

Balance of Payments of Georgia

2017

## Balance of Payments of Georgia

2017

National Bank of Georgia

The publication is compiled according to the methodological recommendations of the sixth edition of the Balance of Payments and International Investment Position Manual (IMF, 2009) and of the External debt statistics: guide for compilers and users (IMF, 2013).

## 1. Methodological Review

The publication reflects the external sector statistics and provides the balance of payments, international investment position and external debt statistical reports. Statistical reports are supplemented with comments, additional analytical tables, description of the compiling methodology and the list of data sources.

Data and comments are prepared according to methodology of the Balance of Payments and International Investment Position Manual, 6th edition (BPM6, IMF 2009) and external debt statistics guide for compilers and users (IMF, 2013.), Respectively.

The balance of payments, international investment position and external debt of Georgia are elaborated both quarterly and annually in million USD. These documents do not include data on the external economic operations of Abkhazia and the Tskhinvali region.

The balance of payments, international investment position and external debt statistics of Georgia are revised on a regular basis and can affect any period. All data in the following publication are corrected based on revisions existing on 30 September 2018.

# 1.1 Methodological standards on the balance of payments

The balance of payments is a macroeconomic and statistical statement that systematically summarizes, for a specified time period (quarter, year), the economic transactions of an economy with the rest of the world. The data is classified and compiled according to the international standards recommended by the International Monetary Fund's BPM6.

#### **Definitions and General Principles**

Structurally balance of payments consists of the current account, the capital account and the financial account. The current account covers the balance of trade of goods and services, primary income and secondary income balances. The capital account reflects non-produced, non-financial assets acquisition/disposal and capital transfers. The financial account covers: direct investments, portfolio investments, financial derivatives, other investments and re-

serve assets.

The sum of current and capital account is net lending to the rest of the world. Conceptually it's equal to net financial account balance. Financial account plus exchange rate, price and other changes reflects the difference between the beginning and the end stocks of the international investment position.

An economic unit is considered a **resident** unit when it has a **center of economic interest** and a permanent location in the **economic territory** of a country for more than one year, irrespective of citizenship.

The **economic territory** of a country consists of its geographic territory administered by a government, where persons, goods and capital circulate freely and are subject to the same monetary and fiscal policy. The economic territory also consists of the airspace and territorial waters of the country, territories in international waters over which the country has exclusive rights, and territorial enclaves situated on the territory of other countries, such as embassies, military bases, free zones, etc. Territorial enclaves that belong to other countries are not included in the economic territory of the given country.

A physical or legal person has a **center of economic interest** within a country when there exists some location – a dwelling, place of production or other premises – within the economic territory of the country, or from which the unit engages or intends to continue engaging, either indefinitely or over a finite but long period of time (over one or more years).

The BOP does not use the notion of "payments" in its general meaning, but in the meaning of transactions, because some international transactions do not involve payments of money (for example, barter) and some transactions do not elicit any such payments (for example, inheritance).

#### **Economic Sectors**

The financial account components of the BOP – direct investment, portfolio investment, financial derivatives, and other investment – are disaggregated by the economic sector of the residents involved in the operation. Four

economic sectors are distinguished:

- Central bank the National Bank of Georgia;
- Deposit-taking corporations, except central bank commercial banks of Georgia;
- General government which comprises central government institutions and local public authorities;
- Other sectors, subdivided in two categories: other financial corporations (microfinance organizations, insurance companies and funds) and non-financial corporations, households and non-profit institutions serving households (NPISH).

## Types of Transactions

- exchanges most transactions likely to be recorded in the balance of payments can be characterized as exchanges in which one transactor provides an economic value to another transactor and receives equal value in return;
- transfers transactions in which one transactor provides an economic value to another transactor and does not receive an equivalent value in return;
- This transaction has unilateral character; therefore, to preserve the double entry principle of the BOP, another entry with an opposite sign is needed.
- imputed transactions when transactions are imputed and entries are made in the balance of payments accounts when no actual flows occur, for example, in the reinvestment of a foreign investor's profit.

The transactions mentioned above are reflected in BOP accounts where structured as follows:

**Goods** comprise transactions with goods that cross the border of the country and either involve changes of ownership between residents and non-residents (general merchandise, goods procured by carriers, and non-monetary gold).

**Services** cover all types of services that are performed by residents for nonresidents and vice versa:

- Manufacture services of physical inputs owned by others (nonresidents);
- Maintenance and repair services not elsewhere classified;
- Transportation services include all types of transportation services, postal and courier services and pipelines. Passenger, freight and other transportation services

- (cargo handling, storage, maintenance and clearing of transportation equipment, etc.) are specified for each type of transportation, except pipeline transportation;
- Travel services this item records the expenditures of nonresident travelers for business and personal purposes during their visits in Georgia on the credit side. Residents' travel expenditures abroad are recorded on the debit side of this item;
- Financial services cover financial intermediary and auxiliary services conducted between residents and nonresidents subdivided into financial services explicitly charged and other services and financial intermediation indirectly measured (FI-SIM);
- Remaining services comprise services such as construction, insurance services, computer and information services, royalties and license fees, other business services, personal, cultural and recreational services, government services, etc.

**Income** registers two types of flows between residents and nonresidents:

- Compensation of employees in the form of salaries, wages or other benefits, in cash or in kind, paid by employers to employees when the parties have a different residency status. These remunerations also include taxes paid in the host country, which are reflected in an opposite side entry in the current transfers item. Employees' expenditures in the host country are registered as a counterpart record in the travel item;
- Investment income covers income receivable, associated with residents' holdings of external financial assets, or payable, associated with residents' liabilities to nonresidents. Investment income consists of direct investment income, portfolio investment income, income on other investment and on reserve assets. Investment income is subdivided into dividends, reinvested earnings, interest and Investment income attributable to policyholders in insurance, pension schemes, and standardized guarantees, and to investment fund shareholders.

**Secondary income** shows current transfers between residents and non-residents. It is an offsetting entry for real resources or financial items provided without quid pro quo by one economy to another. The most common examples of current transfers are grants and humanitarian aid and technical assistance. This item also covers current international cooperation, Current taxes on income, personal transfers,

social benefits, net nonlife insurance premiums, Nonlife insurance claims.

**Capital account** shows capital transfers receivable and payable between residents and nonresidents, and the acquisition and disposal of non-produced, nonfinancial items. Transfer is considered as capital if it is intended for acquisition of fixed assets or capital construction.

Non-produced nonfinancial assets include intangible assets covering contracts, leases, licenses, and marketing assets; and natural resources (generally land).

**Financial account** assets and liabilities cover functional categories: Direct investments, portfolio investment, financial derivatives, other investments and reserve assets.

