee is responsible for monitoring the performance of internal control functions, supervising the implementation of the annual action plan by the Internal Audit Department, and communication with external independent auditors. The Committee also gives recommendations on a possible weakness of the internal control mechanisms of the Supervisory Board.

The audit committee oversees the compliance of the Bank with internal policies related to bribery and corruption, conflict of interest management and disclosure. In view of the above, the audit committee considers that its internal control framework is effective.

The Committee is an independent structural unit and shall be subject to the Supervisory Board. As of December 31, 2025, the Committee consists of the following members:

- ▶ Magda Magradze (Chairman);
- ▶ Mamuka Tsereteli (member of the committee);
- ▶ Murtaz Kikoria (member of the committee).

The audit committee meeting is held at least quarterly and, if necessary, an extraordinary meeting may be convened at any time.

Key Roles and Responsibilities of the Audit Committee:

1. Defining the accounting and reporting rules of the bank, observing these rules and checking bank records and logs through internal audits of the bank;
2. Supervision of the compliance of the bank with the current legislative and regulatory requirements;
3. Supervision of the functioning of internal audits, the purpose of which is to ensure the adequacy and efficiency of risk management and control systems and processes in the bank;
4. Approval of documents regulating internal audit activities and ensuring internal audit independence from the Board of Directors of the Bank;
5. Approval of quarterly/interim reports of internal audit services and submission of notes and recommendations to the Supervisory Board and the Board of Directors;
6. Approval of the annual action plan drawn up by the internal audit and the quarterly revision of the plan;
7. Assessing the function of internal audits, ensuring the mobilization of appropriate resources;
8. Cooperation with external auditors of the Bank;

One of the main directions of the activities of the audit committee is cooperation with an external auditor, facilitating his/her activities and ensuring independence. In 2025 the mandatory audit of financial statements will be carried out by EY Ltd, which is a member of the Big Four. In the Future an independent external auditor for the reporting periods shall be selected with the involvement of the audit committee in accordance with the procedure provided for by the applicable legislation.

In 2025, the audit committee gathered four times.

3.3.2 Nomination and Corporate Governance Committee

In December 2018, the Supervisory Board of the Bank established a nomination and corporate governance committee to select the composition of the supervisory board and the Board of Directors, make appointments, the rotation of members, evaluate the effectiveness of their work, and oversee the corporate governance of the Bank.

A committee is an independent structural unit, it is subject to the supervisory board of the bank and consists of at least 3 (three) members who, at the same time, shall be members of the supervisory board. The nomination and corporate governance committee consists of the following members:

- ▶ Mamuka Tsereteli (Chairman);
- ▶ Bruno Juan Balvanera (member of the committee);
- ▶ Magda Magradze (member of the Committee).

Functions and responsibilities of the Nomination and Corporate Governance Committee:

- ▶ **Nomination.** Regular review of the structure, size and composition of the Supervisory Board, the Board of Directors and their committees in consultation with the chairperson of the Committee, considering the activities carried out by the Supervisory Board and/or the Board of Directors.
- ▶ The Committee shall discuss planning the rotation of the members of the Supervisory Board and other high-ranking executives, considering their activities, taking into account the challenges, opportunities and skills and experience needed for the bank.
- ▶ The committee shall ensure that the assessment of the activities of the supervisory board is conducted and the recommendations produced are submitted to the Supervisory Board.
- ▶ **Corporate Governance.** Committee ensures the implementation of the best corporate governance practices and its constant strengthening, including the development of corporate governance policies and the submission to the Supervisory Board.
- ▶ Monitors emerging trends, initiatives and best practices on corporate governance, assesses the impact of these trends, practices/compatibility with the Bank and makes recommendations if necessary.
- ▶ Periodically reviews the policies and ethics related to the Supervisory Board and gives relevant advice to the Supervisory Board.
- ▶ Revises and reviews the complaints concerning internal inspection and/or investigation, which has been carried out by the Compliance Service or other structural entity with similar authority, in order to identify and/or prevent violations of the Code of Conduct and Code of Ethics, as well as disciplinary measures and other sanctions common to these violations.
- ▶ Periodically notifies the Supervisory Board of the activities taking place within its competence and assesses the performance of the rights and obligations granted to the Committee.

In 2025, the nomination and corporate governance committee has gathered two times.

3.3.3 Risk Management Committee

The Risk Management Committee is responsible for overseeing and complying with the risk management policies/procedures of the bank, as well as determining the adequacy of the risk management structure according to all risk types facing the Bank.

The Committee assists the Supervisory Board and provides recommendations on risk management and internal control, adequacy and efficiency assessment of risk control functions to identify and prevent specific types of operational, credit and other types of risks.

The Risk Committee also monitors the compliance of the bank with risk management and mitigation policies. Given the above, the Committee considers that the overall framework for internal control of the bank as a whole is effective.

The Committee is an independent structural unit and is subject to the supervisory board of the bank. The members of the committee are:

- ▶ Bruno Juan Balvanera (Chairman);
- ▶ Mamuka Tsereteli (member of the committee);
- ▶ Murtaz Kikoria (member of the Committee).

3.3.3 Risk Management Committee (continued)

The committee shall consist of at least three members and the majority of the members of the committee shall be independent members of the supervisory board. In this regard, the Bank is in full compliance with the Corporate Governance Code of commercial banks.