**Direct investment** is a category of international investment in which a resident entity in one economy (the direct investor) acquires a lasting interest in an entity resident in another economy (the direct investment enterprise). A direct investor in an enterprise is an investor that owns 10% or more of ordinary shares or voting power (for an incorporated enterprise) or the equivalent (for an unincorporated enterprise). The "direct investment" relationship is extended to enterprises in which goods and/or money are invested from enterprises associated with them: to capital investment between associated enterprises, branches and their head offices. Direct investment includes equity capital, reinvested earnings and other capital. For the category of direct investment there are directional distinctions (abroad or in the reporting economy) for equity capital and other capital items within this category, and for assets and liabilities. Direct investment is classified as direct investor in direct investment enterprises; direct investment enterprises in direct investor (reverse investment)

**Portfolio investment** is in the form of equity and investment fund shares and debt securities

**Financial derivatives** are financial instruments that are linked to a specific financial instrument, indicator, or commodity and through which specific financial risks can be traded in financial markets in their own right. Financial derivatives comprise transactions with swaps, options, guarantees, deposits, etc., and are registered on a net basis.

Other investment is primarily divided into Net acquisition of financial assets and Net incurrence of liabilities. Other investment covers other equity, currency and deposits, loans, insurance, pension, and standardized guarantee schemes, trade credit and advances, other accounts receivable/payable, Special drawing rights. Other equity is included in other investment, when it is not direct investment or reserve asset. Other equity is not in the form of securities, so it is not included in portfolio investment. Participation in some international organizations is not in the form of securities and so it is classified as other equity.

Currency consists of notes and coins that are of fixed nominal values and are issued or authorized by central banks or governments.

Deposits include all claims that are (a) on the central bank, deposit-taking corporations other than the central bank, and, in some cases, other institutional units; and (b) represented by evidence of deposit.

Insurance, pension, and standardized guarantee schemes consist of the following: (a) nonlife insurance technical reserves; (b) life insurance and annuity entitlements; (c) pension entitlements, claims of pension funds on pension managers, and entitlements to non-pension funds; and (d) provisions for calls under standardized guarantees.

Trade credit and advances arise when payment for goods or services is not made at the same time as the change in ownership of a good or provision of a service. If a payment is made before the change of ownership, there is an advance.

Other accounts receivable/payable includes accounts receivable or payable other than those included in trade credit and advances or other instruments. It includes liabilities for taxes, purchase and sale of securities, securities lending fees, gold loan fees, wages and salaries, dividends, and social contributions that have accrued but not yet paid.

Special drawing rights SDRs are international reserve assets created by the IMF and allocated to members to supplement existing official reserves. SDRs are held only by the monetary authorities of IMF members and a limited number of international financial institutions that are authorized holders. SDR holdings represent unconditional rights to obtain foreign exchange or other reserve assets from other IMF members.

**Reserve assets** are those external assets that are readily available to and controlled by monetary authorities for meeting balance of payments financing needs, for intervention in exchange markets to affect the currency exchange rate, and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

The BOP is constructed on the basis of a double entry book-keeping system. Every recorded transaction is represented by two (or more) entries with equal values. One of these entries is recorded under credit; the other is recorded under debit. For example, in the case where an export operation was made, the transaction value in the BOP will be reflected as credit in "Export" and as debit in "Assets - currency and deposits". The sum of all credit and debit entries should equal to zero. In practice, however, the accounts frequently do not balance. Data for balance of payments estimates are often derived from different sources and, as a result, there may be a summary net credit or net debit. A separate entry, equal to the amount with the reversed sign, is then made to balance the accounts (the net errors and omissions item).

Credit entries are recorded for exports, primary and secondary income received and acquisition of non-produced non-financial assets.

Debit entries are recorded for imports, primary and secondary income paid and disposal of non-produced non-financial assets.

The international accounts follow net recording in the financial account. Net recording, means aggregations or combinations that show net changes (increases less reductions) in a particular financial asset or a liability category on the same side of the balance sheet. Transactions on financial assets and liabilities are shown under "Net acquisition of financial assets" and "Net incurrence of liabilities". Net acquisition of assets equals increase of the asset less decrease of the same asset. Transaction with positive sign means increase, while negative sign – decrease.

Market prices are the basis for valuation in the international accounts. Market prices for transactions are defined as amounts of money that willing buyers pay to acquire something from willing sellers; the exchanges are made between independent parties and on the basis of commercial considerations only

Time of recording is real time or estimated time when ownership change occurred. This is the time when transaction was recorded in financial reports.

## Standard and analytical representation of BOP

**Standard representation** - BOP items are grouped corresponding to national accounts and other macroeconomic statistics standard classifications. According to standard representations sum of all transactions should be equal to zero.

Analytical representation denotes reorgani-

zation of standard BOP items in a way where international transactions balance is financed with international reserves, IMF or other international donor credits or other exceptional financing item.

#### **Data Source**

The main sources of information used to compile the BOP of Georgia are: National bank of Georgia; commercial banks; Geostat, (data on trade of goods and services, the enterprise survey, the households' survey, and other specific surveys); the Ministry of Finance; other ministries and public institutions; representatives of international organizations in Georgia; and other nonbanking financial corporations.

In addition, since 2009 the International Transactions Reporting System (ITRS) has been implemented. The ITRS aims to collect information from commercial banks grouped according to BOP items.

Along with the data received through statistical reports, some estimations and adjustments are made in order to improve the data quality.

## Imports/exports of goods

- Imports and exports of goods are reflected in FOB prices in the balance of payments of Georgia.
- CIF prices of imported goods are converted into FOB prices. The adjustment coefficients are estimated by taking the transportation cost of unit weight for each type of transportation and region separately (the coefficients for neighboring countries equal zero).
- The official data on the import/export of goods received from the Customs Department are supplemented with estimations made by the National Bank of Georgia.

**Notice:** The reason for the differences between the data on exports and imports by the BOP and by Geostat are methodological and objective: foreign trade statistics are based on the principle of crossing a border, meanwhile, the main principle of trade of goods in the BOP is a change of ownership between residents and nonresidents. The following positions are included in external trade by the BOP and are not included in the external trade statistics of goods: goods procured in ports by carriers, non-organized trade, and non-declared export/import transactions. Besides the above mentioned cases, there are different methods of pricing. In the BOP, imports are presented in the FOB price, while in the external trade statistics imports are presented in the CIF price. In BOP export/import of goods for processing owned by nonresidents is classified as service, while in trade statistics as good.

For estimations of exports, the National Bank of Georgia uses partner countries' external trade data from the European Union, Turkey, Azerbaijan, Armenia, Russia, and Ukraine. Furthermore, partner countries' data are taken from the United Nations Statistics Department's database (COMTRADE). This method is widely used by statisticians for making estimations. Georgia's partner countries also use our export data for correction of their imports. The procedure of registration of exports by customs needs fewer resources due to the no-taxation rule on the registration of exports.

#### Services

## Transportation services

- The value of transportation services of imported goods is adjusted by data derived from the conversion of CIF prices into FOB prices (see imports/exports of goods), and is divided by type of transportation (rail transport, air transport, auto transport, etc.).
- Additional data are collected from other sources: the "Georgian Railway" Ltd., "Sakaeronavigatsia" Ltd., and seaports and airports in Georgia. Indirect estimations of the export/import of transportation services are made based on data received from the Department of Border Defense.

#### Travel

- The value of travel export/imports is derived from the data received from the household surveys. The value on business travel is additionally adjusted based upon data received from different government institutions (ministries, departments, etc.) and the banking sector.
- Information received from the Department of Border Defense concerning individuals crossing the border is also used for indirect estimations. Besides that, estimations are made on the expenses of those abroad engaged in export/import goods operations, as well as the expenses of those working abroad for less than a year.

#### Other services

The data on manufacturing services, consultation, financial and other services, are collected from those enterprises using such services. The volumes of such services are then adjusted. The data for foreign embassies, diplomatic missions and international organizations are estimated using indirect methods. The data on the diplomatic missions of Georgia abroad are obtained from the Ministry of Foreign Affairs of Georgia. Information on financial services is obtained from the re-

ports of commercial banks. Information about insurance services is provided by the insurance companies.

### Primary income

- The estimates of the compensation of employees are mainly based on the household survey data; information on electronic money transfers from the reports of commercial banks is also used. The incomes of residents employed in international organizations and foreign embassies are also estimated.
- Investment income is calculated based on various sources: the report of the Ministry of Finance about interest payments on debts under state guarantee and reports of commercial banks on interest payments in the banking sector.

## Secondary income

- Workers' remittances are estimated using the same methodology as for the compensation of employees.
- Information on the technical and humanitarian assistance received from the external sector is obtained from the Ministry of Finance and the international organizations and foundations that have their offices in the territory of Georgia.
- The Ministry of Foreign Affairs of Georgia presents the data on the membership fees of various international organizations.
- The values of grants for the education of Georgian students abroad are estimated from the data of the Ministry of Education and from the household survey data.

## **Capital Account**

 Capital transfers are calculated based on information provided by the Department of Grants and Humanitarian and Technical Assistance of the Ministry of Finance, as well as on other information sources.

#### **Financial Account**

### Direct investment

The data on direct investments are estimated from the enterprise survey. The data on the banking sector is obtained from commercial banks' reports, and the data on insurance companies from the

- State Insurance Supervision Agency.
- The direct investments of Georgia abroad are not of a large scale, but the information at our disposal about such enterprises is likely to be incomplete.

#### Portfolio investment

The data on portfolio investment equity are obtained from the enterprise survey and the reports of commercial banks, microfinance organizations and insurance companies. Data on debt securities are provided by the Ministry of Finance (state and state owned enterprises' Eurobonds), the National Bank of Georgia (treasury bills and state bonds owned by non-residents), and from commercial banks and microfinance organizations.

#### Other investment

- The data on trade credits are estimated on the basis of information from the enterprise survey.
- The data on loans is calculated from the National bank, Ministry of Finance, commercial banks', microfinance organizations, insurance companies and enterprise survey. Certain additional information is obtained from the reports of the relevant divisions of the Ministry of Finance.

#### Reserve assets

 The data source for reserve assets is the balance accounts of the National Bank of Georgia.

## 1.2 Methodological standards on the international investment position

The international investment position (IIP) of Georgia is compiled in accordance with standards recommended by the BPM6.

The international investment position of a country shows the stock of external financial assets and liabilities at a particular point in time. The IIP comprises the whole set of claims on and liabilities to non-residents in different institutional sectors: central bank, deposit-taking corporations, except the central bank, the general government, and other sectors. The main items of this document are identical to those from the financial account of the balance of payments: direct investment, portfolio investment, financial derivatives, other investment and reserve assets.

The difference between an economy's financial assets and liabilities is the economy's net international investment position. Thus the IIP can be a net debtor or a net creditor. The international investment position is worked out in the form of a table containing the following details:

|  | Position at                                      | Ch  | anges in posit                | ion reflecting:  |                   | Position at                             |  |
|--|--|---|-------------------------------|------------------|-------------------|---|--|
|  | the begin-<br>ning of the<br>reporting<br>period | Financial ac-<br>count -Trans-<br>actions | Exchange<br>rate chang-<br>es | Price<br>changes | Other adjustments | the end of<br>the report-<br>ing period |  |
| Net international invest-<br>ment position |  |   |                               |                  |                   |   |  |
| Assets                                     |  |   |                               |                  |                   |   |  |
| Liabilities                                |  |   |                               |                  |                   |   |  |

Thus the international investment position at the end of the reporting period consists of the stock at the beginning of the period, adjusted by transaction flows, exchange rate changes, valuation changes, and other adjustments in a given period. Transactions reflect the financial account transactions of the balance of payments. Other adjustments comprise corrections, reclassifications and changes required by the methodology of the IIP compilation.

The data source used in the compilation of the IIP is identical to that used for the compilation of the BOP financial account.

## 1.3 Methodological standards on the external debt

The external debt of Georgia is compiled according to recommendations of the IMF's External Debt Statistics: Guide for Compilers and Users, IMF 2013.

The gross external debt of Georgia is, at any given time, the outstanding amount of those actual current, and not contingent, liabilities that require payments of principal and/or interest by the debtor at some point in the future and are owed to non-residents by residents of an economy.

The gross external debt of Georgia covers liabilities to non-residents classified by institutional sectors, maturity and instruments.

External debt consists of the following:

- Currency and deposits;
- Debt securities;
- Loans:
- Trade credits;
- Other debt liabilities;
- SDRs:
- Direct investment: Intercompany lending.

**Currency and deposits** consist of non-residents' deposits in the Georgian banking system.

**Debt securities** include debt securities issued by Georgian residents held by non-residents. Debt securities are divided by sector (issuer sector) and by the type of financial instrument.

The stock of liabilities on debt securities at any given time is the sum of the debt securities issued by Georgian residents and held by nonresidents, plus accrued interest for the reported period if the interest payment is scheduled for a future period.

Loans consist of the following:

- Loans from the IMF loans granted by the IMF to the NBG;
- Governmental loans external loans received from other countries;
- Loans guaranteed by the government
   external loans of the private sector
   agreed under the guarantee of the government;
- Private loans external loans received by the private sector with the exception of loans from parent companies.

The stock of liabilities in the form of loans is, at any given time, the amount of the external loans received by Georgian residents minus the payments of scheduled principal and the actual advance payments of principal.