The meeting of the Risk Committee shall be held at least quarterly, and if necessary, an extraordinary meeting of the committee may be convened at any time.

The main functions and responsibilities of the Risk Committee are:

- ▶ Regular approval of risk management reports;
- ▶ Control of risk strategy and risk appetite levels, their consistency and compliance with the strategy of the bank, capital and financial plans. In this regard, the Committee develops recommendations and submits them to the Supervisory Board if necessary;
- ▶ Control of all types of risks relevant to capital and liquidity, as well as for the bank: credit, operational, market, reputational and other risk management strategies to ensure their compliance with the risk appetite and culture;
- ▶ Review of risk compliance reports, each mismatch of risk appetite and the adequacy of the selected action;
- ▶ Control of the effectiveness and independence of the Chief Risk Officer (CRO), assessment of his/her activities and the submission of recommendations on the appointment and/or dismissal to the Supervisory Board.

In 2025, the Risk Committee gathered three times.

3.3.4 Reimbursement Committee

Remuneration Committee is responsible for the establishment of an adequate and effective remuneration system for the members of the Board of Directors of the Bank and other material risk takers and the supervision of its proper functioning. The Committee is an independent structural unit and is subject to the Supervisory Board of the bank. It consists of the following members:

- ▶ Murtaz Kikoria (Chairman);
- ▶ Bruno Juan Balvanera (member of the committee);
- ▶ Magda Magradze (member of the committee).

The remuneration committee shall consist of at least three members and shall represent a sufficient number of independent members. With this in mind, after the election of a new member to the Supervisory Board, the Supervisory Board Nomination and Corporate Governance Committee was staffed in such a way that the composition of the Committee fully complies with the requirements of the Corporate Governance Code of commercial banks.

The Reimbursement Committee meets at least twice a year. If necessary, an extraordinary meeting of the committee may be convened at any time.

The main functions and responsibilities of the Reimbursement Committee are:

- ▶ Regular review of the remuneration policy and submission of recommendations to the Supervisory Board to ensure the compliance of the remuneration policy of the bank with international standards and relevant regulations approved by the regulating body;
- ▶ Regular review of the list of persons taking material risk and submit recommendations to the Supervisory Board;
- ▶ Discussion of the non-monetary remuneration scheme, issuance of recommendations if necessary and submission to the Supervisory Board for approval;
- ▶ Issuing recommendations to the Supervisory Board on the remuneration of persons provided for by the remuneration policy of the Bank;
- ▶ Evaluating the key performance indicators (KPIs) of the activities of persons taking material risk;
- ▶ Directing the disclosure process on issues related to remuneration.

In 2025, the Remuneration Committee gathered one time.

3.3.5. The Role of Committees in Corporate Management

In order to facilitate the performance of the rights and duties of the Supervisory Board, and to increase its effectiveness, the Supervisory Board has established committees to which the functions of the supervisory board are somewhat delegated in various directions. The activities of the committee are concentrated in a specific direction, which increases the level of expert engagement and qualitative performance. Increasing the involvement of committees, their proactivity is a particularly important component of the corporate governance framework of the bank. Since 2021, audit and risk committee meetings have been held in the format of a physical meeting, the awareness, engagement and supervisory control of the committees has become much more fruitful and productive. Periodically, Supervisory Board members who are not represented in a specific committee receive information on all significant matters from the Nomination and Corporate Governance Committee. This contributes to enhancing their awareness and engagement, while also supporting a sound and effective system of reporting and communication between the governing bodies.

3.4 Board of Directors

The daily activities of the Bank shall be carried out by the Board of Directors, the members of which are appointed by the Supervisory Board. The Bank recognizes the importance of the Board of Directors, which includes the correct balance of qualifications, experience and diversification, which allows them to effectively perform the functions and duties undertaken.

3.4.1 Composition of the Board of Directors

The Law of Georgia on Activities of Commercial Banks and the Law of Georgia on Entrepreneurs define the main principle, according to which the responsibilities for carrying out the activities of the company should clearly be separated between the supervision and executive powers of the company activities. The Board of Directors consists of: the Chief Executive Officer ("CEO") and Directors. The CEO and each Director shall be appointed by the Supervisory Board.

The Board of Directors is headed by the CEO, who is responsible for all management issues related to the Bank. All directors are accountable to the CEO. The CEO is responsible for developing, presenting and supervising the Bank's strategy and common commercial objectives, which he/she will implement in close communication with the Supervisory Board. The CEO and the rest of the Board of Directors shall be responsible for the implementation of the decisions of the Supervisory Board and the relevant committees.

31 December, 2025	Members of the Board of Directors
CEO	Beka Gogichaishvili
Chief Financial Officer	Vakhtang Babunashvili
Chief Risk Officer	Giorgi Gvazava

3.4.2 Education and experience of the Board of Directors

Members of the Board of Directors have extensive knowledge and experience in various fields, including finance and accounting, risk management, strategic planning, tax and legal issues, management and leadership, corporate governance and marketing. They are distinguished by their ability to reasonably understand local and regional economic and market conditions, with in-depth knowledge of the legal and supervisory environment. The diversity of their knowledge and skills plays a crucial role in creating long-term value in the bank.