**Trade credits** consist of external liabilities arising from direct extension of credit by suppliers for transactions in goods and services. They include:

- Advance payments received by an economic agent from non-residents;
- Liabilities on the import of goods and services not paid in due time.

#### Other liabilities cover:

 Principal and interest arrears on external loans and the debt securities service.

**Direct investment: Intercompany lending** include:

- Loans from parent companies or from subsidiaries, branches and associates abroad;
- Principal and interest arrears on these loans.

The stock of intercompany lending at any given time is the amount of external loans received by Georgian subsidiaries/direct investors from their parent companies/branches minus the payments of scheduled principal and actual advance payments of principal.

The **external debt** is disaggregated by institutional sector, following classification from the BOP: the general government, central banks, deposit taking corporations and other sectors. External liabilities under guarantee are attributed to the borrower's sector; they are reclassified in the guarantor's sector only when the guarantee is activated.

Long-term is external debt with maturity of more than one year;

Short-term is external debt with original maturity of less than one year or payable immediately.

For analytical purposes, external debt is presented by maturity: short-term and long-term on an original maturity basis.

The data source used for external debt compilation is identical to the one used for the compilation of the BOP financial account and the IIP.

National Bank of Georgia

## 2. Balance of Payments of Georgia for 2017

#### 2.1 General Overview

The current account deficit in 2017 was basically determined by the trade deficit and by income, particularly investment income. The current account deficit decreased by 29.5% year on year and amounted to 1.3 billion USD. Current account to GDP ratio accounted for -8.8 percent improving by 4.3 percentage point year on year. The improvement was basically driven by increasing income in travel services. Meanwhile, trade in goods deficit decreased by 2.0 percent totaling 3.8 billion USD. The decrease was driven by higher growth of exports (24.6 percent 705.2 million USD) compared to growth of imports (9.3 percent 626.8 million USD).

The top five products exported in 2017 were cooper, ferro-alloys, automobiles (mainly re-exports), wine and medicines. Export was dis-tributed by main economic categories as fol-lows: intermediate goods had the biggest share (51.9%), consumption goods had the second biggest share (44.8%), and investment

goods had a modest 3.3% share in total exports. The share of investment and intermediate goods increased in 2017, while the share of consumption goods decreased.

The major imported commodities during the year were oil products, automobiles, copper (mainly for re-export), medicines and natural gas. In- vestment goods had a 15.0% share in total im- ports, intermediate goods had a 41.6% share and 43.3% were consumption goods. The share of investment goods decreased slightly in total imports during 2017.

The positive balance of services account partially offsets the current account deficit. Exports of services increased by 20.4% and imports - by 13.2% annually in 2017, thus, the overall balance of services increased by 28.4%. The largest contributor to the growth of the services export was travel. The export of travel was 2.1 billion USD in 2016, up by 28.1 percent to reach 2.7 billion USD in 2017.

Table 2.1.1 Main macroeconomic indicators, 2013-2017

| Economic Indicator  | Unit        | 2013    | 2014    | 2015    | 2016    | 2017    |
|---|-------------|---------|---------|---------|---------|---------|
| GDP current prices  | Billion GEL | 26.8    | 29.2    | 31.8    | 34.0    | 38.0    |
| GDP current prices  | Billion USD | 16.1    | 16.5    | 14.0    | 14.4    | 15.2    |
| Real GDP growth rate  | %           | 3.4     | 4.6     | 2.9     | 2.8     | 5.0     |
| Annual average exchange rate                                  | USD/GEL     | 1.6634  | 1.7659  | 2.2702  | 2.3667  | 2.5086  |
| Annual average exchange rate                                  | EUR/GEL     | 2.2094  | 2.3462  | 2.6175  | 2.5197  | 2.8322  |
| Current account/GDP   | %           | -5.9    | -10.8   | -12.6   | -13.1   | -8.8    |
| Balance of goods and services/GDP                             | %           | -12.9   | -18.1   | -18.2   | -16.0   | -11.7   |
| Export of goods and services/GDP                              | %           | 44.4    | 42.6    | 43.7    | 43.0    | 49.9    |
| Net secondary income/GDP                                      | %           | 9.0     | 8.6     | 8.0     | 7.8     | 8.4     |
| Export of goods and services/Import of goods and services     | %           | 77.4    | 70.3    | 70.6    | 72.8    | 80.9    |
| Import of goods and services/GDP                              | %           | 57.4    | 60.7    | 61.9    | 59.0    | 61.6    |
| International reserves  | Million USD | 2,823.4 | 2,699.2 | 2,520.7 | 2,756.5 | 3,039.3 |
| International reserves/ Import of goods and services          | Month       | 3.7     | 3.2     | 3.5     | 3.9     | 3.9     |
| Public and publicly guaranteed external debt/GDP <sup>1</sup> | %           | 36.3    | 35.9    | 44.3    | 46.2    | 46.4    |

<sup>1</sup> Includes external debt of public enterprices.

In 2017 the negative balance of primary income increased by 17.1 percent amounting to 825.9 million USD, instead of 705.6 million USD in 2016. The reason was higher growth of income debit compared to income credit that resulted from interest on increased foreign liabilities.

The secondary income increased by 13.6 percent in 2017 reaching 1.3 billion USD. It covered 33.5% of goods trade deficit.

The positive net capital account, following 52.1 million USD annual growth equaled 108.1 million USD. Net financial account decreased by 25.8 percent, (425.9 million USD) totaling 1.3 billion USD.

Gross external debt, one of the major com-

ponents in external sector statistics, amounted to 17.2 billion USD at the end of 2017. The annual growth of gross external debt equaled 8.7 percent. The external debt of the National Bank of Georgia increased by 45.6 percent (91.5 million USD); Government sector external debt increased by 13.2 percent; banking sector debt by 23.5 percent and Intercompany lending by 1.7%. At the same time 'other sectors' external debt declined by 1.4 percent.

Reserve assets transactional increase was 242.0 million USD during the year totaling 3.0 billion USD as of 31 December 2017. Import cover ratio equaled 3.9 months of imports.