3.4.2 Education and experience of the Board of Directors (continued)

Beka Gogichaishvili

Skills and experience: Beka Gogichaishvili was elected as a member of the Supervisory Board in October 2020. From November of that year, he was also elected as a member of the audit committee of the Supervisory Board. Beka has versatile and distinguished experience in various directions. Beka has played a major role in strengthening the role of the Supervisory Board and the committees of the Board and the effective implementation of the assigned functions. It was after his election to the Supervisory Board that the combined periodic meetings of the Board and management began, the coordination and general leadership of management by the Board improved, control of management performance and relevant reporting with committees became effective. In his professional career, the position of investment manager at Hannivel Partners, an investment and asset management company that currently manages investments worth tens of millions of GEL in various business sectors, is especially important in his professional career. Before 2017, Beka worked in the Partnership Fund, where his main activities included financial analysis and risk assessment of the projects financed by the Partnership Fund and therefore largely led

to the successful investment activities of the Partnership Fund. Beka also has experience in the banking sector. In 2013-2014 he worked at TBC Bank, where he directly provided reporting and reports for both internal purposes and supervisory compliance. On April 29, 2022, Beka resigned as a member of the Supervisory Board and from June 29 he was appointed as the CEO of the Bank, where he will continue to manage the bank with renewed energy and vision.

Education: Beka is a graduate of the University of Sussex with a master's degree in management and finance. In 2010, Beka also graduated from Caucasus University and holds a bachelor's degree in business management with a specialization in finance.

Vakhtang Babunashvili

Skills and Experience: Vakhtang Babunashvili joined the Liberty Bank team in July 2020 as Deputy Chief Financial Officer, Head of the Financial Department. Since February 2021, he replaced David Tsiklauri as Deputy CEO and Chief Financial Officer. Vakhtang has almost 20 years of experience working in the financial sector. His professional career started with the consulting company "Synergy Group", after which he held several managerial positions in the Bank Republic (Société General), TBC Bank and Bank of Georgia. At TBC Bank, he was the Deputy Chief Financial Officer, where he led the development of pricing models in the field of private, small and medium, corporate segment credits, led organizational risk management and financial risk management.

Education: Vakhtang holds an MBA degree from INSEAD, is a graduate of Caucasus Business School with a degree in finance and is a Visiting Lecturer at Caucasus University in the direction of Banking and Financial Institutions Management.

3.4.2 Education and experience of the Board of Directors (Continued)

Giorgi Gvazava

Skills and Experience: Giorgi Gvazava replaced David Abashidze in the board of directors of the bank. Giorgi is a professional in the banking sector, his entire professional career is devoted to the financial and specifically banking sector, where he held various leading positions in the field of risk management. He has 15 years of successful experience working in leading financial institutions in Georgia. Giorgi started his career as a credit analyst at VTB Bank Georgia and has since held various managerial and top managerial positions. Before joining the team of Liberty Bank, Giorgi Gvazava was the Head of the Risk Department of VTB Bank Georgia and directly led the credit and operational risk management of VTB Bank Georgia.

Education: Giorgi Gvazava holds a master's degree from Edinburgh Business School (EBS) and also, holds CFA (Level 1).

3.4.3 Functions of the Board of Directors

In addition to carrying out the daily activities of the bank, the main functions of the Board of Directors are presented below:

- ▶ Convening an annual/extraordinary meeting of shareholders;
- ▶ Drawing up the agenda of the general meeting of shareholders;
- ▶ Redemption of the shares of the Bank based on the permit issued by the General Meeting of Shareholders;
- ▶ Making a decision on the issuance of permitted capital established by the statute of new shares to the maximum amount;
- ▶ Submit to the Supervisory Board an annual business plan, including budget, profit and loss forecasting and the investment plan of the Bank;
- ▶ Organization and supervision of lending, payments, financing, cash services, bank cash and values accounting and reporting, internal control and accounting, which ensures the provision of proper service by the bank to its clients;
- ▶ Organization and supervision of the functioning of bank branches and service centers;
- ▶ Reviewing information received from internal audits or external inspections, as well as reviewing the reports submitted by the managers of the branch/service center and making appropriate decisions based on this information;
- ▶ Ensure the fulfilment of decisions made by the general meeting of shareholders and/or the supervisory board;
- ▶ Development of procedures, internal regulations, products and terms of service, other internal documents;
- ▶ Deciding on the selection, release, training and remuneration of staff (considering that the decision on the remuneration of the members of the Board of Directors and others holding a material risks is made by the Supervisory Board and the Remuneration Committee);
- ▶ Monitoring the risk management principles established by the Supervisory Board and ensuring that the bank is placed within the limits defined by the Risk Appetite Statement ("RAS").

The Board of Directors is also the decision-making body concerning all activities that are not specifically determined for the Supervisory Board and/or the general meeting of shareholders.

3.4.4 Activities and meetings of the Board of Directors

The activities of the Board of Directors are headed by the CEO. The CEO shall be authorised to represent the bank individually before any person. Any transaction or any internal regulation, order or instruction of the Bank may be certified by the signature of the CEO or by the signatures of all other members of the Board of Directors. The CEO may authorize other directors and relevant persons to independently represent the Bank concerning various transactions and obligations.

The Board of Directors makes decisions at the meetings of the Board of Directors. The powers of the Board of Directors are delegated to committees affiliated with the Board of Directors, and the Board of Directors is convened only to discuss particularly important issues.

In 2025, the Board of Directors met two times and made decisions on important and relevant issues for the bank, including the agenda of the annual general meeting of shareholders determined by the minutes of the meeting on June 5, 2025 and convened the general meeting of shareholders.

3.4.5 Assessment of the activities of the Board of Directors

The Supervisory Board constantly assesses the activities of the Board of Directors in terms of achieving the common goals of the bank and believes that the Board of Directors has a proper balance of experience and knowledge and will continue to operate effectively.

3.4.6 Committees of the Board of Directors

3.4.6.1 Credit Committee

In order to manage credit risk and reduce losses caused by credit risk, there is a several level system of credit committees in the bank, which reviews credit risks related to corporate, micro, small, medium, retail and wholesale pawn credit products and makes a decision to approve the terms of the given credit product.

The credit committee of all levels decides within the limit approved for it. The members of the highest-level committee in the hierarchy of credit committees are the director of risks and the CEO or the director of the relevant business direction. The credit risk management function is represented by the chairman in any committee and exercises the right to veto any decision. In addition, when deciding by the credit committees, of which the CEO of the Bank is a member, together with the consent of the representative of the risk management, his/her consent is mandatory for a positive resolution of the issue.

With a certain periodicity, by the decision of the Board of Directors, the procedure for making a decision of the credit committee of the bank is resumed.

3.4.6.2 Operational Risk Committee

For the purpose of early identification, effective risk management and monitoring, there is an Operational Risk Committee with the Board of Directors, which is responsible for preparing the components of the operational risk framework, the effectiveness of the operational risk management function and the delivery of relevant recommendations to the supervisory board. The Committee shall ensure independent and unhindered activities of the operational risk management function.

The chairman of the committee is the Director of Risks. The committee meets at least once a month, or more often, if necessary.

3.4.6.3 Information Security Committee

In order to ensure the effectiveness of the internal control mechanisms of the Bank and the protection of its information assets, there is an Information Security Committee with the Board of Directors of the Bank, which supervises the information security framework and risk management system of the bank, compliance of the risk management facilities with the bank's goals, assesses the main risk policies and risk management in general.

The main functions of the Committee are to identify information and cyber threats and control the security of the bank in this direction, and to have appropriate response measures to cyber threats.

The CEO, Risk Director, Chief Information Security Officer, and Information Technology Officer shall represent the committee members. Managers with relevant qualifications and experience may also be invited as members of the Committee. The committee meets once a month.

3.4.6.4 Executive Committee on Information Technology

In order to optimize the processes in the bank through information technology, manage investments in information technology and optimize costs related to information technology, the Executive Committee of Information Technology functions with the Board of Directors.

The committee will review the ideas related to the business activities of the Bank, which need to be implemented with the involvement of information technology, review applications for new projects and determine their priority if necessary, review the shortcomings in the activities of information technology, identify potential risks and circumstances hindering effective activities.

The chairman of the committee is the CEO, and the members of the Board of Directors and the relevant directors. The committee meets once a month.

3.4.6.5 Marketing and Sales Committee

For the purpose of marketing planning, increasing awareness, communication and cooperation between the bank and civil society representatives, the Marketing and Sales Committee functions with the Board of Directors. The committee is a platform, and committee meetings allow those responsible for planning and implementing the bank's business to plan marketing campaigns with the marketing staff. The Committee also organizes the planning and implementation of events within the framework of the Social Corporate Responsibility (CSR) of the bank and the development of a marketing strategy related to the development of the Bank brand and identifies the means necessary for its implementation.

The committee meets once a month to determine priorities for current issues, as well as summarize information about the campaigns and activities already carried out and evaluate the results achieved.

3.4.6.6 Asset-Liability Committee (ALCO)

In order to maximize the income of banking operations in compliance with the effective management, supervisory and prudential norms and requirements of the assets and liabilities of the Bank, the Asset-Liability Committee functions with the Board of Directors.

The Committee ensures optimal management of bank funds, control of compliance with prudential requirements, supervises the income of banking transactions considering the value of resources, and determines measures to be taken to increase income. In addition, the Committee also conducts control and analysis of various types of risks (currency risk, liquidity risk, interest rate change), including the assessment of the level of interest risk, and controls the maintenance of the volume of assets necessary for the maintenance of liquidity.

The chairman of the committee is the CEO, and the members of the Board of Directors and the heads of the finance, treasury, and organizational risk management units. Meetings of the Asset-Liability Committee are held monthly or anytime when deemed necessary.

3.4.6.7 Anti-Money Laundering (AML) Committee

To promote the prevention of money laundering/legalization of illicit income, combating and preventing the financing of terrorism, the AML Committee is working with the Board of Directors, the AML Committee develops a strategy and action plan to combat and prevent money laundering/illicit income legalization, to combat and prevent terrorism financing.

The Committee reviews and develops projects of internal documents of the bank in the field of money laundering and terrorism financing, reviews changes in the client risk category and makes a decision on opening a report or conducting operations according to the client's risk category.

The chairman of the committee is the Risks Director.

3.5 Regulation on Conflict of Interest Management

In order to protect the interests of bank depositors and creditors and to ensure adequate supervision and control of transactions with the affiliates of the bank, the decision-making staff shall be free from factual or potential conflicts of interest that may affect their decisions or actions and prevent the interests of the bank from making objective and fair decisions. For this purpose, the Supervisory Board approved a Regulation on conflict of interest management that regulates issues related to the proclamation of conflicts of interest and their management.