The short version of the Balance of Payments of Georgia for 2013–2017 is presented below.

| Imports (CIF) | Million USD | 8,022.7  | 8,601.8  | 7,300.3  | 7,294.0  | 7,939.3  |
| Trade balance | Million USD | -5,112.4 | -5,740.8 | -5,095.6 | -5,181.1 | -5,203.8 |

|                          | Unit        | 2013     | 2014     | 2015    | 2016    | 2017     |
|--------------------------|-------------|----------|----------|---------|---------|----------|
| External trade turnover  | Million USD | 10,933.1 | 11,462.9 | 9,505.0 | 9,406.9 | 10,674.8 |
| Exports to previous year | %           | 22.5     | -1.7     | -22.9   | -4.2    | 29.5     |
| Imports to previous year | %           | -0.4     | 7.2      | -15.1   | -0.1    | 8.8      |
| Exports to imports ratio | %           | 36.3     | 33.3     | 30.2    | 29.0    | 34.5     |

The export and import distribution by groups of countries is presented in tables 2.2.4 and 2.2.5 below. The group of Black Sea Economic Cooperation (BSEC) countries has the highest share in exports, 54.5 percent in the reporting year. This high share is due to exports realized to the major partner countries: Russia, Azerbaijan, Turkey, Armenia and Bulgaria. These five major trade partner countries have a share of

86.1 percent in the group's exports and 46.9 percent - in total exports of 2017.

In imports also, the BSEC group with a 49.1 percent share is on the first position. An import with Turkey and Russia with total 55.7 percent share is the highest within the group. The share of the two countries imports in total imports of 2017 is also significant – 27.3 percent.

The commodities composition of Georgian export and import is largely invariable. During the period 2013-2017 the composition of the top ten exported products was almost unchanged, among these products were: copper ores and concentrates; ferro-alloys; motor cars; wine; medicaments; spirituous beverages;

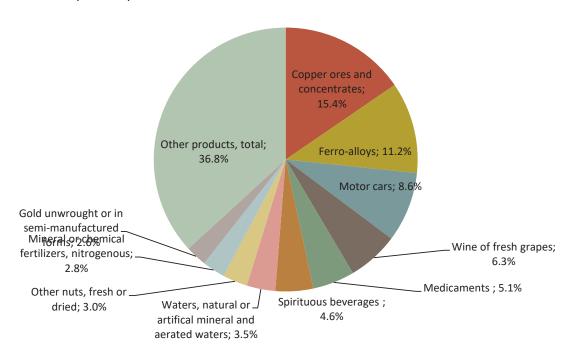

mineral waters; nuts fresh or dried; mineral or chemical fertilizers and gold. The major ten export products constitute 63.2 percent of 2017 total exports (1.7 billion USD).

The top ten main exported products in 2017 are shown in table 2.2.10 and chart 1.2.

Chart 1.2 Main exported products in 2017 (%)

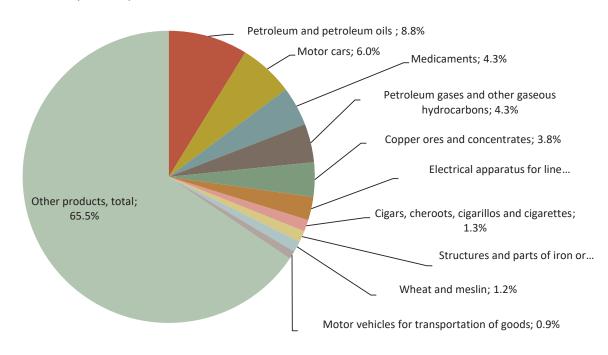

Of the top ten imported products in 2017 in first place is Petroleum, as in previous years, the import of this product significantly exceeds the value of the other main imported products. On the second and third positions in imports are: motor cars and medicaments, the majority of which are for re-export. The next main imported products are: Copper ores and con-

centrates (also for re-export); Petroleum gases and other gaseous hydrocarbons; Electrical apparatus for line telephony or telegraphy; Cigars and cigarettes; wheat and maslin; Automatic data processing machines; Motor vehicles for transportation of goods. Combined imports of the major ten import products has 34.5 percent share in total 2017 imports (2.7 billion USD).

Chart 1.3 Main imported products in 2017 (%)

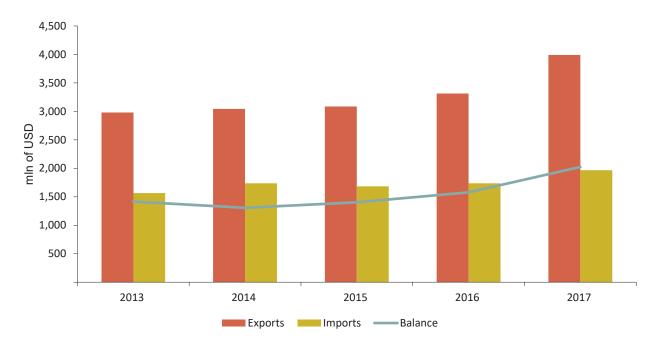

### 2.2.2 Services

The balance of services account was positive across the period 2013-2017. In 2017, the export of services increased by 20.4% year on

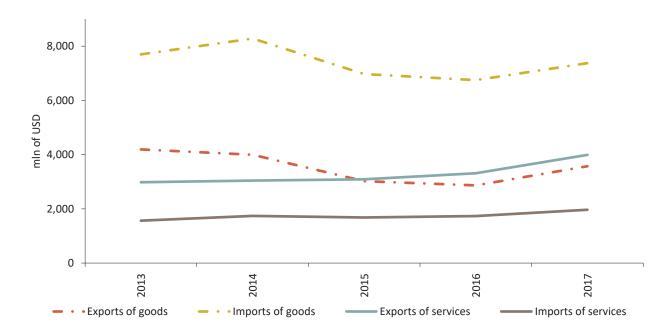

year and imports grew by 13.2%, subsequently, the balance of services increased by 28.4%. The value of the balance of services account was 2.0 billion USD and accounted for 13.3% of GDP.

Chart 2.1 Services, 2013-2017

Foreign trade in services is highly correlated with trade in goods and this relationship is growing.

Chart 2.2 External trade in goods and services, 2013–2017 (Million USD)

In 2017, the export of services totaled 4.0 billion USD - 11.8% more than the export of goods. At the same time, the import of services stood at 2.0 billion USD, which was 26.7% of the import of goods.

In 2017, a total of 87.5% of the turnover from trade in services was generated by travel (53.2%) and transportation (34.3%).

The positive balance of travel was signifi-

cant in 2017 and amounted to 2.2 billion USD, increasing by 29.9% year on year and 1.6 times compared to 2013.

Other services characterized by a positive balance were Government goods and services (30.3 million USD); Telecommunications, computer, and information services (30.3 million USD); Manufacturing services (12.4 million USD); Personal, cultural, and recreational services (8.2 million USD). Items demonstrat-

ing a negative balance included transportation (122.3 million USD); insurance services (110.1 million USD); other business services (32.1 mil-

lion USD); Charges for the use of intellectual property (24.4 million USD).

Travel is the largest service item for Georgia. During the last five years, travel services mainly determined the balance of services account. In 2017, the balance of services reached its maximum. Travel exports increased by 28.1% year on year and by 57.3 % compared to 2013. The share of travel services exports

exceeded half of the total exports of services (67.8%). Travel imports increased by 20.0% year on year, accounting for 23.6% of total ser- vices imports. The share of personal travel (78.8%) in the travel balance exceeded the share of business travel in 2017.

During 2013-2017, pipelines had the biggest share in transportation services exports, amounting to 32.4% in 2017 – a decrease of 2.4% and 7.8 million USD over 2016. Income from air transportation increased by 31.4% compared to the previous year and accounted

for 28.3% of total export of transport. On third place in transportation services exports was road transportation with 170.5 million USD of exports rise by 19.5%. Export of sea transport service decreased by 15.7% over the year. The 95.9% of Sea transportation exports account-

ed for supporting services. Export of Railway transportation, the majority of which comes from transit, decreased by 23.7% over the year.

In terms of import of transport services road transport had the biggest share (39.1%) – a growth rate of 12.0% over the year. Air trans-

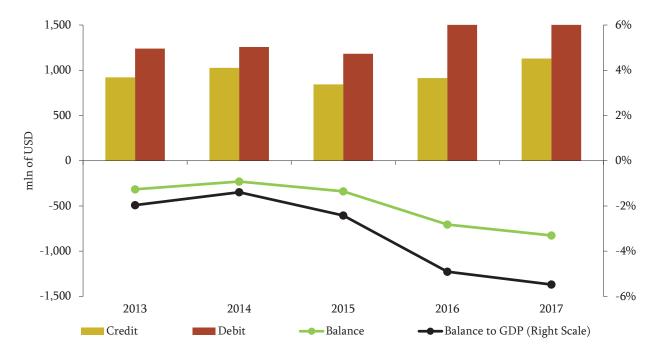

port services had 25.7% share in total import of transport services. Imports of sea transport had a 25.1% share. The share of railway transport services in imports was 10.0% and personal, cultural, and postal and courier services had 0.1% share in imports of transport services in 2017.

### 2.2.3 Primary income

The balance of the primary income account amounted to -825.9 million USD in 2017. That is -5.4 percent of GDP. The surplus in the compensation of employees was outweighed by a net investment income deficit, resulting in a negative record of the primary income ac-

count. Increase of balance of compensation of employees (mostly due to increase in credit) was smaller than increase of net investment income outflows. This resulted widening of the primary income deficit.

Chart 2.3 Primary income, 2013-2017

Primary income credit increased by 23.6 percent annually and amounted to 1.1 billion USD in 2017. The main contributor to primary income credit was the compensation of employees. The credit of compensation of employees amounted to 741.1 million USD, accounting for 65.6 percent of total primary income credit.

This figure increased by 13.6 percent year over year. Investments income made by residents abroad increased by 48.3 percent and com- prised 388.3 million USD. Investment income credit had a 34.4 percent share of total primary income credit in 2017.

Primary income debit amounted to 2.0 billion USD in 2017 that is 20.7 percent more than it was in 2016. It mainly consisted of investment income debit. Income accrued on investments made in Georgia by nonresidents totaled 1.8 billion USD in 2017 that was 20.4 percent more compared to last year's figure. Investment income debit mainly consists of dividends and reinvested earnings on foreign direct investments, totaling roughly to 1.3 billion USD. In-

come paid out on portfolio investments totaled 143.5 million USD. The remaining 377.6 million USD of investment income debit accounted to other investments. Compensation paid to foreign employees was relatively small compared to compensation paid to resident employees from abroad. During the reporting period, this figure increased by 25.5 percent and amounted to 118.4 million USD.

#### 2.2.4 Secondary income

The balance of secondary income reached

1.3 billion USD in 2017 that is 152.7 million USD or 13.6 percent greater than the previous year's figure. Secondary income balance over GDP increased by 0.6 percentage points from 7.8 percent in 2016 to 8.4 percent in 2017.

Secondary income credit increased by 13.4 percent in 2017 and amounted to 1.4 billion USD. Credit mainly consisted of those from other sectors. Credit of personal transfers totaled to 1.1 billion USD. Workers' remittances accounted to 750.4 million USD out of personal

transfers. Other current transfers amounted to 107.2 million USD in 2017. Credit of secondary income of government sector increased insignificantly during the reporting year. Totally, intergovernmental grants and other types of technical or humanitarian aid received by government of Georgia increased by 1.6 percent and amounted to 238.0 million USD. Secondary income debit was low and equaled to 124.3 million USD. This amount mainly contains taxes payed by residents to other countries and annually equals to 119.6 million USD.

While analyzing the primary and secondary income it is also important to look at the cash flows in and out of the country made through money transfer operators. This category includes both the compensation of employees and worker's remittances, also transactions between nonresidents. A total of 1.4 billion USD was transferred to Georgia during 2017

through money transfer operators, which is 19.8 percent more compared to the previous year's figure.

Money transfer outflows were relatively small compared to inflows. Total money transfer outflows were 208.7 million USD, a 7.6 percent increase compared to the previous year.

## 2.3 Capital Account

## 2.3.1 Capital Transfers

Net capital transfers increased in 2017 while it showed gradual decrease during 2013-2016.

Annual net capital transfers surged by 93.0 percent compared to 2016 figure and amounted to 108.1 million USD.

Chart 2.5 Net capital transfers, 2013-2017

The boost of net capital transfers in 2017 was mainly conditioned by increase of credit. The amount of capital outflow was insignificant compared to inflow and thus had a slight influence on the net figure.

Government sector was the principal contributor to total capital transfers. 77.1 percent

of capital transfers credits accounted for government sector in 2017. 24.7 million USD worth debt forgiveness of financial corporations, nonfinancial corporations, households and NPISHs was observed during the reporting year.

Table 2.3.11 Capital transfers, breakdown by sectors, 2013-2017 (Million USD)

There were no records made in the other component of the capital account, "Gross acquisitions/disposals of non-produced nonfinancial assets" during 2013–2017.

Balance of current and capital account was

negative in 2017. This figure indicates that Georgia was net borrower from the rest of the world. During the year net borrowing decreased by 33.3 percent and amounted to 1.2 billion USD.