For the management of conflicts of interest, the Bank establishes related/affiliated parties, compiles a list of such related parties, classifies such a list, determines the transaction implementation process, the procedure for carrying out control/reporting and the types and limits of transactions, the exclusive competence to approve of which belongs to the Supervisory Board.

The Audit Committee and the Supervisory Board of the Bank are constantly committed to refining the internal process of managing conflicts of interest aimed at ensuring proper control and reporting on the transactions carried out with the related persons, as well as to ensure compliance with the arm's length principle related to these transactions. Accordingly, under the decision of the Supervisory Board in 2024, following the "Conflict of Interest Management Statute" approved by Order #26/04 of the President of the National Bank of Georgia of 10 March 2015, the provision of managing the internal conflict of interest of the Bank was updated and the main and important issues such as the definition of the person related to the bank were updated to other structural units of transactions with the party connected to the Supervisory Board, scope of the delegation, limits, collateral-related requirements, etc.

3.5.1 Compliance with the Law on Entrepreneurs and the Updated Provisions of the Suitability of Administrators and Significant Shareholders of Commercial Banks

Following the new version ("Law") of the Law of Georgia on Entrepreneurs, which came into force from January 01, 2022, the Bank is obliged to ensure compliance with the Law within 2 (two) years after the entry into force of the latter. With this in mind, the Bank developed a founding agreement and an updated version of the statute ("Charter"), which is in full compliance with the requirements of the law. The statute regulated in detail the powers of the management bodies, issues related to the convening of the general meeting of shareholders, capital, shares and the organizational management of the bank.

According to the order of the National Bank of Georgia, considering the updated provisions on the eligibility criteria of the administrators of commercial banks and shareholders holding significant shares, the structured units authorized to appoint/elect the administrators of the bank approved the appropriateness of the existing administrators. In addition, the Supervisory Board approved an updated policy of recruitment, suitability and diversity of administrators, where the list of administrative positions was determined, the principles of their selection were regulated in detail, criteria and requirements regarding a person's education, experience, personal/professional qualities and skills and other important issues.

3.6 Binding tender offer

In October 2017, after the bank made a change of control and Georgian Financial Group B.V. (formerly European Financial Group B.V.) bought 74.64% of the subscribed shares of the bank and accordingly became the majoritarian shareholder of the bank, following the procedure provided for by the Law on Entrepreneurs of Georgia, the Georgian Financial Group B.V. ("GFG") announced a mandatory tender offer to redeem all remaining shares. The first phase of the mandatory tender offer was completed in February 2018. Ultimately, GFG redeemed more than 334 million ordinary shares and 2.25 million preferred shares from minority shareholders.

In addition to the mandatory tender offer, in 2018, GFG converted 1,573,680 Preferred Shares into 31,600,000 ordinary shares. As a result of the mandatory tender offer and conversion of preferred shares, GFG's beneficial owners, individuals Irakli Otar Rukhadze, Igor Alekseev and Benjamin Albert Marson-Knight, as of December 31, 2019, indirectly owned 91.985% of the Bank's subscribed shares (2017: 74.64%). As of December 31, 2021, GFG's total direct/indirect percentage participation in the bank's capital increased to 95.99%, although this did not affect the share participation of the beneficial owners holding a significant share.

Although as of 31 December of 2025, the founding structure of the bank remained unchanged, following the changes made to the legislation in terms of public securities accounting, the voting rights of the shareholders of the bank were distributed differently. In particular, based on the transfer of the Bank from the Independent Registrar of Public Securities to the Central Securities Depository of Georgia from June 1, 2024, and considering that securities can be held in the Central Depository only through an account holder, the shares of those minority shareholders who do not have account holders were placed in the Central Depository's unified technical account and the rights related to the ownership of shares were restricted (including voting rights, the right to receive dividends). Accordingly, since the shares placed in the technical account are not calculated when counting the voting rights, the voting rights of other shareholders have increased proportionately.

3.7 Review of internal control and risk management systems related to the financial reporting process

The Bank closes and submits financial statements daily according to both IFRS and NBG requirements. Daily, the information is submitted to the internal structural units and management of the bank, as well as sent to the NBG with appropriate explanations. In addition, a monthly consolidated financial statement prepared following the requirements of IFRS and NBG is prepared for the Supervisory Board and NBG. Each year, the Bank is obliged to invite an external audit and conduct an external audit examination following the international accounting standards under the procedures established by the National Bank.

4 Non-Financial reporting

Currently, the issues of environmental protection, social, employment, human rights protection and anti-corruption in the bank are regulated by various internal documents and processes, including the corporate manual of the bank, conflict of interest management regulations and KYC and AML policies. The Bank is actively working on developing new complex policies on environmental, social, employment, human rights protection and combating corruption.

4.1 Social and Employment Issues

Benefits for social card holders:

Liberty has been running a unique loyalty program for social card holders for 7 years. Given the program's relevance to beneficiaries, in 2025 the range of partner companies was significantly expanded. In addition to essential goods, discounts were extended to favorite companies for Liberty social card holders.

The program now includes 22 partner companies, including chain supermarkets, pharmacies and theaters across the country. Under the program, Liberty's older-generation customers and other social card holders enjoy special offers and conditions.

Since 2019, the total amount saved by customers under the loyalty program has exceeded 39 million GEL.