## 2.4 Financial Account

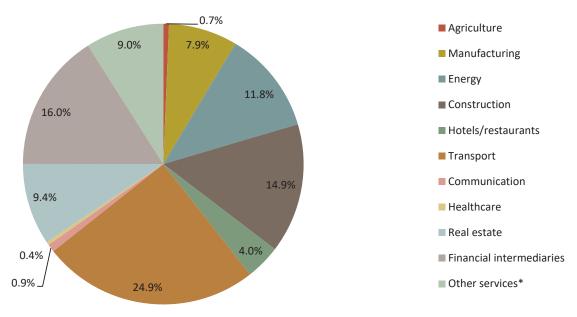

Table 2.4.1 Foreign direct investments (flows), 2013–2017 (Million USD)

|                                     | 2013    | 2014    | 2015    | 2016    | 2017    |
|-------------------------------------|---------|---------|---------|---------|---------|
| Net acquisition of financial assets | 127.3   | 406.6   | 315.7   | 411.8   | 204.9   |
| Net incurrence of liabilities       | 1,028.0 | 1,817.9 | 1,659.1 | 1,570.5 | 1,829.9 |
| Equity capital                      | 765.6   | 1,247.0 | 1,534.7 | 1,798.2 | 1,187.8 |
| Reinvested earnings                 | 268.6   | 324.9   | 157.3   | 334.1   | 657.5   |
| Other capital                       | -6.2    | 245.9   | -33.0   | -561.8  | -15.4   |

The largest FDI inflow 1.8 billion USD was observed in 2017, with 16.5 percent annual growth. The similar FDI during the last five years was in 2014. 2015 and 2016 FDI inflows were lower compared to previous year but still

high (around 1.6 billion USD). The FDI inflow was distributed as follows: 1.2 billion USD in equity capital, 657.5 million USD in reinvested earn- ings, and -15.4 million USD in other capital (di- rect investor loans).

Chart 2.7 Foreign direct investment inflow during 2017, by field of activity

<sup>\*</sup> Trade; education; health and social work; community, social and personal service activities

0.7% of the total FDI inflow during 2017 was directed to the agriculture sector. The share of the manufacturing accounted for 7.9%. The remain- ing FDI was directed to the services sectors and was distributed as follows: investment in trans- port accounted for 24.9% of total FDI – the bulk of which was investment related to the South Caucasus Pipeline expansion. Total

investment within that project is estimated to be about 2 billion USD.

FDI in financial sector increased to reach 16.0 percent in total FDI. 14.9% of FDI inflow was in construction; FDI in the energy sector accounted for 11.8%; real estate for 9.4%; hotels and restaurants for 4.0%. The remaining investments were directed to other services.

#### 2.4.2 Portfolio Investment

During 2017, the transactional growth of portfolio investment amounted to 71.0 million USD. Liabilities increased by 170.7 million USD due to banking and other sectors' transactional changes in debt securities. Meanwhile, liabili-

ties of other sectors decreased. The asset increase (by 241.7 million USD) was due to the purchase of Georgian lari denominated foreign securities by commercial banks.

Table 2.4.2 Portfolio investment, 2013-2017 (Million USD)

|  | 2013   | 2014   | 2015  | 2016   | 2017  |

## 2.4.3 Financial derivatives and employee stock options

Financial derivatives, as an independent component of the financial account, have not been presented for long and were previously included in portfolio investments. Following the development of financial markets, the role of financial derivatives in financial operations increased significantly. It was thus considered appropriate to show them on a separate account in a number of statistical reports. As the

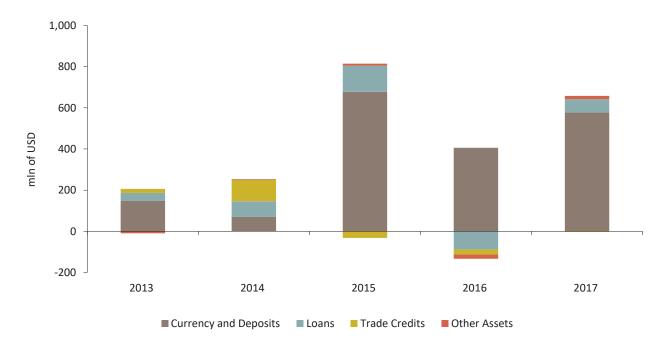

financial market in Georgia is only in its early stages, operations with financial derivatives are insignificant and are conducted only by a few banks. However, this market has the potential to develop. At the initial stages, there was only one instrument - currency swap. However, starting from the fourth quarter of 2008 new financial instruments, gold and oil futures were presented on the derivatives market in Georgia. Net financial derivatives for 2017 amounted to 0.5 million USD.

## 2.4.4 Other Investment

The net capital outflow recorded on the oth- residents' external assets equaled 655.5 miler investment account during 2017 equaled 11.2 million USD. The transactional growth of lion USD.

lion USD, and liabilities increased by 644.3 mil-

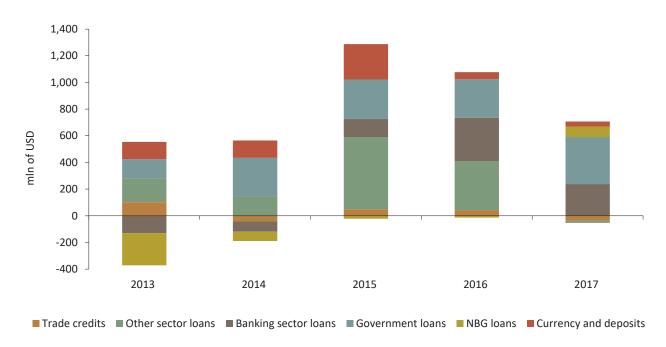

Chart 2.8 Other investment - assets, 2013-2017

Among assets the highest growth was recorded on cash and deposits (576.7 million USD). Loans increased by 65.5 million USD.

Transactional changes in other items were insignificant.

Chart 2.9 Other investment - liabilities, 2013-2017

The highest inflow on liability side came from government loans (352.9. million USD) and commercial banks' loans (238.0 million

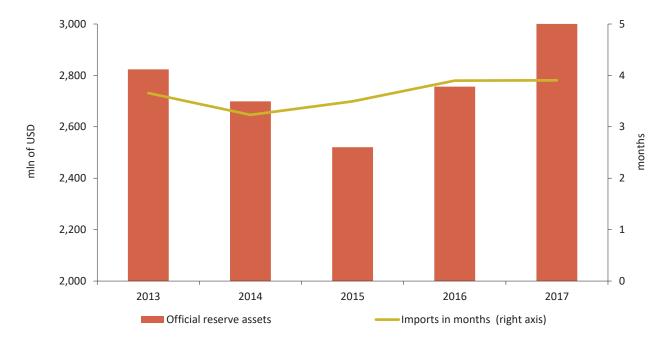

USD). National Bank's loan increased by 78.2 million USD.

#### 2.4.5 Reserve Assets

By the end of 2017, the official reserve assets of Georgia amounted to 3.0 billion USD. The net increase compared to the previous year was 282.8 million USD or 10.3%. Of that,

the transactional change was 242.0 million USD, and the remaining growth was due to exchange rate and other changes.