MY DOC – Mobile Clinic

In 2025, Liberty's social project MY DOC entered a new stage of development. The initiative was created four years ago specifically for the older generation. It aims to help people for whom quality medical care is often difficult to access due to geographical or other reasons.

MY DOC is a mobile clinic equipped with modern technology that travels across Georgia together with Liberty Express vehicles, offering free medical services to Liberty customers on-site.

Until now, the project carried out high-tech screenings for cardiovascular and respiratory diseases. From December 2025, an ophthalmology stream was added - free high-tech screening for cataracts and glaucoma for people of retirement age. In 2025, the MY DOC mobile clinic visited 244 villages across the country and provided free medical services to 2,489 Liberty customers. Over the course of the project, 10,537 people in 951 villages were able to be diagnosed. The social significance of the project has been recognized internationally - the initiative won the Global Compact Awards in 2022.

Millennium Innovation Competition

Liberty is the strategic partner of the "Millennium Innovation Competition" for the fourth consecutive year. This initiative fully aligns with the bank's vision of supporting youth education and innovative thinking. The competition aims to encourage high school students to create new technologies and increase interest in STEM fields.

In 2025, 12 teams from various regions of Georgia participated in the final stage. Finalists presented projects in the fields of space, aviation, robotics, mobile technologies and applications, environmental protection, healthcare, energy, and transportation.

First place and a prize trip to NASA's Space Center University summer school in the USA was won by team "Clusters" from Komarov Tbilisi Physics and Mathematics Public School No. 199. Their project, RescuedBy, is a drone-based, AI-powered search-and-rescue system designed to quickly and effectively locate missing people in hard-to-reach areas and disaster zones.

Second place and a prize trip to Stanford University's technology camp went to team "Armmo" - composed of students from Tbilisi Public School No. 9, Poti Public School No. 5, and the British-Georgian Academy. They presented a project on a wearable exoskeleton designed to help post-stroke patients recover motor functions.

Third place was won by team "RiskTrackers", whose members represented St. Alexi Shushanish Orthodox School-Gymnasium, American International School "Progress" (Kutaisi), Poti Ivane Javakhishvili Public School No. 3, and Komarov Tbilisi Physics and Mathematics Public School No. 199. Their project focused on developing a monitoring system for the early prediction of landslide hazards.

With Liberty's support, the third-place team will travel to CERN - the European Organization for Nuclear Research - in Switzerland.

Since its founding, nearly 4,000 students from almost every region of Georgia have participated in the competition.

In 2025, the competition attracted record interest with 101 teams and 337 students from all regions of Georgia. Of the participating schools, 28% were private and 72% public. 53% of students were from the regions and 47% from Tbilisi. 54% were girls and 46% boys. 12 teams advanced to the final.

4.1 Social and Employment Issues (continued)

STEAM Challenge Georgia

With Liberty Bank's strategic partnership, and through the joint efforts of technology platform Skillwill and STEAM-based educational resource company STEAM It, a large-scale educational olympiad - STEAM Challenge Georgia - was held.

The olympiad aimed to develop practical thinking, creative approaches and teamwork skills among school students, preparing them for a modern technological environment.

The main prize established by Liberty was awarded to team "Komarov's Five" from Komarov Tbilisi Physics and Mathematics Public School No. 199.

Inclusive Environment & Equal Opportunities

Liberty is the first financial institution in Georgia to develop a spatial accessibility standard in accordance with international standards and Georgian legislation. The project is being implemented in phases under a three-year action plan.

The project "Inclusive Environment and Equal Opportunities" is carried out in collaboration between Liberty's team and the Georgian Development Fund (GDF), and aims to create a fully adapted service environment for persons with disabilities.

In 2024, inclusive standards were developed and implementation of spatial accessibility began. In 2025, a disability policy document was approved, integration of the service standard began, and an adapted branch model was developed. A service standard for visually impaired persons was also prepared, with implementation planned from 2026.

Under the project, 1 branch has been fully adapted, where a service for visually impaired customers is already operating in test mode. Full adaptation of 10 branches is planned for the coming period.

Liberty's Training Center, together with the Georgian Development Fund, created a training module on "Inclusive Service" covering both online and in-person communication with customers. Trainers (TOT) were trained in this area, and 309 employees completed the training module.

Youth Entrepreneurship for Rural Development (RDYE)

In 2025, another project implemented with Liberty's strategic partnership - "Youth Entrepreneurship for Rural Development" (RDYE) - was successfully completed.

RDYE is a 3.5-year program implemented by Mercy Corps Georgia with funding from the Austrian Development Cooperation (ADC). The project was supported by Liberty Bank and the International Fund for Sports, Tourism, and Youth.

Under the project, more than 1,500 young people aged 18-35 - including representatives of ethnic and religious minorities, residents of high-mountain villages, eco-migrants, and internally displaced persons - were given the opportunity to develop entrepreneurial skills and to create or expand more than 50 sustainable agricultural and non-agricultural enterprises.

Liberty's financial contribution to the project amounted to 260,000 GEL (equivalent to 90,000 euros), covering support for young entrepreneurs, training sessions, consultations, and mentoring, as well as facilitating the development of entrepreneurial potential. A Liberty financial literacy training module specially developed for the project was completed by nearly 1,600 participants.

Liberty also actively provided communication support for the project - media coverage and information dissemination through various communication and social media channels - significantly contributing to raising awareness of the initiative at both the regional and local levels.

UN Global Compact Network Georgia

Since June 2022, Liberty has been a member of the Global Compact Network Georgia.

In November 2025, Liberty Bank's ESG team held working meetings in Brussels, Belgium with international organizations actively working on sustainable business development and sustainable reporting. In-depth familiarization with best international practices gives the bank the opportunity to thoroughly analyze the process and significance of sustainable reporting and, as a result, effectively integrate it into its management system.

4.1 Social and Employment Issues (continued)

"Mountain Books"

Liberty is the strategic partner of the "Mountain Books" project for the fourth consecutive year. Together with the project's founders, one of the bank's key corporate responsibility goals is ensuring that no child in any high-mountain village of Georgia is left without a book.

The initiative plays an important role in raising literacy levels in Georgia's high-mountain villages. Access to books helps children develop an interest in reading and critical thinking skills.

In 2025, "Mountain Books" traveled to high-mountain villages of Imereti. This was the sixth major field trip under the project, during which more than 3,000 books were distributed in the region's high-mountain villages.

Detailed figures:

2025 data:

- ▶ Number of books – 3,702
- ▶ Number of libraries – 25
- ▶ Number of villages – 92
- ▶ Number of children – 2,400
- ▶ Distributed to children encountered – 1,100

Cumulative totals:

- ▶ Number of books – 7,482
- ▶ Number of libraries – 60
- ▶ Number of villages – 212
- ▶ Number of children – 5,047
- ▶ Distributed to children encountered – 2,500

"Playing the Knight in the Panther's Skin"

Familiarization with cultural heritage and raising literary awareness plays a vital role in developing the creative and critical thinking of young people. For this reason, since 2024, the project "Playing the Knight in the Panther's Skin" has been implemented with the initiative and support of Liberty's corporate responsibility division.

Its goal is to promote Georgia's centuries-old literary monument among young people. Through diverse educational resources and activities, the learning process becomes modern, interactive, and enjoyable - for both students and teachers.

Within the project, literary scholar Levan Gelashvili delivered an educational lecture titled "Interesting Facts about Rustaveli" at schools in Highland Adjara and the Samegrelo region. After the lecture, students played a board game created around the themes of "The Knight in the Panther's Skin" together with the author.

The project is ongoing and will be presented to the public in an even larger and more varied format in the coming year.

"Forward and Forward - Financial Monopoly"

Liberty actively supports the development of educational initiatives for students. In 2025, the bank became a supporter and partner of the project "Forward and Forward - Financial Monopoly", organized by the National Bank of Georgia and Finedu.

"Forward and Forward - Financial Monopoly" is the first Georgian interactive children's performance on a financial theme, created for teenagers. The show was developed in collaboration with "Tamshaobana" and aims to promote financial education among elementary school students. In the form of play and interaction, it introduces children to important topics such as financial safety, saving, goal-setting, and the basics of entrepreneurship.

With Liberty's active partnership, the performance was held in various regions of Georgia. Approximately 700 students aged 8-12 attended the performances, significantly contributing to the development of children's financial awareness and practical knowledge.

4.1 Social and Employment Issues (continued)

"Mtsignobar" (The Lettered One)

In 2025, Liberty became a supporter of yet another educational project. "Mtsignobar" is a literary competition named after the renowned Georgian translator, writer, and philosopher Bachana Bregvadze, held annually in Racha, Ambrolauri district. The initiative aims to raise literacy levels among young people and to support and develop traditional library spaces.

Liberty awarded the winner of the "Knight in the Panther's Skin" nomination at "Mtsignobar 2025" - Lizi Gogsadze.

As part of the "Mountain Books" project, participants received books as gifts. Participants also had the opportunity to attend a lecture by philologist Levan Gelashvili and join him in a board game based on "The Knight in the Panther's Skin".

"Wholehearted for Each Other"

"Wholehearted for Each Other" is Liberty's employee charitable fund, established in 2020, whose goal is to fund urgent medical assistance for bank employees and their family members.

The initiative reflects the organization's care for its team's wellbeing and fosters a culture of solidarity.

Total:

- ▶ Number of employees who needed financial support – 401;
- ▶ Donations disbursed - 803,291;
- ▶ Amount contributed by Liberty to the fund in 2020 - 300,000.

4.1.2 Employment Issues

The total number of employees in the bank was 5,180 as of December 31, 2025, of which 1,599 were male and 3,581 female. There is gender equality in the organization, equal treatment in employment and professional fields. The bank employs 33 disabled employees (no income tax), private insurance is valid.

From October 2024, the bank will fully fund a basic health insurance package for all frontline employees. Bank employees also have the opportunity to choose the desired offer from two different insurance companies with corporate terms.

The Bank cares about improving and developing the qualifications of employees, which in turn increases the motivation of employees, helps to refine, automate current processes and improve customer relations.

The bank also operates an assessment system that allows both the subordinate employee and the superior to determine the countable criteria for valuation and receive feedback based on the above criteria. The process is transparent and aimed at the professional development of employees.

At the end of 2020, an internship/mentoring project for front-line credit direction was launched in the bank. Each intern has a mentor who is an experienced employee and is responsible for transferring experience to the intern and supporting the development of the skills necessary for the position. The program consists of 3 stages:

- ▶ On-boarding training at our training center;
- ▶ 15-day job training/teaching at branches according to a predetermined and outlined plan;
- ▶ 7 days of theoretical training at the training center.