Chart 2.10 Reserve assets, 2013-2017

Changes in the volume of the NBG's international reserves in 2017 were affected by a number of traditional factors, including the NBG's FX auctions, government expenditures, and loans and grants received from international organizations. During the year, net FX purchase by the NBG totaled 129.8 million USD. The loans and grants received by the Georgian government to finance various programs and projects

from international financial organizations and donor countries, as well as funds received from the IMF in the framework of the extended fund facility, amounted to 497 million USD in 2017. On the other hand, the Georgian government debt service amounted to 272 million USD and currency conversions by the government amounted to 230 million USD.

#### 3. International Investment Position

The international investment position of Georgia (IIP) was negative and amounted to -22.7 billion USD (149.4% of GDP) as of 31 December 2017. IIP worsened by 13.0% or 2.6 billion USD year on year. Transactions amounted to -1.3 billion USD. Exchange rate changes

amounted to 375.5 million USD partially offsetting the negative transactional changes. Price and oth- er changes worsened the net international in- vestment position by -922.2 million USD.

Chart 3.1 International investment position of Georgia, 2013-2017

By the end of 2017, the volume of total foreign assets amounted to 9.4 billion USD, an increase of 1.4 billion USD (17.2%) year on year. Majority of assets (3.0 billion USD) are represented by the international reserves of the National Bank of Georgia. Another significant part comes from other investments, totaling 3.4 billion USD, represented by currency and deposits, loans and trade credits and advances. The reserve assets of the NBG and other investments comprised 32.4% and 36.4% of the total foreign assets of Georgia. All items of the foreign assets increased. Reserve as- sets of the National Bank of Georgia increased by 282.8 million USD; direct investment as- sets increased by 239.5 million USD; portfolio investment assets increased by 243.0 million USD; the increase of other investment assets (primarily due to increase of deposits of commercial banks) amounted to 610.2 million USD.

During 2017, total liabilities increased by 14.2% (4.0 billion USD) and as of 31 December 2017, reached 32.0 billion USD. Direct investments accounted for roughly half of the foreign liabilities (54.2%), totaling 17.3 billion USD. The portfolio investment's share in foreign liabilities was 6.9%, totaling 2.2 billion USD. Other investment made a 38.9% contribution to total liabilities, equaling 12.5 billion USD, mostly consisting of non-residents' loans.

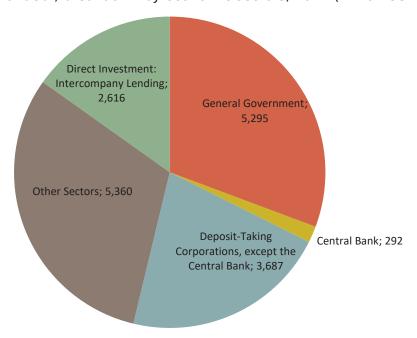

The increase of liabilities was mainly due to transactions totaling 2.6 billion USD. 69.4% of transactions came from foreign direct investment transactions. The decrease of for- eign liabilities due to exchange rate changes amounted to 531.8 million USD in 2017, 145.2 million USD resulting from exchange rate changes of direct investments and 384.3 million USD of other investments. The price and other changes increased foreign liabilities by 640.9 million USD and 163.3 million USD respectively.

#### 4. External Debt

Gross external debt statistics are harmonized with the balance of payments statistics. The whole economy consists of four main sectors: the government sector, the central bank, the deposit-taking corporations sector and oth-

er sectors. In addition to those, intercompany loans are separately recorded. Other sectors are divided into other financial corporations and non-financial corporations.

Chart 4.1 Gross external debt, breakdown by economic sectors, 2017 (Million USD)

As of 31 December 2017, the gross external debt of Georgia was 17.2 billion USD (113.8% of GDP). The distribution of debt across the sectors was as follows: the debt of the government sector was 5.3 billion USD (34.9% of GDP); the debt of central bank was 292.4 million USD (1.9% of GDP); the debt of the deposit-taking corporations sector was 3.7 billion USD; the debt of other sectors was 5.4 billion USD; and intercompany loans were 2.6 billion USD.

A significant share of the gross external debt of Georgia, 31.1%, was made up of the external liabilities of the other sectors. Debt stock attracted by government sector at the end of 2017 comprised 30.7% of gross external debt. The external debt of the deposit-taking

corporations sector was 21.4% of gross debt. Intercompany loans (loans from direct investors) constituted 15.2% of the country's gross foreign indebtedness. The majority (97.0%) of other sectors' foreign indebtedness consisted of loans taken by non-financial corporations – amounting to 30.1% of gross external debt and totaling to 5.2 billion USD. The size of liabilities of the Central Bank were small, contributing to 1.7% of the gross external debt.

The general picture of the gross external debt of Georgia by the end of 2017 is reflected in table 4.1. The table provides a short version of external debt decomposition across economic sectors and maturity dimensions.

Table 4.1 Gross external debt, 2013–2017 (Million USD)

The gross external debt of Georgia increased by 1.4 billion USD in 2017. The external liabilities of deposit-taking corporations, government sector, central bank and intercompany lending expanded. The increases amounted to 702.4 million USD, to 616.9 million USD, to 91.5 million USD and to 42.7 million USD respectively. In contrast, external liabilities of other sectors decreased by 75.6 million USD during the year.

External liabilities were accumulated in both foreign (by 876.1 million USD) and the national currency (by 501.9 million USD) in 2017.

Among the primary factors contributing to extension of deposit-taking corporations ex- ternal debt were transactions in debt securi- ties and long term loans, other changes of long term loans (shift of other financial corpora- tions to deposit-taking corporations sector that on the other hand led to contraction of other sectors debt), exchange rate changes of short term currency and deposits. External debt of government sector increased mostly by new long-term loan borrowings and exchange rate changes on existing debt stocks. Disbursements under IMF extended fund facility led to the increase of central banks debt in 2017.

Gross external debt increased by 1.4 billion USD in 2017. Transactions accounted for 801.6 million USD increase out of total change, exchange rate changes accounted for 435.1 million USD, other changes accounted for 79.2 million USD and price changes accounted for 62.2 million USD.

### 5. Data Source Description

data sources from various institutions and or-

The balance of payments statistics division ganizations in order to compile the balance of of the National Bank of Georgia uses different payments, international investment position and gross external debt statistics.

- 1 It is recommended that all currency and deposits be included in the short-term category unless detailed information is available to make the short-term/long-term attribution.
- Other debt liabilities comprise insurance, pension, and standardized guarantee schemes, and other accounts payable-other in the IIP statement. In the absence of information to make the short-term/long-term attribution, it is recommended that insurance, pension, and standardized guarantee schemes be classified as long term.
- 3 Arrears are recorded in the original debt instrument rather than in other debt liabilities, short term, and separately identified by sectors in memorandum items.
- Debt securities are valued at market value in the table, and at nominal value in the Memorandum items. Debt securities in the memorandum items do not include those that may be included in Direct investment: Intercompany lending.