The assessment takes place at the end of each week and after passing the final exam, they are employed at Liberty Bank.

In 2025, 21 mentors and 179 interns were trained, of which 123 were employed at Liberty Bank.

4.1.2 Employment Issues (continued)

Since 2022, we have been cooperating with vocational schools:

- ▶ We are already cooperating with 19 vocational schools;
- ▶ We planned an introductory excursion-visit to the bank branches for the college financial services students;
- ▶ We conducted mandatory internships for 359 vocational students;
- ▶ We have already employed 15 vocational school students;
- ▶ We conduct onboarding meetings for vocational students at the training center;
- ▶ Liberty simulation spaces were set up in three vocational schools, equipped with inventory identical to that of a bank branch;
- ▶ Liberty Space for students was organized in four vocational schools;
- ▶ After the support of the bank, the state funded the financial services program;
- ▶ We've received the National Vocational Education Award in the nomination: "Best Business Partner."

The bank has a corporate manual detailing the rights and obligations of the employee, corporate ethics, privacy, security and permissible actions, working and rest time of the employee, the rules for using maternity and various types of leave.

4.2 Issues related to environmental protection

In 2025, one of the key priorities of Liberty Bank was the development of its environmental agenda. To raise awareness on environmental protection and climate change, the Bank conducted a series of trainings and workshops for its employees.

Within the framework of the European Investment Bank's technical assistance programme - EIB Green Gateway - „Greening Financial Systems Technical Assistance Programme“ - several key documents were developed in cooperation with Liberty Bank. These include the Climate Change Management Plan, Green Finance Strategy, Green Finance Framework and the Climate Risk Reporting Framework. All of these documents have been integrated into the Bank's day-to-day operations and their implementation is actively ongoing.

Liberty Bank fully recognizes the potential impacts of climate change on both its own operations and the resilience of its clients and partners. Accordingly, the Bank actively assesses and incorporates climate-related risks into its lending and investment processes, aiming to mitigate potential financial and reputational risks.

As a result of this approach, the Bank not only strengthens its alignment with international standards but also creates additional value by contributing to long-term financial stability and reducing environmental impact.

Looking ahead, Liberty Bank remains committed to further advancing its environmental agenda and aims to continuously improve its operations and partnerships by taking into account the impacts of climate change.

4.3 Human Rights

Protecting human rights is one of the most important principles of the bank. The Bank strictly complies with the requirements of the Law of Georgia on the Elimination of All Forms of Discrimination. The internal procedures and policies of the Bank are in full compliance with anti-discrimination legislation. Any fact of alleged discrimination is responded quickly and effectively, and if the fact of discrimination is detected, the Bank ensures that appropriate measures are taken and the elimination of the consequences of discrimination without violating the rights and legitimate interests of third parties.

In May 2022, additionally, "HR anonymous" was activated - an electronically filled out form, which allows any employee to anonymously or non-anonymously (at the discretion of the employee) to fix the type of violation (sexual harassment, bullying, fraud, etc.), on which the relevant services will investigate the fact and take action.

In addition to activating HR anonymous, awareness campaigns were planned and organized for employees:

- ▶ Sexual harassment;
- ▶ Bullying;
- ▶ Domestic violence;

Campaigns are also planned:

- ▶ Fraud.

4.4 Fight against Corruption

It is important for the bank to conduct a business relationship in a fair, ethical and law-compliant manner. Elements of the anti-corruption policy of the bank are provided in the "corporate manual" and the standard labor agreements. The documents determine the rules of conduct of the employees/directors of the bank and regulate the issues of receiving a gift or benefit that may be related to their activities.

The Bank also monitors corruption risks in the procurement process. The Bank's procurement is carried out in compliance with the tender procedure, as a result of which the decision is made on the basis of the examination of the supplier, the detection and elimination of conflicts of interest and/or corruption risks.

By approving and implementing anti-bribery and anti-corruption policies in 2019, the Bank gives preferences to the following values:

- ▶ prudent and credible behavior;
- ▶ Encouraging employee responsibility;
- ▶ The application of the arm's length principle in the activity when the parties involved in the transaction are independent and on equal terms.

The policy prohibits both the offer and/or payment of a bribe, as well as the promise thereof, the solicitation, acceptance of a bribe, and/or the support or encouragement of the acceptance of a bribe in any form, both directly and indirectly, as well as participation in a corrupt transaction, which involves the transfer or acceptance of a gift of monetary or non-monetary value to a third party, the promise, as well as the granting of any undeserved benefit for the purpose of personal gain and/or the use of the position held for material gain.

4.5 More information

More information can be found in the 2025 Pillar 3 report of the Bank available on the website:

4.4 Fight against Corruption

It is important for the bank to conduct a business relationship in a fair, ethical and law-compliant manner. Elements of the anti-corruption policy of the bank are provided in the "corporate manual" and the standard labor agreements. The documents determine the rules of conduct of the employees/directors of the bank and regulate the issues of receiving a gift or benefit that may be related to their activities.

The Bank also monitors corruption risks in the procurement process. The Bank's procurement is carried out in compliance with the tender procedure, as a result of which the decision is made on the basis of the examination of the supplier, the detection and elimination of conflicts of interest and/or corruption risks.

By approving and implementing anti-bribery and anti-corruption policies in 2019, the Bank gives preferences to the following values:
